ANTHROPOLOGY

Department Website: http://anthropology.uchicago.edu

PROGRAM OF STUDY

Anthropology is the intensive study of human diversity across time and space. It is a field that is both eclectic and rigorous. Methods deployed can include ethnography, linguistics, archaeology, and biology, while topics anthropologists study are as varied as the human experience. Anthropology is grounded in intensive fieldwork and, as practiced at the University of Chicago, an understanding that cultural realities need to be studied, theorized, and accounted for prior to any attempts to universalize human behavior. Students with training in anthropology receive excellent training for continuing graduate study in social sciences, humanities, or biological fields, and Anthropology majors are sought after by NGOs, medicine, business, technology, museums, education, and government.

At the undergraduate level, courses generally align with one of four traditional subfields: sociocultural, linguistics, archaeology, and biological anthropology. Topical courses can focus on particular cultural areas or nations such as South Asia, the United States, Africa, post-Soviet Europe, the Andes, or the Caribbean. Others are defined by communities that cut across geography, such as bankers, pirates, or the African diaspora. Current topical strengths of the department include critical studies of science and technology, environment, race and indigeneity, gender and sexuality, capitalism, material culture, historical anthropology, urbanism, migration, language and meaning, media studies, populism and political violence, genomics, heritage, and cross-cultural approaches to law, empire, and religion.

For more information, see the Department of Anthropology website (http://anthropology.uchicago.edu).

PROGRAM REQUIREMENTS

Note: These requirements are in effect starting with the graduating Class of 2025. Students who matriculated prior to Autumn 2021 may adopt the modified requirements if appropriate and should consult with the department to design their program of study.

The BA program in Anthropology consists of twelve courses, of which at least ten are typically chosen from those listed or cross-listed as Department of Anthropology courses. The requirements for the major are:

1. One 20000-level Anthropology topical course taken with a regular faculty member of the department, OR Introduction to Anthropology ANTH 10100 (100 units)
2. ANTH 21107 Anthropological Theory (100 units)
3. One Methods course (100 units)
   • ANTH 21420 Ethnographic Methods
   • ANTH 28400 Bioarchaeology and Forensic Anthropology: Approaches to the Past
   • ANTH 29500 Archaeology Laboratory Practicum
   • or an approved alternative in archaeological, linguistic, or biological anthropology
4. Seven electives in Anthropology (700 units)
5. Two electives from Anthropology or an approved, related discipline (200 units)

To request approved credit for non-departmental courses, students should submit a General Petition Form (https://anthropology.uchicago.edu/content/undergraduate-student-forms/#:~:text=General%20Petition%20Form) and a syllabus for the course(s) to the department’s Director of Undergraduate Studies. Petitions may also be submitted for courses that have already been completed.

Students interested in the Anthropology major should endeavor to complete the three required courses by the end of their third year (ANTH 21107 (http://collegecatalog.uchicago.edu/search/?P=ANTH%2021107) Anthropological Theory, a Methods course, and a 20000-level topical course taught by a regular faculty member of the department OR ANTH 10100 (http://collegecatalog.uchicago.edu/search/?P=ANTH%2010100) Introduction to Anthropology). When possible, completing those courses by the end of the second year is recommended, as they provide foundational concepts that facilitate understanding of higher-level course work.

INTRODUCTORY COURSES AND GENERAL EDUCATION

Introductory-level courses such as ANTH 10100 (http://collegecatalog.uchicago.edu/search/?P=ANTH%2010100) and many 20000-level courses offered in the department will provide surveys of some of the substantive, methodological, and theoretical issues of sociocultural, archaeological, linguistic, and biological anthropology. These courses do not presume any previous study of anthropology and may be taken in any order. However, students are urged to complete the general education requirement in the social sciences before taking more advanced courses in sociocultural anthropology. SOSC 11400-11500-11600 Power, Identity, Resistance I-II-III or SOSC 12400-12500-12600 Self, Culture, and Society I-II-III are particularly recommended.

Several sequences that satisfy the general education requirement in civilization studies typically feature anthropological approaches and content. These courses are cross-listed with Anthropology and may be used...
toward the major if they are not used toward the general education requirement: ANTH 20701-20702-20703
Introduction to African Civilization I-II-III, ANTH 23101-23102-23103 Introduction to Latin American Civilization I-II-III, ANTH 24001-24002-24003 Colonizations I-II-III, and ANTH 24101-24102 Introduction to the Civilizations of South Asia I-II. With prior approval, other civilization courses may also be used toward the Anthropology major, per the individual student’s needs or interests and up to the two-course limit for non-departmental courses, provided they are in addition to the general education requirement.

Anthropology majors and minors are encouraged to meet with the Director of Undergraduate Studies or the Student Affairs Coordinator on a regular basis to plan their course schedules. The Director can also help connect students to faculty advisers who can further guide students interested in particular subfields (archaeological, biological, linguistic, or sociocultural anthropology).

**READINGS AND RESEARCH COURSES**

When desirable for a student’s Anthropology program and with the approval of the Director of Undergraduate Studies, preferably in advance, a student may also obtain course credit for supervised individual reading or research (ANTH 29700 Readings in Anthropology).

A maximum of two readings and research courses (ANTH 29700 Readings in Anthropology, ANTH 29900 Preparation of Bachelor’s Essay, ANTH 29910 Bachelor’s Essay Seminar, or BA courses from other departments) can be used toward satisfying requirements for the Anthropology major. Readings and research courses beyond this number will be considered electives.

**FIELD COURSES**

Students attending field schools or taking courses offered by other universities can request approval to obtain course credit (up to the two-course limit for non-departmental courses) when appropriate for their program of study. Credit from other institutions would first need to be approved by the College (https://college.uchicago.edu/advising/transfer-credit/) and then by the Director of Undergraduate Studies if intended to count toward the major.

**SUMMARY OF REQUIREMENTS FOR THE MAJOR IN ANTHROPOLOGY**

The BA program for a major in anthropology consists of twelve (12) courses, of which at least ten (10) are typically chosen from those listed or cross-listed as Department of Anthropology courses.

ANTH 28400  Bioarchaeology and Forensic Anthropology: Approaches to the Past
ANTH 29500  Archaeology Laboratory Practicum

or an approved alternative Methods course

Four additional courses listed or cross-listed as ANTH  

Total Units  600

Courses in the minor may not be double-counted with the student's major(s), other minors, or general education requirements. The department will not accept petitions for non-Anthropology courses toward the minor.

**PROCESS OF DECLARING THE MAJOR OR MINOR**

College students coming from any field of study may complete a major, a second major, or a minor in Anthropology. Students are encouraged to construct individual programs by consulting periodically with their College adviser, the Director of Undergraduate Studies, and/or the department's Student Affairs Coordinator. We strongly urge students to complete several introductory courses before enrolling in upper-level courses. Students may select courses widely across all four subfields (sociocultural, linguistic, archaeological, and biological anthropology) within the minor or major, or focus their work within or across any subfield.

Students should confer with their College adviser before declaring a major or minor in Anthropology and must obtain the endorsement of the department's Director of Undergraduate Studies via the appropriate forms (https://anthropology.uchicago.edu/content/undergraduate-student-forms/#:~:text) provided by their adviser. Students should then submit this form to their College adviser.

**GRADING**

Courses counted toward the major must be taken for quality grades (no P/F grading).

**HONORS BA PROCESS**

Students who wish to be considered for honors must apply to the Director of Undergraduate Studies before the end of their third year. Eligible candidates must have a GPA of 3.6 or higher in courses in the major and typically a GPA of 3.25 overall. To receive honors, students must develop an extended piece of research via a bachelor's essay under the approved supervision of a regular Anthropology faculty member. BA projects involving alternative media (like film, photography, photo-essay, or art installation) may be accepted if accompanied by a written text. Because original field research can take time, or take place outside Chicago, students are encouraged to complete the first phase of data collection in the summer between their third and fourth years.

Students writing BA honors papers are urged to enroll in ANTH 29920 Bachelor's Thesis Workshop/I Bachelor's Thesis Workshop (to learn research design and how to organize data) in Autumn Quarter and/or ANTH 29910 Bachelor's Essay Seminar in Winter Quarter (to write the draft). Students may also arrange to work one-on-one with a faculty adviser on their thesis and register for credit under ANTH 29900 Preparation of Bachelor's Essay.

For award of honors, the BA essay must receive a grade of A or A- from the faculty supervisor and from the second reader. Normally the faculty supervisor is a regular faculty member of the department. Affiliated faculty may serve with the approval of the Director of Undergraduate Studies. The second reader can be any credentialed scholar/scientist approved by the Director of Undergraduate Studies.

The department will accept a BA paper or project used to satisfy the same requirement in another major only if certain conditions are met. Approval from the Directors of Undergraduate Studies of both departments is required. Students pursuing this option should consult with their faculty advisers by the earliest BA proposal deadline (or by the end of their third year if neither program publishes a deadline). The Petition to Use a Single Bachelor's Paper for Two Majors (https://humanities-web.s3.us-east-2.amazonaws.com/college-prod/s3fs-public/documents/BA_Double_Major_0.pdf), to be signed by both faculty supervisors, is available from the College adviser. It must be completed and returned to the College adviser by the end of Autumn Quarter of the student's year of graduation.

**ANTHROPOLOGY COURSES**

**ANTH 10100. Introduction to Anthropology. 100 Units.**
Classically defined as the ‘science of humankind’ or the ‘study of human diversity’, anthropology examines how people organize themselves into groups and relate to the environment through their cultural beliefs and practices. Students will be introduced to the types of arguments, questions, and problems that have driven anthropological thinking, and to the discipline’s unique focus on intensive fieldwork methodologies that span ethnography, archaeology, linguistics, and even biology. We will examine how anthropologists have historically studied topics like belief, kinship, ritual, politics, exchange, and material culture in the non-western world in order to unsettle western norms and assumptions. And we will explore how post-colonial critiques and indigenous perspectives have redefined the discipline in the twenty-first century. Students will learn how anthropologists are today contributing to solving complex global problems, from climate change to economic
Anthropology

inequality, racism, violence, immigration, health disparities, political technologies, and the effects of social media. This course serves as a sampler for those curious about the field and it fulfills a basic requirement for those pursuing the Anthropology major or minor. Offered at least once yearly by rotating faculty who will provide their unique take on the discipline.

Instructor(s): Staff
Prerequisite(s): Designed as a first course in Anthropology

**ANTH 10107. Nature and Technology in the Capitalist Mode of Production. 100 Units.**

The crisis of nature and technology is at the heart of the 21st century mode of production as unprecedented planetary scale ecological destruction, climate change, and exhaustion of fossil fuels undercut the dynamics of capitalist accumulation. At the same time, novel techno-natural fixes are being designed to contain the crises inherent to the life process of capital. However, these movements are far from seamless; new tensions, contradictions, and horizons of struggles emerge making a critical inquiry of these concepts urgent to Anthropological thinking. In this course, the students will be introduced to foundational approaches to these problems. The first half of the course will intensively engage with dialectical materialist frameworks to understand the interrelationship between nature, technology, and consciousness in the capitalist mode of production. From this engagement, we will derive critical concepts that will be used to engage with the pertinent questions of planetary scale appropriation of human, non-human and more-than-human life in emergent anthropological theory and ethnographic literature. In doing so, our goal is to reflect on a series of questions: What is the place of nature and technology in the capitalist mode of production? How and if they embody limits to the workings of capital? How does anthropology allow us to develop new political and theoretical horizons that emerge in the wake of these developments?
Equivalent Course(s): HIPS 21017, CEGU 21017

**ANTH 12800. Formations of Indigeneity. 100 Units.**

Whose land are we on? What does it mean to be Indigenous, for generations past and in the twenty-first century? From debates over claims of Indigenous ancestry by political actors to the struggles of sacred lands protection against natural resource extraction, understanding the stakes of these concerns for Indigenous peoples and nations is more relevant than ever. This seminar-part of the sequence for majors in the Department of Race, Diaspora, and Indigeneity-introduces students to core texts and concepts in the field of Native American and Indigenous Studies (NAIS). Topics will include sovereignty and governance, settler colonialism, citizenship and nationhood, blood quantum and racialization, diasporas and urban indigeneity, and relationships to land and environment. Course activities may include engagement with Indigenous films, dialogues with visiting Indigenous scholars, and field trips to Chicago-area cultural institutions.

Instructor(s): Teresa Montoya and Matthew Krue Terms Offered: Autumn
Equivalent Course(s): CRES 12800, CHST 12300, HIST 17800, RDIN 12300

**ANTH 20006. Embodiment and the Senses. 100 Units.**

This course approaches bodies as points of insight into governance, the varied experiences of being governed, and efforts to evade and reconfigure institutional expressions of authority. First, we will examine bodies as targets of governance, objects to be reformed, regulated, contained, disciplined, educated, incarcerated, treated, trained, and “cared” for. Next, we will consider how bodies accrue power as sites of resistance, refusal, and critique. Certain bodies in certain places elicit discomfort, unsettling familiar divisions such as of private and public space, of developed and backward, of religious and secular, of reason and madness, of citizenship and (often racialized) non-citizenship. Finally, we will ask how bodies and sensory practices figure in ethical projects of crafting exemplary kinds of subjectivity or collectivity. In this way, the course will introduce students to anthropological approaches to embodiment as well as related questions of bio-politics, gender and race, political subjectivity, care and self-making, post/colonialism, sensory politics and the aesthetic. Along the way, students will gain a new appreciation of the political potency of bodies and bodily practices near and far-from Lenin’s preserved body to Trump’s “small” hands, reproductive labor to sex work, dirty protest to women’s marches, indigenous eco-rituals to queer intimacies.

Instructor(s): Mareike Winchell
Equivalent Course(s): GNSE 24006, RLST 26006

**ANTH 20537. The Global Black Panther Party. 100 Units.**

In America, the Black Panther Party and its leaders, like Fred Hampton in Chicago, are famous for their revolutionary fight against white supremacy and their violent suppression by US government forces. But what does a Global Studies approach teach us about the Black Panthers? This seminar explores how the Black Panther Party’s worldwide networks impacted global understandings of politics, race, and religion. Our readings examine a series of comparative case studies, including the Dalit Panther Party in India, the Mizrachi Black Panther Party in Israel, and the Polynesian Panthers in New Zealand. We analyze primary sources, such as the various Panther Parties’ publications, their mainstream press coverage, and their pop cultural representations, like Ta-Nehisi Coates’ Black Panther graphic novel and the film Black Panther: Wakanda Forever. In this course, students learn the global Black Panther Parties’ roles in reshaping worldwide conceptions of race, caste, and religion through their encounters with the Nation of Islam, Hindu Nationalism, Zionism, and Indigenous rights. No prior knowledge or coursework is required.

