The programs of study, known as majors, include a narrative description and a summary of course requirements. Students should read the complete narrative descriptions because the summary eliminates essential information. An explanation of the components of each course entry follows.

Course Numbering

Unless an exception is noted, course numbering typically follows standard guidelines. Courses numbered 10000 are general education and introductory courses. Courses numbered 20000 are intermediate, advanced, or upper-level courses that are open only to undergraduates. Courses numbered 30000 and above are graduate courses that are available only to undergraduate students who obtain the consent of the instructor. Higher numbered courses within these categories do not indicate increasing levels of difficulty. Undergraduates registered for 30000-level courses will be held to graduate-level requirements. College students use the undergraduate number to register for courses that are cross listed with graduate divisions or professional schools. In some departments, students with advanced standing and consent of instructor may register for higher-level courses. Except for language instruction courses, these courses are not listed in this catalog; students should contact individual departments for further information. A number shown, for example, as 211xx, indicates that it is a course within the series 21100 through 21199; any information that describes 211xx applies to the entire range of courses available within the series.

Course Description

A narrative description follows the course number and title. Unless otherwise designated, courses are taught on campus.

"L" at the end of the course description indicates that the course has a laboratory requirement. Courses with laboratories do not yield extra credit.

Units

A student receives 100 units of course credit for most undergraduate courses.

Term Offered

Courses may be offered in Summer, Autumn, Winter, or Spring Quarter, or in multiple quarters. If a course is not offered in the current academic year but will be offered at a future time, that information appears in this field.

Instructor

For faculty contact information, visit the University of Chicago online directory at directory.uchicago.edu. Many departmental websites include additional information about the research and scholarly interests of faculty members.
Equivalent Courses

Because of the interdisciplinary nature of the College, many courses are cross listed in multiple programs of study. For example, CMST 10100 Introduction to Film Analysis is cross listed among Art History, Cinema and Media Studies, English Language and Literature, and Visual Arts.

Prerequisites

A course may have one or more prerequisites for registration. Before registering for MATH 17600 Basic Geometry, for example, a student must first have completed MATH 16300 Honors Calculus III or MATH 15900 Introduction to Proofs in Analysis and Linear Algebra. Another example: Some courses require students to be in their third or fourth year in the College.

Notes

The Notes field contains additional information that may be of use to students, for instance, that the course meets a general education requirement or that the course is required for students in a certain major.

For More Information

For further specifics on quarterly course offerings, consult the time schedules (timeschedules.uchicago.edu ). For further information about areas of study, consult the College (http://college.uchicago.edu) website at college.uchicago.edu and the program websites linked on the individual program of study pages in this catalog.