Instructor(s): Andrew Kunze Terms Offered: Spring
Equivalent Course(s): RDIN 26674, RLST 26674, GLST 26674
ANTH 20700. Global Health, Environment, and Indigenous Futures. 100 Units.
The global coronavirus pandemic has made evident the significance of ecological (im)balances for the well-being of societies. The relationship between structural inequalities, changing environments and health, especially for historically and socio-economically marginalized communities, is now well established. At the same time, a growing body of literature links the material conditions of marginalized communities—for instance, spaces of dwelling and conditions of labor-to health status, globally. Based on a set of interdisciplinary literature arranged through anthropological theories, this course will critically engage with notions of health and well-being for indigenous communities, tracing injustices that stem histories of racial, caste- and ethnicity-based, and environmental exclusions. The readings are organized around one central question: What does it mean to be indigenous in a changing planet where social, political, and economic systems are marked by enduring legacies of systemic violence? This graduate and undergraduate level course will introduce contexts within which structural exclusions lead to ill-health and loss of well-being among indigenous communities across the globe. The aim is to develop critical thinking on the political economy and political ecologies of indigenous health as imbricated with issues of social, economic, and environmental justice.
Instructor(s): Sanghamitra Das
Equivalent Course(s): SALC 26501, ANTH 30700, CEGU 20700, CHDV 20700, CHDV 30750, RDIN 20700, CEGU 30700, RDIN 30700

ANTH 20701-20702-20703. Introduction to African Civilization I-II-III.
Completion of the general education requirement in social sciences recommended. Taking these courses in sequence is recommended but not required. This sequence meets the general education requirement in civilization studies. African Civilization introduces students to African history and cultures in a three-quarter sequence.

**ANTH 20701. Introduction to African Civilization I. 100 Units.**
Part one considers literary, oral, linguistic, and material sources to investigate African societies and states from the early Iron Age through the emergence of the Atlantic World. Case studies include: the empires of Ghana and Mali, the Swahili Coast, Great Zimbabwe, Nok of Nigeria, and medieval Ethiopia. We also consider religious and spiritual transformation, including Islam in Africa, as well as the origins and effects of European contact, and the emergence of the transatlantic trade in enslaved human beings. Students examine these times and places through primary sources (such as cultural artifacts, visual representations, myths, and memoirs) which illuminate African perspectives on these different places and times. Assignments: oral presentations, document analyses, essays, and team projects.
Instructor(s): Staff
Terms Offered: Autumn
Equivalent Course(s): MDVL 10101, HIST 10101, CRES 20701

**ANTH 20702. Introduction to African Civilization II. 100 Units.**
This course examines the transformations of African societies in the long nineteenth century. At the beginning of the era, European economic and political presence was mainly coastal, but by the end, nearly the entire continent was colonized. This course examines how and why this process occurred, highlighting the struggles of African societies to manage internal reforms and external political, military, and economic pressures. Students examine these processes through various primary sources (such as visual and material sources, cultural artifacts, and personal accounts) that highlight African perspectives on these processes.
Instructor(s): Staff
Equivalent Course(s): HIST 10102, CRES 20802

**ANTH 20703. Introduction to African Civilization III. 100 Units.**
African Civilization III examines Africa and the African diaspora in the modern era. Topics may include the end of colonialism and decolonization, the legacies of slavery and its racial logics, identity and cultural expression, theories of personhood, gender and sexuality, migration, governance, and language. Readings vary widely, including primary sources by African and diasporic authors, social theory, and works of art and literature - written, spoken, and performed.
Instructor(s): Daly Samuel Fury Childs
Terms Offered: Spring
Prerequisite(s): This sequence meets the general education requirement in civilization studies.
Note(s): Taking these courses in sequence is recommended but not required.
Equivalent Course(s): HIST 10103, CRES 20303

**ANTH 21107. Anthropological Theory. 100 Units.**
Since its inception as an academically institutionalized discipline, anthropology has always addressed the relation between a self-consciously modernizing "West" and its various and changing "others." Yet it has not always done so with sufficient critical attention to its own concepts and categories - a fact that has led, since at least the 1980s, to considerable debate about the nature of the anthropological enterprise and its epistemological foundations. This course provides a brief critical introduction to the history of anthropological thought over the course of the discipline’s ‘long’ twentieth century, from the 1880s to the present. Although it centers on the North American and British traditions, we will review important strains of French and, to a lesser extent, German social theory in chronicling the emergence and transformation of ‘modern’ anthropology as an empirically based, but theoretically informed practice of knowledge production about human sociality and culture.
Instructor(s): Stephan Palmie
Prerequisite(s): Preference for Anthropology majors
ANTH 21420. Ethnographic Methods. 100 Units.
This course introduces students to the theory and practice of ethnographic methods. In the class, we will consider the ways ethnography works as both a mode of inquiry and a form of knowledge production. We will examine the kinds of questions anthropologists ask, as well as the relationship between research questions, methodological approaches, data analysis, and knowledge. We will examine the ways scholars marshal evidence to address their questions, and practically, how they arrive at that evidence. We will study different components of ethnographic fieldwork, such as participant observation, interviewing, photography, object analysis, archival work, digital methods, and qualitative surveys. In so doing, we will engage with the complexities surrounding ethnographic research, including how one negotiates access during fieldwork, the racialized and gendered subjectivities that inhere in fieldwork, the ethics of knowledge production, and the politics of representation. The class entails both critical engagement with scholarship, and practical exercises. The goal is to give students practical, theoretically grounded insights into fieldwork in order to help them understand how to develop and carry out a research project.

ANTH 21405. Neoliberalism, Self and Society. 100 Units.
Drawing on ethnography and cultural theory, this course examines the profound impact of neoliberal ideology on the everyday lives of individuals and communities across the globe. We will explore the ways neoliberalism, the idea that the mechanisms of free markets naturally precipitate economic growth and thus societal progress, shapes institutions, social norms, and, most importantly, individuals’ understandings of themselves and others. Students will analyze the penetration of market logics into spheres of social life far beyond what used to be understood as “the marketplace,” such as education, politics and governance, healthcare, and the family. They will reflect on the effects of market logics on lived realities, both in material and ideological terms. As unfettered global markets produce growing inequality and insecurity, neoliberal tenets valorizing competition and productivity tell those who suffer from and witness such negative effects that they are unavoidable; the result of some people working harder and being better than others. This course will question neoliberalism’s normative assumptions, drawing on ethnographic accounts of contemporary life in various regions and contexts across the globe. Students will end the course with an understanding of neoliberalism as an ideology and the ability to engage in discussions on neoliberalism that have emerged recently in the qualitative social sciences.

ANTH 21306. Explorations in Oral Narrative. 100 Units.
A study of storytelling in non-literate and folk societies, antecedent to the complexities of modern narrativity, itself anchored in and energized by literacy. The main objects of our study will be the vast body of folktales and collateral folklore collected by anthropologists and folklorists in traditional societies. Despite the impact of literacy on modern minds this course argues for the persistence of ancient themes, plots, characters and motifs. A further argument is made for the foundational role of storytelling in the creation of culture and construction of society …an argument, in short, that humans are, by nature, story-telling creatures whose sapience lies primarily in the capacity to create, be entertained by, and even live by, fictions. The central place of storytelling is shown in the humanistic and social sciences: anthropology, economics, history, philosophy, politics, psychoanalysis. Student story-telling and even performance, of brief stories is encouraged and reflected upon in light of the main arguments of the course.

ANTH 21303. Making the Natural World: Foundations of Human Ecology. 100 Units.
What’s natural about nature? Humans have “made” the natural world both materially, through millennia of direct action in and on the landscape, and conceptually, through the creation of various ideas about nature, ecosystem, organism, and ecology. In this course we will consider how the conceptual underpinnings of contemporary Western notions of nature, environment, balance, power and race are intertwined. We will trace this trajectory using the lens of the historical development of the field of ecology, then broaden our view to consider worldviews and ontologies about the environment from non-Western cultures. How then do these worldviews influence attitudes and policies towards land, environment, and its stewardship? Taking examples from current environmental topics (e.g. land rights, environmental justice, park access, conservation, extinction) we will evaluate the extent and character of human entanglement with the environment. Throughout the course student voices will be prominent in the many discussion-based class sessions.

ANTH 21201. Chicago Blues. 100 Units.
An examination of the Chicago blues genre as it became a central part of American urban culture. The course takes up questions of place, race, class, music, and the blues, considering the cultural, social, and political contexts of Chicago blues in historical and contemporary perspectives. The course considers the blues as a form of protest music and as a form of Black popular culture. The course considers also the original blues traditions in the Mississippi Delta region and in the urban South, in contrast with the Chicago scene.

ANTH 21203. Chicago Blues. 100 Units.
This course introduces students to the theory and practice of ethnographic methods. In the class, we will consider the ways ethnography works as both a mode of inquiry and a form of knowledge production. We will examine the kinds of questions anthropologists ask, as well as the relationship between research questions, methodological approaches, data analysis, and knowledge. We will examine the ways scholars marshal evidence to address their questions, and practically, how they arrive at that evidence. We will study different components of ethnographic fieldwork, such as participant observation, interviewing, photography, object analysis, archival work, digital methods, and qualitative surveys. In so doing, we will engage with the complexities surrounding ethnographic research, including how one negotiates access during fieldwork, the racialized and gendered subjectivities that inhere in fieldwork, the ethics of knowledge production, and the politics of representation. The class entails both critical engagement with scholarship, and practical exercises. The goal is to give students practical, theoretically grounded insights into fieldwork in order to help them understand how to develop and carry out a research project.

Note(s): The course qualifies as an Introductory Level selection for Anthropology majors. (Cap 30)
Equivalent Course(s): CHST 21201
Instructor(s): Kathryn Takabvirwa
Prerequisite(s): Priority to Anthro Majors, Priority to Junior/Senior Standing

ANTH 21424. Reading and Writing Ethnographically. 100 Units.
Ethnographic renderings of spaces, surroundings, place, setting, and location have clearly always functioned as more than narrative set dressing. Critical perspectives on ethnographic research and writing have pointed out the authorization, exotification, and material conditions of mobility that undergird the ‘where’ in ‘being there’. However, contemporary anthropologists are writing space and place in ways that push ethnographic methods and writing past prior problematics and paradigms of comparison, localization, and totalizing description. How does space become an ethnographic doorway into questions of history, power, infrastructure, and affect? Instructor(s): Kamala Russell

ANTH 21426. More than Human Ethnography. 100 Units.
In this course we explore the growing fields of more-than-human and ‘multispecies’ ethnography. We will examine theoretical antecedents promoting the inclusion of non-human social actors in ethnographic analysis and read many examples of such work, including foundational texts on interspecies engagements, exploitations, and dependencies by Deborah Bird Rose, Kim Tallbear, Eduardo Kohn, Anna Tsing, and Augustin Fuéntes among many others. We will consider the role other species and ‘actants’ played in early social science work and contemplate recent studies of ‘becoming with’ other animals, plants, fungi, bacteria–encountering complex ecological kin relationships, examining natural-cultural borders, and querying decolonial legacies and the role of ecosocialist thought and queer ecologies in the ‘more-than’ turn. Multispecies and posthumanist approaches encourage a decentering of traditional methodologies; we will thus couple ethnographic examples with literature by geographers, biologists, and philosophers. The course is a discussion-based seminar, with significant time devoted to understanding the logistical or methodological aspects of ‘more than’ work-to-querying how such studies have been conducted in practice. The final paper in the course will take the form of an exploratory essay (ethnographic, historical, or theoretical) based on data and observations collected during previous weeks. Instructor(s): Wilhoit, Mary Terms Offered: Spring Winter
Equivalent Course(s): MAPS 31404, ANTH 33807, GNSE 31404, KNOW 32404, GNSE 21404, CEGU 21426

ANTH 21428. Apes and Human Evolution. 100 Units.
This course is a critical examination of the ways in which data on the behavior, morphology, and genetics of apes have been used to elucidate human evolution. We emphasize bipedalism, hunting, meat eating, tool behavior, food sharing, cognitive ability, language, self-awareness, and sociability. Visits to local zoos and museums, film screenings, and demonstrations with casts of fossils and skeletons required.
Instructor(s): Russell Tuttle
Prerequisite(s): BIOS 10130 or BIOS 10140. NO BIOLOGICAL SCIENCES MAJORS OR NON-BIOL-OGY PRE-MED STUDENTS, except by petition. Preference to 3rd and 4th year Anthropology Majors.
Equivalent Course(s): ANTH 38600, EVOL 38600, BIOS 13253, HIPS 21428

ANTH 21740. Ecology and Governance in Israel and the Middle East. 100 Units.
Ecological governance has emerged as an aspirational concept in recent years in political science, philosophy, and anthropology in response to concerns over the increasing likelihood of an unprecedented global ecological crisis as a result of human driven climate change. This course will trace the conceptual genealogy of ecological governance in Western and Eastern political theory and environmental history as it explores the political ecologies of Israel and the Middle East. In so doing, the course embarks from the assertion that environmental justice and the struggle for justice overall are inseparable challenges. Of central concern will be to understand how Israel’s politics, culture, and history technological development together with its particular environmental conditions provide conceptual and methodological interventions into current and historical articulations of ecological governance. Note: Enrollment in this class is by consent only. Please request via the enrollment site. Instructor(s): Michael Fisch
Equivalent Course(s): CEGU 21740

ANTH 22020. Alternative Feminisms: Gender, Agency, and Liberation in the Middle East. 100 Units.
This course critically examines gender, agency, and liberation in the Middle East. The course will begin with a discussion of human agency, its relation to sociocultural context, and the feminist literature on the issues of agency, resistance, and liberation. Then, we will explore these relationships in non-Western contexts by drawing examples from Turkey, Iran, and Northern Syria. In the cases of Turkey and Iran, we will focus on the feminist movements and women’s collective actions for the right to wear and take off the headscarf. In the case of Northern Syria, we will explore the agencies of Kurdish female guerrillas and their conceptions of empowerment. In each case, we will focus on the moral and ethical principles that guide women’s choices and trace their sociohistorical foundations.
Instructor(s): S. Numanbayraktarolu Terms Offered: Autumn
Note(s): Catalog content areas: 3, C
Equivalent Course(s): ANTH 32020, NEHC 22020, GNSE 32020, CHDV 22020, CHDV 32020, GNSE 23159, NELC 32020

ANTH 22111. Black Death. 100 Units.
Karla FC Holloway proposes the concept of “black death,” arguing that “African Americans’ particular vulnerability to an untimely death in the United States intimately affects how black culture both represents itself and is represented.” Whether attributable to Holloway or not, the term ‘Black death’ circulates in scholarship,
popular media, and political discourses arguably because it apprehends a commonsensical, albeit unfortunate, understanding of the relationship between death and Black people. This seminar-style course surveys death as an object of inquiry, metaphor, political occasion, and inspiration for aesthetic creation. The course is primarily Black Studies in its frameworks and subject matter—reading texts and other materials across disciplines, genres, and media. The course recognizes that the threads of race and death are inherently global and connected to European colonial imperial expansion, racism, capitalism, and modernity. Throughout the course we ask: What is the relationship between Black people or blackness and death? Is “Black death” unique? How do we take seriously ubiquitous legacies of violence while also accounting for socio-historical specificity? What are the attendant practices, creations, and modes of thinking and being associated with Black death? At the end of the course, students will have honed skills in close reading, critical thinking, and thoughtful discussion through the study of race and death.

Instructor(s): LaShaya Howie
Terms Offered: Spring
Prerequisite(s): This is an advanced level course; students should have taken at least one course introductory critical race theories course prior to enrolling.
Equivalent Course(s): CRES 22111

ANTH 22131. The Science, History, Policy, and Future of Water. 100 Units.
Water is shockingly bizarre in its properties and of unsurpassed importance throughout human history, yet so mundane as to often be invisible in our daily lives. In this course, we will traverse diverse perspectives on water. The journey begins with an exploration of the mysteries of water’s properties on the molecular level, zooming out through its central role at biological and geological scales. Next, we travel through the history of human civilization, highlighting the fundamental part water has played throughout, including the complexities of water policy, privatization, and pricing in today’s world. Attention then turns to technology and innovation, emphasizing the daunting challenges dictated by increasing water stress and a changing climate as well as the enticing opportunities to achieve a secure global water future.

Instructor(s): Seth Darling
Terms Offered: Winter
Prerequisite(s): None
Equivalent Course(s): MENG 20300, HIST 25426, ENST 20300, HIPS 20301, GLST 26807

ANTH 22165. Politics of Technoscience in Africa. 100 Units.
Euro-American discourse has often portrayed Africa as either a place without science and technology or as the home of deep and ancient wisdom. European imperialists used the alleged absence of science and technology as a justification for colonialism while pharmaceutical companies sought out African knowledge about healing plants. In addition to their practical applications, science and technology carry significant symbolic weight in discussions about Africa. In this class, we examine the politics of scientific and technical knowledge in Africa with a focus on colonialism and its aftermath. How have different people produced and used knowledge about the environment, medicine, and technology? What kinds of knowledge count as indigenous and who gets credit for innovation? How have independent African governments dealt with the imperial legacies of science? From the interpretation of archaeological ruins to the design of new medical technologies, this class will examine science and technology as political practice in Africa.

Instructor(s): Constantine Nakassis
Terms Offered: Winter
Prerequisite(s): None
Equivalent Course(s): ANTH 32202, CRES 22111
ANTH 22450. Language, Gender, and Sexuality. 100 Units.
This course focuses on the relationship, in theory and in practice, between language, gender, and sexuality. We begin with a brief overview of the field and some of its major theoretical developments. Then we expand on themes of desire and identity; binaries and normativities; embodiment; "interstices"; and performativity. The practical component of the course includes critical analysis of language used to construct gender and sexuality (e.g. in drag shows, communities you belong to personally, social media, and current events). We also consider binary language reform, abolition of linguistic gender systems, and emergence of identity categories as practices of everyday relationality that contest hegemonic systems. Readings are interdisciplinary and draw from fields including Linguistics, Anthropology, Performance Studies, Literary Studies, and Queer Studies. Equivalent Course(s): LING 22450, GNSE 20119

ANTH 22531. Visual Anthropology: An Introduction to Ethnography as Film. 100 Units.
This seminar introduces students to Visual Anthropology through a survey of film as an instrument and object of ethnographic practice. Specifically, it explores ethnographic film as a genre for representing "reality," anthropological knowledge and distinct cultural lives. We will examine how ethnographic film and its protocinematic precedents (e.g., the panorama, the magic lantern) emerged in particular intellectual and political economic contexts as well as how subsequent conceptual and formal innovations in audiovisual production, including recent digital transformations, have shaped the genre. We will also consider social responses to ethnographic film in terms of 1) the contexts for producing and circulating these works, 2) the ethical and political concerns raised by cross-cultural representation and 3) the development of indigenous media and other practices in conversation with ethnographic film. Throughout the course, we will situate Visual Anthropology within the larger anthropological project for representing "culture," addressing the status of ethnographic film in relation to other documentary practices including written ethnography, museum exhibitions, photography, documentary film, graphic illustrations ('manga' ethnography), and new digital forms of engagement (Web 2.0, interactive gaming, augmented & virtual reality). Besides film screenings and writing exercises, students will have an opportunity to develop and "pitch" their own original Visual Anthro project. Instructor(s): Julie Y. Chu
Note(s): Primarily for undergraduates; others only with consent of instructor Equivalent Course(s): ANTH 32531

ANTH 22547. Violence: Vigilantism, Community Defense, and Armed Resistance. 100 Units.
This course explores extralegal violence primarily in the US, from decolonial struggles to white mobs to self and community defense by marginalized peoples. How do we understand different forms of violence, defense, and resistance in relation to the violence of the state? What role does violence play in struggles for justice and freedom? This seminar surveys a range of social science approaches to these questions. In addition to reading the work of anthropologists, historians, and philosophers, we will also take up these themes as they appear in popular media and current events. Equivalent Course(s): ANTH 32547, HIST 27907, RDIN 20900, RDIN 30900, CRES 22900

ANTH 22625. Indigenous Movements in Latin America. 100 Units.
TBD
Instructor(s): Mareike Winchell

ANTH 22710. Signs and the State. 100 Units.
Relations of communication, as well as coercion, are central though less visible in Weber’s famous definition of the state as monopoly of legitimate violence. This course reconsiders the history of the state in connection to the history of signs. Thematic topics (and specific things and sites discussed) include changing semiotic technologies; means; forces and relations of communication (writing, archives, monasteries, books, "the" internet); and specific states (in early historic India and China, early colonial/revolutionary Europe, especially France, Britain, and Atlantic colonies, and selected postcolonial "new nations").
Instructor(s): J. Kelly Equivalent Course(s): ANTH 41810

ANTH 22712. Socialisms in Asia. 100 Units.
Western ideas about "actually existing" socialism are dominated by the failures and tyranny of the Soviet bloc. But decolonizing Asia may have a different story to tell. Tracking revolutionary information technology, new statistical and social sciences, and cybernetic techniques for governance entering into Asia in the era of decolonization, partitions and the Bandung Conference, this course reconsiders plural possible socialisms, not based on earlier European histories in which the ends exceeded the means, but on later Asian histories. These are not so much histories of self-determination and worldmaking, as scientific and social, self and world refashioning. This course is intended to be of interest to any student interested in the applying techniques of science and technology studies to the history of social science, interested in the history of applied science outside the west, and/or in Asian decolonization, and/or in the past, present, and future of socialism.
Instructor(s): John D. Kelly Equivalent Course(s): ANTH 41812

ANTH 22727. Captivity. 100 Units.
The premise for this course is that anthropology, as well as other domains of social inquiry, have unacknowledged and unredeemed debts to captivity as structure, experience, and event, from the penal colony
to the slave plantation. This course is an attempt to begin to think about those debts through readings in anthropology, history, and philosophy.

Instructor(s): Darryl Li
Prerequisite(s): Open only to 3rd and 4th year students in the College, with some preference for majors in Anthropology & LLSO.
Note(s): Advanced undergraduate seminar.
Equivalent Course(s): LLSO 29703

ANTH 22733. Marxism, Anarchism, and the Black Radical Tradition. 100 Units.
This course serves as an introduction to Black Radical Tradition as an insurgent political formation and intellectual practice. While many genealogies of Black Studies depart from the formal institutionalization of Black Studies departments and programs in the latter half of the 20th Century, this course is differently attuned to the dialectic of Black thought and Black insurgency in which the latter-what C.L.R. James describes as a history of Pan-African revolt against the plantation and its afterlives-is always a precondition of the former. As a critical survey of said histories and the ideas derived from them, this course will examine the relationship between knowledge production (theory) and material struggle (praxis) in the Black Radical Tradition alongside adjacent but distinct political traditions such as Marxism and anarchism. Born out of a protracted “state of emergency,” the Black Radical Tradition permits us to appraise, critique, and confront the alarms raised by the COVID-19 pandemic and global climate collapse alongside settler colonialism and plantation slavery in the longue duree.
To this end, students will consult non-fiction, literature, art, and film from authors and creators such as James, Audre Lorde, Lizzie Borden, W.E.B. Du Bois, Josina Machel, Kimathi Mohammed, and Lorenzo Ervin.
Instructor(s): Ryan Jobson
Equivalent Course(s): CRES 21733

ANTH 22750. Theoretical Approaches to Political Anthropology: Sovereignty, Authority, and Refusal. 100 Units.
This course will explore understandings of power and its production articulated by ethnographers and political theorists whose work has been influential in anthropology. We will focus on competing claims to sovereignty and authority that reveal the tentative, emergent, and contingent nature of power. Spanning various regions, the course content will elucidate the tensions between nation-states, informal/legal networks, and the actions and aspirations of individual subjects. Some of the questions we will raise include: What are the roles of performances, narratives, and acts of exclusion and violence in the making of sovereignty and authority? How are competing de facto and de jure forms of power negotiated in various spaces ranging from the institutional to the intimate? The centrality of both physical violence and the complacency born of naturalized political institutions and economic rationality will arise in our examinations of political mobilization and possibility. This course will give students opportunities to develop conceptual understandings of various modes of power that offer insights into the forces of colonialism, global interconnectivity, and politics that shape the 21st century world. As this is a methodology course (fulfilling the MAPSS requirement), students will spend substantial class time reflecting upon the theoretical approaches of contemporary ethnographers and developing their own theoretical approaches to their thesis projects.
Instructor(s): Gross, Victoria
Equivalent Course(s): ANTH 34725, MAPS 34513

ANTH 22755. The Idea of Africa. 100 Units.
The Idea of Africa, a new interdisciplinary course, offers undergraduates students an opportunity to engage critically with key philosophical and political debates about contemporary Africa on the continent and globally. The course takes its title from V.Y. Mudimbe’s 1994 book which builds on his earlier work The Invention of Africa. It asks three questions: (1) How and to what purposes has Africa been conceived as metaphor and concept. (2) How might we locate Africa as a geographic site and conceptual space to think through contemporary debates about citizenship, migration and new structures of political economy? (3) What futures and modes of futurity are articulated from the space and metaphor of Africa? This lecture course co-thought in an interdisciplinary mode will include public guest lectures, field trips, and engagement with visual arts, and film related to the themes of the course. The course will be divided into the following four sections: 1) Inventing Africa; 2) Political Trajectories; 3) Afro-Mobilities; 4) Afro-Futures.
Instructor(s): Natasha Nsabimana & Adom Getachew
Note(s): Cap 50
Equivalent Course(s): PLSC 22755, CRES 23755

ANTH 22765. Ethnographic Approaches to Power and Resistance. 100 Units.
This introductory graduate course will examine understandings of power articulated by influential political theorists and ethnographers. We will explore key theoretical concepts, including discipline, governmentality, sovereignty, hegemony, agency, and resistance, as well as their application within textured, intersubjective, and affectively oriented ethnographic texts. Seeing power grounded in tentative and unstable practices, we will focus on the tensions between nation-states, informal networks, and the actions and aspirations of individual subjects. How are attempts to consolidate power articulated in performances, narrative histories, and acts of exclusion and violence? How are competing de facto and de jure powers negotiated in various spaces ranging from the institutional to the intimate? The centrality of both physical violence and the complacency born of the naturalized hegemony of political institutions and economic rationality will arise in our examinations of political mobilization and possibility. This course will give students opportunities to develop conceptual understandings
of various modes of power that offer insights into the forces of colonialism, global interconnectivity, and violence that shape the 21st century world.

Instructor(s): Victoria Gross
Terms Offered: Spring
Equivalent Course(s): ANTH 34730, MAPS 31504

ANTH 22770. Anthropology of Power, Status, and Performance. 100 Units.
This introductory graduate course examines the nature of power and status through the theoretical lens of performativity. We will engage with notions of performativity, articulated by influential theorists of linguistics, gender, and religion, that demonstrate the abilities of performances to effect change in the world. Thinking with performativity, we will interrogate practices of negotiating power and status in a broad range of social, political, and geographical contexts. How is the power made and unmade through particular acts? How is status, a particular type of power differentiation, created collectively and individually through acts of saying and doing? Such questions will animate our explorations of power and status in recent ethnographies focused on Asia, the Americas, and Europe.

Instructor(s): Kathryn Takabvirwa
Equivalent Course(s): ANTH 34735, GNSE 22770

ANTH 22826. The Anthropology of Commodities and Consumption. 100 Units.
What is a commodity, and what does it mean to consume one? In this discussion-based, reading- and writing-intensive seminar, we will explore “consumption” and the “commodity” as objects of anthropological analysis. Drawing from a range of global ethnographic examples, as well as from popular culture, literature, and other academic fields, we will think critically about everyday practices that are so often taken for granted. We will investigate the complex relationships that people make with everyday things and the roles they play in social life; how commodities can produce and reproduce social relationships and materialize claims about identity or status; fashion and its relationships to capitalism, gender, and appropriation; political and ecological aspects of consumption; and more. In doing so, we will attend to and practice some key approaches to doing anthropology, including ethnographic interviewing, observing, media ethnography, writing field notes, and turning them into a text. Students will write three short papers, describing the “biography” of an object, analyzing consumption in a popular culture “text,” and writing up original ethnographic data. The final project, developed through these exercises, instructor feedback, and peer workshops, will be a creative analysis of a contemporary consumption phenomenon of students’ choice.

Instructor(s): Hanna Pickwell

ANTH 22830. Indigenous Media and the Politics of Representation. 100 Units.
This undergraduate seminar explores popular representations of Indigenous nations and issues across various modes of media such as film, photography, digital platforms, and museum installations. With a particular focus on media forms produced by Indigenous artists, filmmakers, and curators we will analyze these narratives through frameworks of self-determination, resistance, visual sovereignty, and relational futures. Throughout the course, we will consider Indigenous media production(s) in relation to the broader social, historical, and cultural contexts in which they circulate in North America and beyond. The material covered in this course will acquaint students with an introduction to the contemporary debates surrounding Indigenous media and representation as they intersect with the larger fields of visual anthropology and Indigenous Studies.

Instructor(s): Teresa Montoya
Equivalent Course(s): CRES 23830, MAAD 12830

ANTH 22845. Xenophobia and the Politics of Belonging. 100 Units.
What work does xenophobia do in the making and marking of nation-states? What does it mean to belong, in a world structured by migration? In this course, we will examine the practices and politics of exclusion, of othering and of unbelonging. Drawing on cases from North America and Sub-Saharan Africa, we will study xenophobia at different points along its spectrum of intensity - from mass atrocities to the seemingly banal ways in which othering and exclusion are baked into everyday life. We will study each case in depth in its own right, as well as how it sits within broader experiences of exclusion and violence around the world and across time. In the course, we will explore theoretical debates surrounding nativism, autochthony, and different forms of nationalism, and the ways they relate to xenophobia. Scholars of migration and belonging have long shown that collective identities are constructed in large part in relation to an external other. Does (one person’s) belonging necessitate (another’s) unbelonging? In this course we ask: how does the ‘stranger’ come to be seen as threatening or destabilizing? How does one come to be seen as a ‘stranger’?

Instructor(s): Kathryn Takabvirwa
Equivalent Course(s): CRES 22845

ANTH 22003. Greater Latin America. 100 Units.
What is “Latin America,” who are “Latin Americans” and what is the relationship among and between places and people of the region we call Latin America, on the one hand, and the greater Latinx diaspora in the US on the other? This course explores the history of Latin America as an idea, and the cultural, social, political and economic connections among peoples on both sides of the southern and eastern borders of the United States. Students will engage multiple disciplinary perspectives in course readings and assignments and will explore Chicago as a crucial node in the geography of Greater Latin America. Some topics we will consider are: the origin of the concept of “Latin” America, Inter-Americanism and Pan-Americanism, transnational social movements and intellectual exchanges, migration, and racial and ethnic politics.
ANTH 23077. Indigenous Politics in Latin America. 100 Units.
This course examines the history of Indigenous policies and politics in Latin America from the first encounters with European empires through the 21st Century. Course readings and discussions will consider several key historical moments across the region: European encounters/colonization; the rise of liberalism and capitalist expansion in the 19th century; 20th-century integration policies; and pan-Indigenous and transnational social movements in recent decades. Students will engage with primary and secondary texts that offer interpretations and perspectives both within and across imperial and national boundaries.

ANTH 23094. Development and Environment in Latin America. 100 Units.
Description: This course will consider the relationship between development and the environment in Latin America and the Caribbean. We will consider the social, political, and economic effects of natural resource extraction, the quest to improve places and peoples, and attendant ecological transformations, from the onset of European colonialism in the fifteenth century, to state- and private-led improvement policies in the twentieth. Some questions we will consider are: How have policies affected the sustainability of land use in the last five centuries? In what ways has the modern impetus for development, beginning in the nineteenth century and reaching its current intensity in the mid-twentieth, shifted ideas and practices of sustainability in both environmental and social terms? And, more broadly, to what extent does the notion of development help us explain the historical relationship between humans and the environment?

ANTH 23101-23102-23103. Introduction to Latin American Civilization I-II-III.
Taking these courses in sequence is not required. This sequence meets the general education requirement in civilization studies. This sequence is offered every year. This course introduces the history and cultures of Latin America (e.g., Mexico, Central and South America, and the Caribbean Islands).

ANTH 23101. Introduction to Latin American Civilization I. 100 Units.
Autumn Quarter examines the origins of civilizations in Latin America with a focus on the political, social, and cultural features of the major pre-Columbian civilizations of the Maya, Inca, and Aztec. The quarter concludes with an analysis of the Spanish and Portuguese conquest, and the construction of colonial societies in Latin America. The courses in this sequence may be taken in any order.

ANTH 23102. Introduction to Latin American Civilization II. 100 Units.
Winter Quarter addresses the evolution of colonial societies, the wars of independence, and the emergence of Latin American nation-states in the changing international context of the nineteenth century.

ANTH 23103. Introduction to Latin American Civilization III. 100 Units.
Spring Quarter focuses on the twentieth century, with special emphasis on the challenges of economic, political, and social development in the region.

ANTH 23335. Racial France. 100 Units.
Over the last two decades, questions of race, racial identity, and racial discrimination have come increasingly to the fore in France, despite (or because of) the country’s prevailing rhetoric of colorblind indivisibility. These issues are becoming ever more pressing on a background of intensifying racisms and right-wing populisms in Europe. The purpose of this course is to offer analytical perspectives about these critical tensions and their ripples across the landscape of contemporary French politics. Using readings from a wide variety of fields (among others, anthropology, sociology, literature, philosophy, history, political science, and news media), we will unpack the discourses and lived experiences of race that have shaped the politics of national identity and difference in France since the late 18th century. We will see that the question of ‘racial France’ has been intimately bound up with the country’s history of colonialism and decolonization, with its Republican ideology, with matters of law and government, with questions of citizenship, religion and sexuality, with recent debates on multiculturalism, and with white malaise and resentment stirred by the growth of right-wing extremisms. 
the course of our examinations, we will also reflect on the specificity of race and racialization in France, and its
differences from racecraft in the United States.
Instructor(s): Francois Richard Terms Offered: TBD
Equivalent Course(s): CRES 23335, FREN 23335, ANTH 33335, FREN 33335

ANTH 23405. War: What’s It Good For? 100 Units.
War is a destructive force, but also an incredibly productive one in the transformation and reconfiguration of
social relations. This course will explore war’s presences and absences in social and political thought as well as
ethnographies that examine the mutually reconstitutive relationships between war and society.
Instructor(s): Darryl Li Terms Offered: TBD

ANTH 23501. New Perspectives on Language Emergence. 100 Units.
This course will investigate anthropological and linguistic perspectives on language emergence, as well as
language change and its impact on social, cultural, and economic aspects of society.
Instructor(s): Diane Brentari & Terra Edwards Terms Offered: Autumn. Meeting Mondays from 1:30p until 4:20p
Prerequisite(s): One Linguistics course and one Anthropology course are recommended. Consent of instructor
required.
Note(s): Consent of instructor required; To be admitted, please email Professors Brentari and Edward a
paragraph-long description about what you bring and what you hope to get out of this seminar.
Equivalent Course(s): COGS 22008, CDIN 33500, LING 33500, ANTH 33501, CDIN 23500, CHDV 23500, LING
23501, CHDV 33500

ANTH 23510. Ethics of Ethnographic Encounter. 100 Units.
How can anthropological perspectives help us rethink issues of current global concern? We will be attending to
critiques of ethnographic method: calls to decolonize the discipline, demands to make it more collaborative. At
that level, we will be exploring how anthropology as a distinctive way of engaging the world, and how the ethos of
ethnography sits with the difference between scholarship and activism. At the same time, we will be considering
what kind of light anthropology can shed on present-day problems such as the politics of indigeneity, scientific
authority, environmental crisis, and interspecies relations.
Instructor(s): William Mazzarella Terms Offered: TBD

ANTH 23608. Introduction to Asian American Studies. 100 Units.
This course seeks to examine the historical context and pragmatic implications of the ethnopolitical category
"Asian American." How has this category invented or domesticated norms of Asianness even as it elides, or
seeks to merge, intra-ethnic and geopolitical tensions? What is the nature of the relationship between "Asia" and
"America," and how does being "Asian American" regent transnational relations and the politics of identity?
Discussions will cover the Chinese Exclusion Act, Japanese internment camps, the Korean and Vietnam wars,
affirmative action debates, model minority and perpetual foreigner tropes, as well as responses to COVID-19.
How does Asian Americanness inform approaches to race and ethnicity? In other words, what difference does it
make? Through the works of Mae M. Ngae, Rey Chow, Dorinne Kondo, Yến Lê Espiritu, Jasbir Puar, Jodi Kim,
and others, students will be introduced to a variety of ways forward.
Instructor(s): Alice Yeh Terms Offered: Winter
Equivalent Course(s): HIST 28001, GLST 20004, CRES 20004

ANTH 23616. Central Asia Past and Present/From Alexander the Great to Al Qaeda. 100 Units.
Central Asia Past and Present serves as a multi-disciplinary course, spanning anthropology, history and political
science. This course introduces students to the fluid, political-geographic concept of Central Asia as well as
to the historical and cultural dimensions of this particular and oft-redefined world. My understanding of
Central Asia comes from studies of ex-Soviet Central Asia, which includes five independent countries (since
1991) within central Eurasia—the former U.S.S.R. Thus the course encompasses Kazakhstan, Kyrgyzstan,
Tajikistan, Turkmenistan, and Uzbekistan in addition to parts of northern Iran, Afghanistan, Pakistan, India, and
western China (Xinjiang/Sinkiang). Students will familiarize themselves with universal and divergent factors
among the Central Asian peoples based on phenomena such as human migrations, cross-cultural influences,
historical events, and the economic organization of peoples based on local ecology and natural boundaries.
Working together and as individuals, we will study maps and atlases to gain a fuller understanding of historical
movements and settlements of the Central Asian peoples.
Instructor(s): R. Zanca
Equivalent Course(s): ANTH 32206, NEHC 20160, NEHC 30160
ANTH 23700. Capitalism, Colonialism, and Nationalism in the Pacific. 100 Units.

This course compares colonial capitalist projects and their dialogic transformations up to present political dilemmas, with special attention to Fiji, New Zealand, and Hawai’i, and a focus on the labor diaspora, the fates of indigenous polities, and tensions in contemporary citizenship. We will compare Wakefield’s “scientific colonization” in New Zealand, Gordon’s social experiments and indentured labor in Fiji, and the plantations, American annexation, tourism, and the military in Hawai’i. We will compare the colonial experiences of the Maori, Hawaiians, and indigenous Fijians, and also those of the immigrant laborers and their descendants, especially white New Zealanders, the South Asians in Fiji, and the Japanese in Hawai’i. General propositions about nationalism, capitalism “late” and otherwise, global cultural flows, and postcolonial subject positions will be juxtaposed with contemporary Pacific conflicts.

Instructor(s): John Kelly
Equivalent Course(s): CRES 23710, CRES 33700, ANTH 33700

ANTH 23803. Magical Politics. 100 Units.

Following Donald Trump’s election to the presidency in 2016, witches all over North America collaborated on spells to resist him and his politics by ‘binding’ his administration. Alt-right activists had already for some time been engaged in ‘meme magic’ against Trump’s liberal critics. How can we begin to understand these magical interventions in present-day politics? Rather than presuming that ‘magical politics’ is a fringe or crackpot phenomenon, this class draws on activist, esoteric, and academic materials to suggest that our thinking about everyday life and ordinary politics can be fundamentally enlivened and enhanced by taking ‘magic’ seriously.

Instructor(s): William Mazzarella
Terms Offered: TBD

ANTH 23807. Toxic: Body Burdens and Environmental Exposures. 100 Units.

Toxicity is a pervasive and often elusive presence in our lives today. In this seminar class, we begin to address this condition by asking: what exactly is toxic? Who bears the burden of this classification? And, how then, are these understandings of toxicity defined and deployed in broader historical, political, and scientific contexts? From these preliminary questions, we explore the pathways through which toxic exposure, contamination, and fallout accumulates in disproportionate and uneven ways, especially for minoritized populations and upon Indigenous territories. Drawing upon a variety of social science literature and community-based research we trace these challenges through overlapping structures of race, class, gender, citizenship, and coloniality. This transnational and interdisciplinary orientation will acquaint students with case studies of exposure across different scales and geographies, from Chernobyl to Chicago. Through mixed approaches of ethnography and media curation, students will also have the opportunity to research and document their own cases studies of body burdens and environmental exposure.

Instructor(s): Teresa Montoya
Equivalent Course(s): CRES 23807, HLTH 23807, ENST 23807

ANTH 23809. Visualization and Biology: Science, Culture, and Representation. 100 Units.

How do scientific images get made? This deceptively simple question lies at the heart of this course. Over three weeks at the MBL, we will examine the techniques, technologies, philosophies and histories of scientific image making, with a particular focus on marine biology. Rather than simply reading theories of visualization and representation, students will immerse themselves in the making of images themselves. Students will perform hands-on work with historical and contemporary theories and techniques of microscopy, taxonomy, anatomy, and specimen collecting. They will also examine the theoretical, philosophical, and ethical underpinnings of those practices. Through a combination of ethnographic (participant observation) and historical (archival) work, students will develop rich accounts of scientific visualization - from matters of objectivity and instrumentmentation, to problems of vision and the limits of (human) senses, to questions of aesthetics, abstraction, and representation. During the course, students will have the opportunity to work with Marine Biological Laboratory faculty, have access to laboratory and archives, and will develop new data and novel accounts of the social, cultural, and technical creation of scientific images.

Instructor(s): Michael Paul Rossi
Terms Offered: Autumn
Prerequisite(s): Consent Only.

Note(s): Consent Only. Course meets for three weeks, 9/9 thru 9/27 (5-6 days/week, 8 hours per day), at Marine Biological Laboratories, in Woods Hole Massachusetts. Course will be part of Autumn quarter course load. For more information see http://college.uchicago.edu/academics/mlb-september-courses
Equivalent Course(s): ENST 25111, HIST 14904, HIPS 15100

ANTH 23816. Farms as Factories: Industrial Ideals in ‘Modern’ Agriculture. 100 Units.

Plants and animals are now produced in capital-intensive, factory-like settings. The industrialization of agriculture has not only transformed what we eat, but also the ecology of the globe and biology of its inhabitants. This course explores the logics, history, and consequences of an agricultural sector that simultaneously generates lagoons of pig manure, proprietary DNA, and monocropped landscapes. How does commoditizing wheat alter its value? How do pigs to change when they live their lives on concrete? What forms of care are needed to keep antibiotic-laden chickens alive? How does the industrial production of life rearrange ‘modern’ concepts of nature? The course situates these questions within a broader framework of capitalism and commoditization; we begin by studying the rationale of proto-industrial production on slave plantations, consider the results of agricultural ‘modernization’ in the 19th and 20th centuries, and analyze how social scientists have studied these
processes. Then, we examine how agricultural products - plants and animals - have been physically altered to facilitate standardized production, and study how these shifts have changed the role of workers and social milieu of agrarian labor. In addition to contextualizing modern agricultural production, this class is an introduction to animal and plant studies, theories of capitalism and commodification, and environmental studies.

Instructor(s): Sandy Hunter
Terms Offered: Autumn
Equivalent Course(s): ENST 23645

ANTH 23825. Social Theory of the City. 100 Units.
This seminar explores various historical, sociological and anthropological theories of cities. The course analyzes major theoretical frameworks concerned with urban forms, institutions and experience as well as particular instances of city development from pre-modern to contemporary periods. The seminar will consist of initial orienting lectures, discussion of selected texts concerned with social theories of the city, and presentation of research projects by class participants.

Instructor(s): Alan L. Kolata
Prerequisite(s): Admission to the Paris Program
Note(s): Undergraduates only
Equivalent Course(s): ENST 23825, ARCH 23835

ANTH 23906. Magic, Science, and Religion. 100 Units.
The relationship between the categories of magic, science, and religion has been a problem for modern social science since its inception in the nineteenth century. In the first half of this course, we will critically examine some of the classical and contemporary approaches to these concepts. In the second half, we will explore a number of detailed historical and ethnographic studies about modern phenomena that call some of the fundamental assumptions behind these categories into question.

Instructor(s): Alireza Doostdar
Equivalent Course(s): KNOW 28900, AASR 30501, HLTH 28900, RLST 28900

ANTH 23908. Religion and its "Other": Secular and Post-Secular Formations. 100 Units.
How do we locate religion? What is a secular space? Are we somehow beyond secularism? This course provides an introduction to the relationship between religion and the secular as it has been conceived in the modern West. It is intended to provide students with a basic historical and theoretical framework for thinking about how these categories relate, how they have evolved, and the work they do in our contemporary society. Readings will include works by Hermann Cohen, Louis Dupré, Charles Taylor, Michel Foucault, Bruno Latour, Judith Butler, Talal Asad, and Saba Mahmood.

Instructor(s): Lisa Hedrick
Terms Offered: Winter
Equivalent Course(s): RLST 29015

ANTH 23910. Holocaust Object. 100 Units.
In this course, we explore various ontological and representational modes of the Holocaust material object world as it was represented during World War II. Then, we interrogate the post-Holocaust artifacts and material remnants, as they are displayed, curated, controlled, and narrated in the memorial sites and museums of former ghettos and extermination and concentration camps. These sites which-once the locations of genocide-are now places of remembrance, the (post)human, and material remnants also serve educational purposes. Therefore, we study the ways in which this material world, ranging from infrastructure to detritus, has been subjected to two, often conflicting, tasks of representation and preservation, which we view through a prism of authenticity.

In order to study representation, we critically engage a textual and visual reading of museum narrations and fiction writings; to tackle the demands of preservation, we apply a neo-materialist approach. Of special interest are survivors’ testimonies as appended to the artifacts they donated. The course will also equip you with salient critical tools for future creative research in Holocaust studies.

Instructor(s): Bozena Shallcross
Terms Offered: TBD
Equivalent Course(s): JWSC 29500, AASR 30500, HLTH 28900, RLST 28900

ANTH 23911. Anthropology of Religion. 100 Units.
How do anthropologists study religion? This course is an introduction to classic concepts that have defined the social scientific study of religion such as ritual, taboo, transcendence, embodiment, and enchantment. To grasp how fieldwork is paired with theory, we will engage ethnographic writings on Orthodox Christianity in northern Ethiopia, Afro-Caribbean Santería in Chicago, and Islamic jinn veneration in Delhi India. We will further examine various themes in the socio-cultural inquiry of contemporary religion including asceticism, sexuality, sectarianism, and political theology.

Instructor(s): A. Heo
Terms Offered: Winter
Equivalent Course(s): AASR 34411, RLST 27650

ANTH 23914. Whom am I to Judge? Relativism and Religious Difference. 100 Units.
How do we evaluate people who are different from us? What grounds our evaluation of human behaviors or beliefs? At the end of the 20th century, comparative analyses of religious beliefs and ethics were heavily criticized for their ethnocentric tendencies; researchers were blamed for importing their own values on the "other". More recently, however, the pendulum seems to have swung in the other direction. Comparative religious ethicists often adopt a brand of liberal moral relativism. "To each their own" is their preferred mantra. This dramatic swing within the field of comparative religious ethics opens up questions for future study: Under what conditions can we praise or blame those who are different than us? What virtues of scholarship are necessary
for quality comparative work? In this course we will learn about the field of comparative religious ethics and the perils and possibilities that accompany its intellectual projects. In addition to several theoretical texts, we will read two ethnographies (Fernando 2014 and Pandian 2009) that weave in and out of comparative religious ethics. These texts focus on themes of nationalism, post-colonialism, immigration, the production and regulation of religious subjects, and the limits of our judgments on the other.

Instructor(s): Caroline Anglim Terms Offered: Winter
Equivalent Course(s): RLST 24160

ANTH 23915. Religion, Reason, and the State. 100 Units.
The second quarter of this sequence explores the work of key theorists on the role of religion in modern society, politics, and the state. Central questions include: How has state power transformed religious institutions, knowledge, and practice? How can we account for the persistence of religious commitments in the face of secularization? What role has religion played in revolutionary movements and in resistance against state power? Instructor(s): Alireza Doostdar Terms Offered: Winter
Prerequisite(s): No prerequisites.
Note(s): This is the second of a two-quarter sequence. Students may enroll in either one of the courses in this sequence independently of the other course. This course counts as a Gateway course for RLST majors/minors.
Equivalent Course(s): RLST 10102

ANTH 23916. Race and Religion: Theorizing Blackness and Jewishness. 100 Units.
Founded on ideals of universalism, pluralism and secularism, France and the United States are fraught with contradictions when it comes to race and religion. Which religions are accepted? Which religions are suspect? Is it minority that defines the difference-or only particular kinds of minority, such as race? To untangle the intersections of race and religion, we will examine Blackness and Jewishness as they are represented in political polemic, fiction, memoir and philosophy from the 1960s to the present. This course introduces students to the foundational concepts for the critical study of race and religion through exploring the constructions of Black and Jewish identity. We will examine the contradictions of secular politics and culture in France and the United States, and discuss how religion, race, and intersecting categories such as gender and sexuality, can become tools of critique. Readings include works by thinkers such as Césaire, Fanon, Memmi, Levinas and Foucault, along with literary classics by Nella Larsen and Sarah Kofman, and contemporary critical essays by Judith Butler, Christina Sharpe and Talal Asad. Throughout this course, we will examine how the concepts of race and religion are key components of the political, philosophical and ethical projects of these authors. No prerequisite knowledge of critical theory, or this historical period, is expected.
Instructor(s): Kirsten Collins Terms Offered: Winter
Equivalent Course(s): GLST 27721, CMLT 27721, CRES 27721, RLST 27721, GNSE 27721, FREN 27721, JWSC 27721

ANTH 23920. Gaming Religion. 100 Units.
Video games commonly feature religious ideas, imagery, emotions, and practices. In this course, we will take a hands-on, experimental approach to the study of religion in video games. We will play various games individually and in groups, and reflect on the design and gameplay in conversation with readings in theory.
Instructor(s): Alireza Doostdar Terms Offered: Winter
Equivalent Course(s): RLST 28990

ANTH 24001-24002-24003. Colonizations I-II-III.
This sequence meets the general education requirement in civilization studies. This three-quarter sequence approaches the concept of civilization from an emphasis on cross-cultural/societal connection and exchange. We explore the dynamics of conquest, slavery, colonialism, and their reciprocal relationships with concepts such as resistance, freedom, and independence, with an eye toward understanding their interlocking role in the making of the modern world.

ANTH 24001. Colonizations I: Colonialism, Enslavement and Resistance in the Atlantic World. 100 Units.
This quarter examines the making of the Atlantic world in the aftermath of European colonial expansion. Focusing on the Caribbean, North and South America, and western Africa, we cover the dynamics of invasion, representation of otherness, enslavement, colonial economies and societies, as well as resistance and revolution.
Instructor(s): Staff Terms Offered: Autumn Spring Winter
Note(s): This sequence meets the general education requirement in civilization studies. This course is offered every year. These courses can be taken in any sequence.
Equivalent Course(s): SOSC 24001, RDIN 24001, HIST 18301, CRES 24001

ANTH 24002. Colonizations II: Imperial Expansion, Anti-Imperialism, and Nation in Asia. 100 Units.
This quarter covers the histories of modern European and Japanese colonialism in South and East Asia and the Pacific. Themes examined include the logics and dynamics of imperial expansion and rule; Orientalist discourses; uprisings and anti-imperial movements; the rise of nationalisms; and paths to decolonization in the region.
Instructor(s): Staff Terms Offered: Autumn Spring Winter
Note(s): This sequence meets the general education requirement in civilization studies. These courses can be taken in any sequence.
ANTH 24003. Colonizations III: Decolonization, Revolution, Freedom. 100 Units.
The third quarter considers the processes and consequences of decolonization both in newly independent
nations and former colonial powers. Through an engagement with postcolonial studies, we explore the
problematics of freedom and sovereignty; anti-colonial movements, thinking and struggles; nation-making
and nationalism; and the enduring legacies of colonialism.
Instructor(s): Staff Terms Offered: Autumn Spring Winter
Note(s): This sequence meets the general education requirement in civilization studies. These courses can be
taken in any sequence.
Equivalent Course(s): CRES 24003, SOSC 24003, SALC 20702, RDIN 24003, HIST 18303

ANTH 24011-24012. Introduction to the Civilizations of South Asia I-II.
This sequence introduces core themes in the formation of culture and society in South Asia from the early
modern period until the present. This sequence meets the general education requirement in civilization studies.
These courses must be taken in sequence.

ANTH 24101. Introduction to the Civilizations of South Asia I. 100 Units.
The first quarter focuses on Islam in South Asia, Hindu-Muslim interaction, Mughal political and literary
traditions, and South Asia’s early encounters with Europe.
Instructor(s): Muzaffar Alam Terms Offered: Winter
Equivalent Course(s): SALC 30100, SOSC 23000, SALC 20100, MDMV 20100, HIST 10800

ANTH 24102. Introduction to the Civilizations of South Asia II. 100 Units.
The second quarter analyzes the colonial period (i.e., reform movements, the rise of nationalism,
communalism, caste, and other identity movements) up to the independence and partition of India.
Instructor(s): Dipesh Chakrabarty Terms Offered: Spring
Prerequisite(s): SALC 20100, ANTH 24011, HIST 10800, SASC 20000, SOSC 23000
Equivalent Course(s): SOSC 23100, HIST 10900, SALC 20200

ANTH 24110. Jews, Arabs, and Others: Nations from the Nile to the Jordan. 100 Units.
This course considers nationbuilding as an ongoing and recurring process in the Middle East, realigning
identities and communities according to the political concerns of the time. In particular, we will examine
how Arabs and Others have figured in the political imagination of both Egypt and Israel-Palestine. When can
Egyptians, Palestinians, and Israelis consider themselves “Arab”--and when not? What are the stakes of naming
Arab-ness or claiming it for oneself? To answer these questions, this course will include readings and popular
films on Arab nationalism and minorities in Egypt, the question of Jewish versus Israeli nationalism, Arab (or
Mizrahi) Jews in Israel, and the relationship of Palestinian nationalism to the borders that have been drawn
within the historic land of Palestine.
Instructor(s): Callie Maidhof Terms Offered: Autumn
Equivalent Course(s): NEHC 25209, GLST 25209

ANTH 24125. Technology and Human Rights. 100 Units.
The international human rights regime took form in the shadow of the atom bomb and WWII, a historical
juncture, which for many marked the limits of techno-scientific rationality and progress. Utopian narratives of
inevitable, technologically-driven social and economic progress nonetheless remain a cornerstone of American
political and cultural imaginaries. In this course, we will draw on anthropology, law, and allied disciplines to
explore the ambiguous intersections of technological innovation and human rights. Through a series of case
studies, the course will consider how new technologies and their allied knowledge practices call into question
the foundational categories of human rights law, complicating understandings of the individual, person hood,
family, and life. The course will further examine how emerging developments in biotechnology, information
technology, robotics, and AI variously enhance and undermine the substantive protections of human rights,
including the rights to health, privacy, freedom of expression, security, and indigenous knowledge. Finally, we
will consider how human rights norms and institutions can be mobilized to inform and constrain the design and
application of potentially threatening new technologies.
Instructor(s): Lake Polan, Pozen Center for Human Rights Social Science Teaching Fellow Terms Offered:
Autumn
Equivalent Course(s): HMRT 24125

ANTH 24299. Topics in Medical Anthropology: Troubling Adolescence. 100 Units.
Many theories of “adolescence” have often emphasized it as a development period of rapid change, risk taking,
and experimentation. This course will take on some of key health-related concerns of adolescence, such as
mental health (e.g. depression, anxiety) and risk behaviors (e.g. substance use, sexuality) asking after the
phenomenological experience of such concerns as well as exploring their cultural specific. Furthermore, this
course will review key historical and development frameworks for understanding “adolescence,” reading them
alongside anthropological and queer theories of temporality. Ultimately, the course asks, how do the troubles of
adolescence play out in different contexts? And what happens if we trouble the concept of adolescence itself?
Equivalent Course(s): GNSE 24299, HLTH 24299, HIPS 24299, CHDV 24299
ANTH 24304. Talking With Animals. 100 Units.
All over the world, children have long learned the lessons of what it means to be human from what animals tell them. In addition to ventriloquizing non-human animals to socialize human ones, projects for facilitating cross-species communication abound. These projects reveal not only how people imagine their relations with other animals, but also how we conceive of the possibilities and limits of sign systems. And while many focus on talking with animals, others suggest that animals are effective communicators precisely because they lack language, raising fascinating questions about ideologies of (im)mediation. As we learn how Peruvian kids talk with llamas and American cowboys whisper to wild horses, and explore what spiders say and how apes read the human keepers who teach them to sign, this class explores how distinctions are drawn between human and non-human animals, as well as attempts to cross those divides through communicative forms and technologies.
Instructor(s): E. Summerson Carr Terms Offered: TBD

ANTH 24314. Meaning and the Body. 100 Units.
This course examines recent (20th- and 21st-century) retrievals of the body to understand "meaning." We will analyze varying construals of nature, materiality, matter, emotion, and thought. Readings will therefore be multidisciplinary, including selections from philosophy, sociolinguistics, anthropology, and religious studies. More specifically, we will examine the relationship between meaning and embodiment by way of the following: modern philosophies of the subject; analytic philosophies of language; deconstruction and the historicization of the body; feminist theories of discourse; new materialist conceptions of matter; new animist conceptions of the subject.
Instructor(s): Lisa Landoe Hedrick Terms Offered: Winter
Equivalent Course(s): GNSE 26116, RLIST 26116

ANTH 24315. Culture, Mental Health, and Psychiatry. 100 Units.
While mental illness has recently been framed in largely neurobiological terms as "brain disease," there has also been an increasing awareness of the contingency of psychiatric diagnoses. In this course, we will draw upon readings from medical and psychological anthropology, cultural psychiatry, and science studies to examine this paradox and to examine mental health and illness as a set of subjective experiences, social processes, and objects of knowledge and intervention. On a conceptual level, the course invites students to think through the complex relationships between categories of knowledge and clinical technologies (in this case, mainly psychiatric ones) and the subjectivities of persons living with mental illness. Put in slightly different terms, we will look at the multiple links between psychiatrists' professional accounts of mental illness and patients' experiences of it. Questions explored include: Does mental illness vary across social and cultural settings? How are experiences of people suffering from mental illness shaped by psychiatry's knowledge of their afflictions?
Instructor(s): E. Raikhel Terms Offered: Spring
Note(s): CHDV Distribution: 3,4; C
Equivalent Course(s): HIPS 27302, KNOW 33301, HLTH 23301, KNOW 23301, CHDV 23301, CHDV 33301, ANTH 35115

ANTH 24316. Thinking Psychoanalytically: From the Sciences to the Arts. 100 Units.
Since Freud's seminal investigation into the nature of the mind, psychoanalytic thinking has offered a unique approach to unconscious, relational, and meaningful dimensions of human experience. Despite assaults on the field from numerous quarters, psychoanalytic thinking remains central to the work of practitioners across an array of disciplines. After an introduction to key psychoanalytic concepts including the unconscious, repression, and transference, we will investigate some of the ways in which these ideas are mobilized within clinical practice, neuroscience, anthropology, education, philosophy, literary studies, and the visual arts through a series of lectures presented by specialists from these fields. Along the way, we will gain an appreciation for some of the ways in which psychoanalytic perspectives continue to inspire a variety of current scientific and humanistic projects.
Instructor(s): A. Beal, Staff
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): BPRO 28400

ANTH 24320. Cultural Psychology. 100 Units.
There is a substantial portion of the psychological nature of human beings that is neither homogeneous nor fixed across time and space. At the heart of the discipline of cultural psychology is the tenet of psychological pluralism, which states that the study of "normal" psychology is the study of multiple psychologies and not just the study of a single or uniform fundamental psychology for all peoples of the world. Research findings in cultural psychology thus raise provocative questions about the integrity and value of alternative forms of subjectivity across cultural groups. In this course we analyze the concept of "culture" and examine ethnic and cross-cultural variations in mental functioning with special attention to the cultural psychology of emotions, self, moral judgment, categorization, and reasoning.
Instructor(s): R. Shweder Terms Offered: Autumn
Prerequisite(s): Undergraduates must be in third or fourth year.
Note(s): CHDV Distribution: B, C
Equivalent Course(s): PSYC 23000, CHDV 21000, AMER 33000, PSYC 33000, CRES 21100, KNOW 31000, GNSE 21001, CHDV 31000, GNSE 31000, ANTH 35110
ANTH 24321. Psychological Anthropology. 100 Units.
This course traces the development of the field of psychological anthropology and critically reviews the various paradigms adopted by psychological anthropologists. In our discussions, we will draw examples from different cultural contexts to critically examine the relationship between culture and psychological functioning. By the end of the quarter, you will develop an insightful understanding of the cultural sources of the self, mind, behavior, and mental health as well as a substantial knowledge of the field of psychological anthropology.
Instructor(s): S. Numanbayraktaroglu Terms Offered: Spring
Equivalent Course(s): CHDV 24704, CHDV 44500

ANTH 24349. Human Rights and Postcolonial Politics. 100 Units.
This class focuses on the history and theory of human rights by considering it as a quintessentially postcolonial political form. We consider how Euro-American genealogies of rights intersect and interact with trajectories of colonial rule and postcolonial politics. In the process, the question of rights itself comes to be posed afresh. Empirically, the class focuses on the histories and presents of India and South Africa. Both these countries underwent processes of constitutional decolonization. Thus, rights have a foundational place in both postcolonial polities. What does that mean? How does that create openings for the imaginings and instantiations of socially transformative policies? How does it lead to the endurance of traces and aspects of colonial government? What are the promises and limits of rights as we consider them in such historical and political contexts? In what ways are political struggles in these countries marked as being both for and against rights? In the process, how does our thinking and conceptualization of rights itself come to be at stake?

ANTH 24501. Language and Environment. 100 Units.
This seminar will explore the many ways that language influences and is influenced by the environment. Appropriate for those interested in the socio-cultural foundations of language and language-use, infrastructural dimensions of communication and interaction, and existence as semiotic.
Instructor(s): T. Edwards Terms Offered: Autumn
Note(s): Grad distribution: 4*, Undergrad Distribution: 3, 4
Equivalent Course(s): CHDV 44500, ANTH 44501, CHDV 24500, LING 44500

ANTH 24510. Anthropology of Museums. 100 Units.
This course uses anthropological reflections on "objects and others" to discuss questions of collection, classification, and curation in museum spaces. Anthropological engagements with material culture define early moments in the discipline's history and frame debates about typology and the observation of difference, as well as documentation and display. Through a series of readings, museum visits, and object-centered exercises, this undergraduate seminar will foreground questions of heritage and memory, ethical concerns about the ownership of collections and their display, and the publics that museums seek to address and be accountable to.

ANTH 24702. Un/Making Citizenship: The Politics of the Intimate. 100 Units.
The state is like a gravitational force that holds people in relation to itself, tugging and turning each person to different degrees. Citizenship is the mediation of that relationship. In this course, we examine different dimensions of citizenship across the life course, considering the ways people are formed into certain kinds of subjects. We ask: how and why are intimate life events of interest not only to those involved, but also to governing authorities? From the governance of conception and birth, to the (non)conferral of legal identities, the state manages legitimacy through documents like birth certificates, whose contents or absence can shape a person's entire life trajectory. In childhood, schools work to transform children into certain kinds of future citizens. From legal adulthood's gradual accrual of rights -- to vote, to have sex, to drink, to stand trial -- to old age and long after death, citizenship extends beyond the lifecourse. Over the course of the quarter, we investigate how the ways people negotiate attempts to transform them into citizens, examining in particular how citizenship is mediated in relation to religion, sexuality, migration, disability, marriage, pregnancy, old age, and death.
Instructor(s): Kathryn Takabvirwa Terms Offered: TBD
Equivalent Course(s): GNSE 24704, CHDV 24702

ANTH 24711. The Prophet Q. 100 Units.
In the wake of the January 6, 2021, storming of the United States Capitol, the QAnon phenomenon has received sustained global attention as news and government agencies scramble to understand this online movement’s role in the attack, the threat it continues to pose, and why it is that one out of every six Americans believes that former President Trump is secretly battling an elite group of politicians, media moguls, and academics who are deeply involved in child sex trafficking and satanic sacrifice. This course will investigate the phenomenon of QAnon through the lens of New Religious Movements (NRMs)—seeking to understand the complex interplay of factors that incites people to become immersed in these groups. Using examples from American New Religious Movements of the 20th century such as Scientology, the Rajneesh movement, and Jonestown, we will delve into the history of these groups in order to examine the motivations that drive individuals into these “fringe” religious movements. In the process, we will interrogate the usefulness of such labels as “religion” and “cult,” and ultimately hope to better understand how power, race, gender, and practices of dissimulation play active roles in both these new religious movements and within QAnon.
Instructor(s): Marielle Harrison Terms Offered: Autumn
Equivalent Course(s): RLST 28991, SOCI 20540, AMER 28991
ANTH 24730. Religious Violence. 100 Units.
Are there "proper" or "improper" practices of religion? Is it at best a matter of private belief, to be kept separate from or protected by the state? Or is it something that at times requires the state's intervention? Does religion represent the last vestiges of the premodern world, or is it something that is integral to modern life? To answer these questions, we will call on anthropologists and other social scientists and theorists to understand, first, what is "religion," and then what is, can be, or should be its relationship to gender, the nation, and the modern state in various historical and geographical locations, with particular attention to the Middle East and South Asia. 
Instructor(s): Callie Maidhof 
Terms Offered: Not offered 2022-2023
Equivalent Course(s): RLS 26630, GLST 25630

ANTH 24830. Oil, Power, Modernity: The Anthropology of Energy. 100 Units.
Oil is often regarded as the quintessential commodity of modern industrial capitalism. Oil is a material substrate of power-as a source of energy, an impetus for warfare, and a source of windfall revenue for multinational corporations and petrostates. This undergraduate seminar surveys social scientific approaches to oil and adjacent energy complexes. This seminar will debate the character of oil as a material substance and an instrument of political power. To this end, students will consult the writings of anthropologists, geographers, and economists alongside creative media including film, television, and short stories.
Instructor(s): Ryan Jobson 
Terms Offered: TBD
Note(s): Course is designed for undergraduates and master's students
Equivalent Course(s): CEGU 24830, LACS 34830, LACS 24830, ANTH 35515

ANTH 25208. Bodies, Gifts, and Commodities. 100 Units.
This course presents a survey of anthropological theories of gifts and commodities and how they have been used to explain exchanges involving the human body. We will consider various forms of labor, including sex work and paid surrogacy, exchanges enabled by modern biotechnologies, such as organ and tissue donation, as well as other contexts where the body is objectified and fragmented, such as in the discovery and marketing of genetic materials and processes.
Instructor(s): Elham Mireshghi 
Terms Offered: Spring
Equivalent Course(s): AASR 37570, GNSE 27570, RLS 27570

ANTH 25211. Feminism and Anthropology. 100 Units.
This course examines the fraught yet generative relation between various movements of feminism and the discipline of anthropology. Both feminism(s) and anthropology emerged in the 19th century as fields invested in thinking "the human" through questions of alterity or Otherness. As such, feminist and anthropological inquiries often take up shared objects of analysis—including nature/culture, kinship, the body, sexuality, exchange, value and power—even as they differ in their political and scholarly orientations through the last century and a half. Tracking the emergence of feminisms and anthropology as distinct fields of academic discourse on the one hand and political intervention on the Other, we will pursue the following lines of inquiry: 1) a genealogical approach to key concepts and problem-spaces forged at the intersection of these two fields 2) critical analysis of the relation of feminist and postcolonial social movements to the professionalizing fields of knowledge production (including Marxist inspired writing on women and economy, Third World feminism and intersectionality, and feminist critiques of science studies) and 3) a reflexive contemporary examination of the way these two strands of thought have come together in the subfield of feminist anthropology and the continual frictions and resonances of feminist and anthropological approaches in academic settings and in the larger world (e.g., #MeToo, sex positive activism, queer politics, feminist economics).
Instructor(s): Chu, Julie 
Terms Offered: TBD
Prerequisite(s): 3rd and 4th year undergraduates only. Graduate students must have consent of one of the instructors.
Equivalent Course(s): GNSE 32103, GNSE 22103, ANTH 32910, CHDV 32103, CHDV 22103

ANTH 25212. Treating Trans-: Practices of Medicine, Practices of Theory. 100 Units.
Medical disciplines from psychiatry to surgery have all attempted to identify and to treat gendered misalignment, while queer theory and feminisms have simultaneously tried to understand if and how trans-theories should be integrated into their respective intellectual projects. This course looks at the logics of the medical treatment of transgender (and trans- more broadly) in order to consider the mutual entanglement of clinical processes with theoretical ones. Over the quarter we will read ethnographic accounts and theoretical essays, listen to oral histories, discuss the intersections of race and ability with gender, and interrogate concepts like "material bodies" and "objective science". Primary course questions include: 1. 
Instructor(s): Paula Martin 
Terms Offered: Winter
Note(s): This course counts as a Foundations Course for GNSE majors
Equivalent Course(s): GNSE 12103, HLTH 12103, CHDV 22100, HMRT 12103, HIPS 12103

ANTH 25214. (Re)Producing Race and Gender through American Material Culture. 100 Units.
This course introduces students to the role of the material world in the production and reproduction of ideologies of race, gender, and their intersections. Objects around us are imbued with meaning through their design, construction, use, and disuse. Architecture, art, photography, clothing, quilts, toys, food, and even the body have all been used to define groups of people. Combining secondary literature, theory, documentary evidence, and material culture, this course guides students as they ask questions about how ideologies of race and gender are produced, how they are both historically specific and constantly in flux, and how human
interaction with the material world creates, challenges, and changes their construction. The primary course objectives are to (1) provide students with an introduction to material culture as a theory and methodology and (2) teach them how to apply it to research on ideologies of gender and race in history.

Terms Offered: Winter
Equivalent Course(s): CRES 27530, GNSE 27530, ARTH 27530, HIST 27414

ANTH 25215. Human Rights: An Anthropological Perspective. 100 Units.
While the modern human rights regime developed largely absent input from anthropology, the discipline stakes its scholarly identity on claims to expertise over the nature of human being and the diversity of human experience. Anthropologists have long studied aspects of lived experience of central concern to human rights, including state violence, cultural difference, and structural inequality. In recent decades, they have focused increasing attention on the institutions and practices through which activists adopt and rework human rights concepts in local political and social struggles. Against this backdrop, Human Rights and the Human Experience will deploy anthropology’s distinctive knowledge practices and ethical sensitivities to analyze human rights as both global force and as creative resource in local movements for dignity, security, and human flourishing.

Instructor(s): Stephan Palmie
Equivalent Course(s): HMRT 26200

ANTH 25216. Gender, Sex, and Culture. 100 Units.
This introductory graduate course examines the social construction of gendered identities in different times and places. We study culturally-specific gendered experiences, ‘roles,’ rights and rebellions around the world, discussing the individual and social consequences of gender and the interrelationships between gender and other categories for identity including race, class and sexuality. While focusing on the global diversity of gendered experience and expectations, we also examine gender in the US, taking a critical approach to understanding gendered inequality and gender-based and sexual violence both abroad and at home. Finally, we examine the role of gendered expectations in Western science, the relationship between gender and ‘globalization,’ and the contemporary movements affecting change in gendered norms, especially in the arts and media. Advanced Undergraduates admitted with Instructor consent.

Instructor(s): Mary Elena Wilhoit
Prerequisite(s): Advanced Undergraduates admitted with Instructor consent.
Equivalent Course(s): MAPS 33502, ANTH 32925, GNSE 23506, GNSE 33506

ANTH 25222. Sex and the Ethnographic Tradition. 100 Units.
This course examines the role sex has played in the formation of ethnographic knowledge, with particular attention to how studies of sex have challenged static notions of identity and illuminated the complex relationship between social behavior and gendered sense of self. We will consider interest in sex as a motivating factor in the ethnographic enterprise and, reading studies on everything from desire, kink, and play to procreation, heritance and power, will examine complex and social construction of sexed, gendered, and raced selves and Others. How has ethnographic research contested the ubiquitous salience of male/female dichotomies, of patriarchy, and of the cross-cultural, trans-historical applicability of concepts like ‘third gender’? We will also take a methodological eye, querying how sex has moved from a supposedly ‘taboo’ category of social inquiry to a focal topic in ethnographic work of all kinds. This is an introductory graduate level course.

Equivalent Course(s): MAPS 35503, ANTH 35503, GNSE 33168, GNSE 23168

ANTH 25256. Anthropology of Borders. 100 Units.
Today, the world may seem more connected than ever. Infectious disease, data, global capital, and even “culture” seem to travel in the blink of an eye. At the same time, we’re witnessing the fortification of borders, and a resurgence of rightwing ethnonationalist populism on both sides of the Atlantic. Borders take on new significance national debates and security policy, and for those who rarely come into contact with borders, they may seem like mere metaphor for how a nation positions itself with regard to immigration, public health, and trade. But beyond the party platforms of politicians in the world’s capitols, borders are very real places, constituted by the practices of state and non-state actors alike, and creating new forms of life in response to the technologies that police them. In this course, we will take an anthropological view of borders in order to understand how they are created, policed, and inhabited, following and bucking trends in the micropractices of military, police, and bordercrossers both legal and illegal.

Instructor(s): Callie Maidhof
Equivalent Course(s): CHST 25701, GLST 25701

ANTH 25305. Anthropology of Food and Cuisine. 100 Units.
Contemporary human foodways are not only highly differentiated in cultural and social terms, but often have long and complicated histories. Anthropologists have long given attention to food. But, until quite recently, they did so in an unsystematic, haphazard fashion. This course explores several related themes with a view towards both the micro- and macro-politics of food by examining a range of ethnographic and historical case studies and theoretical texts. It takes the format of a seminar augmented by lectures (during the first few weeks), scheduled video screenings, and individual student presentations during the rest of the course.

Instructor(s): Stephan Palmie
Equivalent Course(s): AASR 35305, ANTH 35305, KNOW 25305
ANTH 25310. Drinking Alcohol: Social Problem or Normal Cultural Practice? 100 Units.
Alcohol is the most widely used psychoactive agent in the world, and, as archaeologists have recently demonstrated, it has a very long history dating back at least 9,000 years. This course will explore the issue of alcohol and drinking from a trans-disciplinary perspective. It will be co-taught by an anthropologist/archaeologist with experience in alcohol research and a neurobiologist who has experience with addiction research. Students will be confronted with literature on alcohol research from anthropology, sociology, history, biology, medicine, psychology, and public health and asked to think through the conflicts and contradictions. Selected case studies will be used to focus the discussion of broader theoretical concepts and competing perspectives introduced in the first part of the course. Topics for lectures and discussion include: fermentation and the chemistry and pharmacology of alcohol; the early history of alcohol; histories of drinking in ancient, medieval, and modern times; alcohol and the political economy; alcohol as a cultural artifact; styles of drinking and intoxication; how is alcohol metabolized; addiction; how does alcohol affect sensations; social problems; alcohol and religion; alcohol and health benefits; comparative case studies of drinking.
Instructor(s): M. Dietler, W. Green Terms Offered: Winter
Prerequisite(s):Third or fourth-year standing.
Note(s): This course does not meet requirements for the biological sciences major.
Equivalent Course(s): HLTH 25310, BIOS 02280, BPRO 22800

ANTH 25440. Maverick Markets: Cultural Economy and Cultural Finance. 100 Units.
What are the cultural dimensions of economic and financial institutions and financial action? What social variables influence and shape 'real' markets and market activities? If you are so smart, why aren’t you rich? is a question economists have been asked in the past. Why isn’t it easy to make money in financial areas even if one knows what economists know about markets, finance and the economy? And why, on the hand, is it so easy to get rich for some participants? Perhaps the answer is the real markets are complex social and cultural institutions which are quite different from organizations, administrations and the production side of the economy. The course provides an overview over social and cultural variables and patterns that play a role in economic behavior and specifically in financial markets. The readings examine the historical and structural embeddedness of economic action and institutions, the different constructions and interpretations of money, prices, and other dimensions of a market economy, and how a financial economy affects organizations, the art and other areas.
Instructor(s): K. Knorr Terms Offered: Spring
Equivalent Course(s): SOCI 20258, SOCI 30258, ANTH 35405

ANTH 25457. Topics in Contemporary Critical Theory I. 100 Units.
This class considers the question of capital, historically, comparatively and conceptually. What is capital? How is it related to value? How is it different from money? How does it work to organize social relations? In what forms, and through what institutional structures, does it materialize? How does it reflect in modes and relations of production? How is it governed, and what is its relation to the political? This course will enter into such questions, in the first instance, through a reading of Karl Marx. It will subsequently traverse a heterodox genealogy of Marxist social thought (with some emphasis on French theorists), in order to understand how a method of analysis developed to come to terms with nineteenth century European industrial capitalism might help us understand contemporary worlds of extraction, logistics and finance in comparative perspective. We will consider how capital is racialized and gendered, how it has expanded and mutated across place and over time, and what it means that we live in a time today when it is easier to imagine the end of the world than the end of capitalism.
Instructor(s): Kaushik Sunder Rajan Terms Offered: Winter. Offered in alternating years. The program will run in Winter 2022.
Prerequisite(s): Admission to the Paris: Social Sciences - Critical Theory study abroad program.
Note(s): This course is part of the College's Paris: Social Sciences - Critical Theory study abroad program.
Equivalent Course(s): CCCT 25457, PLSC 25457

ANTH 25458. Topics in Contemporary Critical Theory II. 100 Units.
This course investigates the central place of empires in the shaping of the modern world and understands critical theory as inextricable from its colonial context. We will read authors including Montaigne, Diderot, Tocqueville, Du Bois, Aimé Césaire, Suzanne Césaire, Fanon, Foucault, Said, and Trouillot, as well as contemporary theorists including Luie Irigaray, Achille Mbembe, David Scott, Françoise Vergès, and Joan Scott; we will pay particular but not exclusive attention to the context of French imperialism and to Paris as a site of theorizing, and critique of, the imperial global order.
Instructor(s): Kaushik Sunder Rajan and Lisa Wedeen Terms Offered: Winter. Offered in alternating years. The program will run in Winter 2022.
Prerequisite(s): Admission to the Paris: Social Sciences - Critical Theory study abroad program.
Note(s): This course is part of the College's Paris: Social Sciences - Critical Theory study abroad program.
Equivalent Course(s): PLSC 25458, CCCT 25458

ANTH 25459. Topics in Contemporary Critical Theory III. 100 Units.
This course examines selections from the vast literature on ideology—with attention to the political commitments and intellectual genealogies that have made the concept both important and vexed. The bulk of the course will entail examining ideology’s relationship to material practice, the notion of interpellation, the usefulness of "hegemony," and the problems associated with false consciousness. We shall also analyze ideology’s connection to prevailing theoretical and empirical concerns, such as those related to ‘subject’ formation, affect, new
developments in capitalism, the resurgence of populism, and the dynamics associated with contemporary "democratic" liberal, as well as authoritarian, political order
Instructor(s): Lisa Wedeen Terms Offered: Winter. Offered in alternating years. The program will next run in Winter 2022.
Prerequisite(s): Admission to the Paris: Social Sciences - Critical Theory study abroad program.
Note(s): This course is part of the College's Paris: Social Sciences - Critical Theory study abroad program.
Equivalent Course(s): CCCT 25459, PLSC 25459

ANTH 25720. Ethnographic Writing: Practices of Research and Representation. 100 Units.
This course gives students opportunities to develop their own craft of ethnography through hands-on research and writing and in-depth explorations of recent ethnographic work. Ethnography, "the writing of a people," by definition, refers to groups of people as its object and to processes through which an ethnographer attempts to represent such groups. It also refers to academic texts that are the product of an ethnographer's representational efforts. In this course, students will engage with ethnography multifacently - as research practice, analytical generalization, and literary product. We will reflect upon processes of representation through which ethnographers apply their findings to groups (implicitly or explicitly) and the choices and interpretations they make along the way. Some questions we will ask are: How does the ethnographer deploy particular signifiers, such as modes of communication, spatial and architectural configurations, and historical contexts to make arguments? How is language used to represent experience convincingly? With these questions in mind, we will approach book and article-length ethnographies focusing on four expansive themes - migration, global interconnectedness, nation-states, and neoliberalism. Our readings will inform students' development of their own ethnographic practices. This course will be especially helpful to MA and advanced undergraduate students engaged in the production of ethnographic theses.
Instructor(s): Victoria Gross Terms Offered: Winter
Equivalent Course(s): CCCT 35459, ANTH 35720

ANTH 25777. Aging and the Life Course: An Intersectional Perspective. 100 Units.
Societies across the world are ordered by age. In this course, we will examine how age is imagined and constructed according to biological, historical, and cultural perspectives. Drawing upon a life course model, we will study how different cultures and social groups seek to structure the individual's life in relation to the wider society by creating socially constructed stages, age cohorts, and generations. We will consider how different social factors including gender, sexuality, race, and socioeconomic status may disrupt an individual's ability to follow an idealized life course. An examination of the cultural assumptions surrounding aging in the United States will illustrate how ageism and age-stratification affect social relations across society and make certain lives more "successful" than others. The course will focus on older age and later life as a method for exploring how individuals make sense of their life experiences through narrative construction, the accumulation of disadvantage over the life course, and how historical and cultural shifts are disrupting established roles and relationships for the elderly across the world. The course will draw heavily on texts from gender and sexuality studies as a means for illustrating and understanding concepts. Students will have the opportunity to learn basic ethnographic and interviewing research techniques by conducting a life course narrative interview.
Equivalent Course(s): CHDV 25777, HLTH 25777

ANTH 25800. Are we doomed? Confronting the End of the World. 100 Units.
We may be at a pivotal point in human history, with civilization facing unprecedented threats including nuclear Armageddon, climate change, and pandemics. This class will explore our potential for self-inflicted catastrophe, as well as approaches for mitigating these perils. We will consider this through readings and engagement with a range of speakers focused on various imminent perils, from the perspective of a wide range of disciplinary perspectives, including sociology, philosophy, theology, anthropology, statistics, physics, astrophysics, economics, law, business, and the arts.
Equivalent Course(s): BPRO 25800, SOCI 30531, ASTR 21700, SOCI 20531, KNOW 21700

ANTH 25810. Social Problems, Social Policy, and Social Change. 100 Units.
This course is designed to provide an analytic framework that enables students to understand how social problems are socially constructed, how social policies are created in response to those identified problems, and how social change efforts both shape and respond to the policy environment. During the quarter, we will examine how social problems, policies and programs are framed, re-framed, and addressed and how individuals, organizations, and relevant constituencies take part in social change. In addition to providing an overview of the relationship between social problems, social policy, and social change efforts, the course encourages critical thought about the role of and relationship between professional elites (philanthropists, advocates, researchers, etc.) and ground-level activists (affected populations, community leaders, etc.) in constructing and contesting social problems and promoting social change.
Instructor(s): J. Mosley Terms Offered: TBD
Equivalent Course(s): SSAD 25810

ANTH 25906. Shamans and Oral Poets of Central Asia. 100 Units.
Anthropological/Ethnographic Survey of Pre-Modern Central Asian Cultures. This course explores the rituals, oral literature, and music associated with the nomadic cultures of Central Eurasia.
Instructor(s): Kagan Arik Terms Offered: Spring
Equivalent Course(s): NEHC 20766, NEHC 30766
ANTH 25908. Balkan Folklore. 100 Units.
Vampires, fire-breathing dragons, vengeful mountain nymphs, 7/8 and other uneven dance beats, heart-rending laments, and a living epic tradition. This course is an overview of Balkan folklore from historical, political, and anthropological perspectives. We seek to understand folk tradition as a dynamic process and consider the function of different folklore genres in the imagining and maintenance of community and the socialization of the individual. We also experience this living tradition firsthand through visits of a Chicago-based folk dance ensemble, “Balkan Dance.”
Instructor(s): Angelina Ilieva Terms Offered: Spring
Equivalent Course(s): CMLT 33301, NEHC 20568, REES 39009, ANTH 35908, REES 29009, NEHC 30568, CMLT 23301

ANTH 25945. Settler Colonialism: From the US to Palestine. 100 Units.
In this course, we will consider settler colonialism as a contemporary, ongoing process as it unfolds in both North America and the Middle East, thinking through the problems of state formation, citizenship, land expropriation, and the law in these two contexts. While US and the state of Israel share a (tentative) commitment to liberal democracy, this has hinged on the erasure of indigenous populations even as the states expanded to envelop greater swaths of territory. In the process, settler and indigenous peoples have been moved, as well as transformed, producing new subjectivities in relation to both the state and international law. Over the quarter, we will examine the transformations of space and subjects effected by the settler colonial project, drawing on historical, anthropological, and theoretical literature.
Instructor(s): Callie Maidhof Terms Offered: Not offered 2022-2023
Equivalent Course(s): RLST 26945, CRES 25945, GLST 25945

ANTH 26011. Intro to Archaeology: Thinking like an Archaeologist. 100 Units.
This course introduces students to archaeological method and theory, and engages them with data-based exercises to engage with archaeological problems so they can learn to think like an archaeologist. Archaeology forms one of the four component subdisciplines of Anthropology, and has developed its own body of method and theory revolving around the data left behind by people in the past. This Archaeological data - whether created by survey, excavation, or laboratory analysis - provides a unique lens for viewing the remnants of societies and social organization. This course examines how archaeologists investigate material remains, how they consider research problems, how they make interpretations, and some of the ethical questions that arise as well as ties this to the history of the discipline from its inception into the present. After this course, students should have a background to understand archaeological reasoning and consider the ways that material can be used to interpret human behavior.
Instructor(s): Adrian Chase

ANTH 26040. Archaeological Field Methods: Monuments, Memory, and the Chicago Landscape. 100 Units.
In this hands-on course students learn the techniques of archaeological research design, archival research, surface survey, excavation, mapping, photography, and/or analysis as appropriate to the selected site(s) for the academic year. Sites will include monuments and historic markers found across Chicago, with a focus on the Southside. Students will complete directed field exercises in cemeteries, city parks, and on campus to investigate the role of monuments and historic markers in urban life. The aims of the course are: (1) to learn archaeological methods of documentation; (2) to learn about how past, present, and future interact in the Chicago landscape; and (3) to explore theoretical approaches to the changing politics of commemoration, from iconoclasm in antiquity to Black Lives Matter.
Instructor(s): Shannon Dawdy & Alice Yao

ANTH 26043. The Aesthetics of Artificial Intelligence. 100 Units.
With the emergence of generative AI tools such as ChatGPT, DALL-E, and Midjourney, the production of computer-generated content has become accessible to a wide range of users and use cases. Knowledge institutions are particularly challenged to find adequate responses to changing notions of authorship as the mainstreaming of ‘artificial’ texts, audio-visual artifacts, and code is transforming our paradigms of communication in real-time. This course offers a survey of scholarship from the nascent field of critical AI studies to investigate the impact of AI, machine learning, and big data on knowledge production, representation, and consumption. In addition to theoretical discussions, we will conduct research-creation experiments aimed at documenting and evaluating emerging methods of AI-augmented content creation across text, image, and sound. Prospective students should demonstrate a substantial interest in media art and design and its connections to digital humanities, critical theory, and pedagogy. Experience with artistic and/or engineering practice is a plus.
Please submit a 300 word max statement of interest to uhpl@uchicago.edu by 12/22 in order to be considered for enrollment.
Instructor(s): Andre Uhl Terms Offered: Winter
Equivalent Course(s): CMST 26043, CHSS 36043, MACS 36043, CMST 36043, KNOW 36043, HIP 26043, KNOW 26043, ANTH 36043, MAAD 12043

ANTH 26200. Ceramic Analysis in Archaeology. 100 Units.
This course introduces the theoretical foundations and analytical techniques that allow archaeologists to use ceramics to make inferences about ancient societies. Ethnographic, experimental, and physical science approaches are explored to develop a realistic, integrated understanding of the nature of ceramics as a form of material culture. Practical training in the use of the ceramic labs is included.
ANTH 26330. Making the Maya World. 100 Units.
What do we know about the ancient Maya? Pyramids, palaces, and temples are found from Mexico to Honduras, texts in hieroglyphic script record the histories of kings and queens who ruled those cities, and painted murals, carved stone stelae, and ceramic vessels provide a glimpse of complex geopolitical dynamics and social hierarchies. Decades of archaeological research have expanded that view beyond the rulers and elites to explore the daily lives of the Maya people, networks of trade and market exchange, and agricultural and ritual practices. Present-day Maya communities attest to the dynamism and vitality of languages and traditions, often entangled in the politics of archaeological heritage and tourism. This course is a wide-ranging exploration of ancient Maya civilization and of the various ways archaeologists, anthropologists, linguists, historians, and indigenous communities have examined and manipulated the Maya past. From tropes of long-hidden mysteries rescued from the jungle to New Age appropriations of pre-Columbian rituals, from the thrill of decipherment to painstaking and technical artifact studies, we will examine how models drawn from anthropology, ethnography, classical archaeology and philology, political science, and popular culture have shaped current understandings of the ancient Maya world, and also how the Maya world has, at times, resisted easy appropriation and defied expectations.
Instructor(s): Sarah Newman Terms Offered: TBD
Equivalent Course(s): LACS 26330, LACS 36330, CEGU 26330, ANTH 36330

ANTH 26368. Environmental Transitions and Unnatural Histories. 100 Units.
The course considers changes wrought in the natural landscape of the greater Calumet region beginning with indigenous Potawatomi and their forced removal. Students will examine how the Calumet's natural environment became collateral damage of the industrial capitalism that transformed the region into an economic powerhouse and explore efforts to rehabilitate the Calumet's rich biodiversity, identifying the challenges and achievements of this most recent environmental transition.
Instructor(s): Lyons, Deirdre Terms Offered: Spring
Equivalent Course(s): ANTH 46455, MAPS 33555, HIST 29107, HIST 39107

ANTH 26455. Empires and Colonies of the Atlantic World. 100 Units.
This graduate-level reading colloquium explores classic and emerging scholarship that examines the rise and consolidation of European overseas empires and colonies in the early modern Atlantic world (c.1400-1850).
Instructor(s): Lyons, Deirdre Terms Offered: Spring
Equivalent Course(s): ANTH 46455, MAPS 33555, HIST 29107, HIST 39107

ANTH 26612. Field Archaeology. 100 Units.
This course entails four weeks of full-time, hands-on training in field archaeology in an excavation directed by a University of Chicago faculty member. At the Tell Keisan site in Israel, students will learn techniques of excavation and digital recording of the finds; attend evening lectures; and participate in weekend field trips.
Instructor(s): David Schloen Equivalent Course(s): CLCV 20091, HIST 20091, NEAA 20091, CLAS 30091

ANTH 26700. Language and Technology. 100 Units.
This course is concerned with the complex cultural dynamics we are immersed in as users of language and technology. Exploring those dynamics, we will ask questions fundamental to the field of linguistic anthropology, like: Who am I, and how do I know for sure? How do I glean information from my environment, and how do my information-seeking activities generate information for others? What is “context”? How are competing contexts generated, activated, or contested, and by whom? How is the rapid and ongoing substitution of channels (e.g. visual, auditory, proprioceptive) consequential for how we live and what we do? How are the messages we send out transmitted, diverted, twisted, or missed entirely, and to what end? Each week, an over-arching question like this will be introduced in readings and a short lecture, along with a set of key concepts, which students will apply in thinking about the environments with which they are most familiar. Students will have opportunities to explore connections that interest them through a range of discussion-based activities in class and in a final project, which may take one of many forms.
Instructor(s): T. Edwards Terms Offered: Winter
Prerequisite(s): Distribution categories: Undergraduate: C, Graduate: 3
ANTH 2670. Capitalism and the State. 100 Units.
What can historical ethnography teach us, about the origins of capitalism, sovereignty and corporations, and the past and future of planning? This course will examine transformative events: the advent and the abolition of British empire slavery. Whaling and its consequences. The "7 Years War" in India and America. The Mongol conquests. Also, twentieth century (c20) stock market crashes. The late c20 rise of global cities. China’s c21 "Belt and Road Project." Cognizance of global warming. We will use transformative events to track the emergent assemblage of state and capitalist institutions, including money, markets and taxation, banks and stock markets, accounting and budgets. Like Weber, we will seek causal patterns in between determinism and serendipity. Following Veblen, we will focus on corporations and “New Deals.”
Instructor(s): John Kelly
Equivalent Course(s): ANTH 63701

ANTH 26710-26711. Ancient Landscapes I-II.
This is a two-course sequence that introduces students to theory and method in landscape studies and the use of Geographical Information Systems (GIS) to analyze archaeological, anthropological, historical, and environmental data. Course one covers the theoretical and methodological background necessary to understand spatial approaches to landscape and the fundamentals of using ESRI’s ArcGIS software, and further guides students in developing a research proposal. Course two covers more advanced GIS-based analysis (using vector, raster, and satellite remote sensing data) and guides students in carrying out their own spatial research project. In both courses, techniques are introduced through the discussion of case studies (focused on the archaeology of the Middle East) and through demonstration of software skills. During supervised laboratory times, the various techniques and analyses covered will be applied to sample archaeological data and also to data from a region/topic chosen by the student.
Instructor(s): Mehrnoush Soroush Terms Offered: Autumn
Equivalent Course(s): GISC 20061, NEAA 30061, CEGU 30061, CEGU 20061, NEAA 20061, GISC 30061, ANTH 36710

ANTH 26711. Ancient Landscapes II. 100 Units.

ANTH 26760. Archaeology of Bronze Age China. 100 Units.
Bronze Age" in China conventionally refers to the time period from ca. 2000 BC to about 500 BC, during which bronze, an alloy of copper and other metals such as tin and lead, was the predominant medium used by the society, or to be more precise, the elite classes of the society. Bronze objects, in the forms of vessels, weapons, and musical instruments, were reserved for the upper ruling class of the society and were used mostly as paraphernalia during rituals and feasting. "Bronze Age" in China also indicates the emergence and eventual maturation of states with their bureaucratic systems, the presence of urban centers, a sophisticated writing system, and advanced craft producing industries, especially metal production. This course surveys the important archaeological finds of Bronze Age China and the theoretical issues such as state formation, craft production, writing, bureaucratic systems, urbanization, warfare, and inter-regional interaction, etc. It emphasizes a multi-disciplinary approach with readings and examples from anthropology, archaeology, art history, and epigraphy.
This course will also visit the Smart Museum, the Field Museum, and the Art Institute of Chicago to take advantage of the local collections of ancient Chinese arts and archaeology.

Instructor(s): Y. Li
Terms Offered: Spring

Equivalent Course(s): EALC 28015, EALC 48015, ANTH 46760

ANTH 26765. Archaeology of Anyang: Bronzes, Inscriptions, and World Heritage. 100 Units.
Anyang is one of the most important archaeological sites in China. The discoveries of inscribed oracle bones, the royal cemetery, clusters of palatial structures, and industrial-scale craft production precincts have all established that the site was indeed the last capital of the Shang dynasty recorded in traditional historiography. With almost continuous excavations since the late 1920s, work at Anyang has in many ways shaped and defined Chinese archaeology and the study of Early Bronze Age China. This course intends to examine the history of research, important archaeological finds, and the role of Anyang studies in the field of Chinese archaeology. While the emphasis is on archaeological finds and the related research, this course will also attempt to define Anyang in the modern social and cultural contexts in terms of world heritage, national and local identity, and the looting and illegal trade of antiquities.

Instructor(s): Y. Li
Terms Offered: Winter

Note(s): Open to undergraduates with consent of instructor

Equivalent Course(s): EALC 48010, EALC 28010, ANTH 36765

ANTH 26900. Archaeological Data Sets. 100 Units.
This course focuses on the methodological basis of archaeological data analysis. Its goals are twofold: (1) to provide students with an opportunity to examine research questions through the study of archaeological data; and (2) to allow students to evaluate evidential claims in light of analytical results. We consider data collection, sampling and statistical populations, exploratory data analysis, and statistical inference. Built around computer applications, the course also introduces computer analysis, data encoding, and database structure.

Instructor(s): Alice Yao
Prerequisite(s): Advanced standing and consent of instructor for undergraduates

Equivalent Course(s): ANTH 46900

ANTH 26910. Introduction to Linguistic Anthropology. 100 Units.
How do we use language when we interact with others (and ourselves)? What lies beyond semantic meaning, or the presupposed function of language to deliver “information”? In this introductory course to the field of linguistic anthropology, we explore how power, inequality, and difference are enacted through various communicative features of human interaction-features that include, but are not limited to, what we refer to as “language.” We ask how the things that we say (and how we say them) signal and shape our identities (such as race, gender, sexuality, ethnicity, religion, and class). Furthermore, we investigate how language enacts forms of human relationality—forms that, among others, encompass solidarity, conflict, and hierarchy in face-to-face interactions as well as in mass-mediated productions. Through this course, student will engage with and analyze linguistic features of human interaction in their cultural and political contexts.

Instructor(s): Fadi Hakim

Equivalent Course(s): LING 26910, CHDV 26910

ANTH 27001. Intro To Linguistics-1. 100 Units.
TBD

Equivalent Course(s): SOSC 21700, LING 20100, ANTH 37001, LING 30100

ANTH 27010. It's Not What You Say, It's How You Say It: Introduction to Linguistic Anthropology. 100 Units.
Coming soon

Instructor(s): Constantine Nakassis

Note(s): This is considered as an “Introductory-Level” course for Anthropology Majors.

ANTH 27032. Bodies, Objects, Cognition. 100 Units.
This course explores the differences between objects and embodiment as examined in varied historical periods and artistic genres. We will probe the ontological indeterminacy of embodied beings versus machines in terms of agency, autonomy, subjectivity, and artificiality. Our main operative mode is a visual-verbal comparison and its perception. Through discussions of such visual strategies as pareidolia, abstraction, bodyscape, as well as the scientific phenomena of cloning and humanoid robotics, the course will destabilize once fundamental epistemologies to present a cognitive moment when the traditionally stable object-body dichotomy is understood anew as a dynamic site of affective, biological, representational, and mechanical relations. Visual artists, writers and critics studied will include Leonardo da Vinci, Hans Holbein, Giuseppe Arcimboldo, Wassily Kandinsky, Kazimir Malevich, Tadeusz Borowski, Stanislaw Lem, Allan Teger, Magdalena Abakanowicz, W.T.J. Mitchell and others. All readings are in English.

Instructor(s): Bozena Shallcross
Terms Offered: Winter

Equivalent Course(s): ANTH 37032, ARTH 27032, REES 27032, REES 37032, KNOW 27032, KNOW 37032, ARTH 37032

ANTH 27116. Language and Migration: Individual, Social and Institutional Perspectives. 100 Units.
This class offers a broad range of perspectives on issues regarding language in the context of migration. For instance we analyze the ways in which language has been instrumentalized by Nation-States to regiment and restrain the mobility of targeted populations. We deconstruct the straightforward correlation between socio-
anthropology

Economic integration and language competence in discourse produced by politicians and some academics alike. We also analyze how different types of mobility (e.g., slavery, colonization, and free individual migration) produce, at different times, differing sociolinguistic dynamics.

ANTH 27170. Verbal Art. 100 Units.
This course introduces linguistic patterns of speech play and verbal art (SPVA), including parallelism, jokes, language games, sound symbolism, puns, ideophones, poetry, and other expressive strategies. We examine how speakers of indigenous and minority languages around the world use these strategies in everyday speech, and discuss how native intuitions and interpretations of SPVA data provide a key to understanding epistemologies, social identities, power and inequalities, and language ideologies. Through a humanistic and scientific lens, we will theorize how SPVA pushes the boundaries of iconicity, creativity, and variation. The everyday use of SPVA becomes central to understanding the language, culture, society, and individual nexus.
Instructor(s): Natalia Bermudez Terms Offered: Spring
Equivalent Course(s): LING 27170

ANTH 27216. Linguistic Anthropology of Education. 100 Units.
Students in this course will learn to think critically about the entangled roles of language and education in processes of sociocultural (re)production, that is, in how forms of social organization and collective meaning-making are produced and/or reproduced. Students will learn to analyze language use as a social activity: not merely as a code for referencing events in the world, but as a way of managing social relations. In reading about language in educational contexts, students will come to see how collectively held beliefs about language and language users inform moral, political, and often (de)racializing evaluations of better and worse ways of speaking, writing, teaching and learning, leading to differential educational opportunities, access, and outcomes. Education will be treated broadly, though there will be a focus on formal educational contexts. Nonetheless, the class will always challenge students to think about "the classroom," including our own, as continuous and contiguous with "the real world."
Instructor(s): Lily (Shenghe) Ye Terms Offered: Spring, Offered Spring 2023
Equivalent Course(s): CHDV 23012, EDSO 23012

ANTH 27430. Linguistic Politics: Language Revitalization. 100 Units.
Linguists and the general public have long been alarmed about the number of languages that disappear from use, and so are no longer spoken in the world. Their speakers shift to other languages. As part of the response, social groups have been mobilizing for many decades to prevent such lapses/losses and shifts in use and to document, revitalize, archive and mobilize the resources of communication. This course takes up the processes by which shift happens, asking what "language" is in these transformations; what and how linguistic forms, cultural values, and social institutions are involved and what social activism can or cannot accomplish in the "saving" of languages.
Instructor(s): Susan Gal
Equivalent Course(s): LING 27430

ANTH 27445. Whose Hybridity?: "Mixing" Language, Race, and Identity. 100 Units.
Throughout the modern world, members of racial, ethnic, and other groups perform their identities, in part, through the use of multiple languages or linguistic sub-varieties. It is a commonplace assumption that some of these performed identities-and their linguistic modes of expression-are "hybrid" or "mixed." Whether viewed as a cause for celebration or alarm, such assumptions often rely on the idea of previously "pure" things that were later made "hybrid." In various accounts in a range of media, "hybridity" spells the end of desirable ways of life, even the "natural order of things." In other accounts, "hybridity" is celebrated for producing novel relations between discrete categories, practices, and identifications. Yet upon closer inspection, even such supposedly "pure" categories themselves frequently turn out to be anything but "pure." This course will critically explore how "hybridity" is constructed as a matter of concern across a range of intellectual-, geopolitical-, cultural-, and media contexts. It focuses on language as a privileged marker of and resource in identity-construction, both self and other. This class uses theories and methods from anthropology, sociolinguistics, history, and sociology to explore how "hybridity" can be-and has been-used to construct social boundaries, exclusions, and erasures as much as solidarities, inclusions, and recognitions. The class focuses also on the material media in which these inclusions and exclusions are produced.
Instructor(s): Joshua Babcock Terms Offered: TBD
Equivalent Course(s): CRES 27535

ANTH 27450. Language Movements. 100 Units.
In this seminar course we explore various language movements-large-scale, social projects that take as their object of focus "language" and its protection, reform, purification, revitalization, standardization, and even invention. Surveying a range of historical and regional cases from around the world, we are particularly interested in the way in which different language movements conceptualize language itself, and how those reflexive ideologies of language both articulate particular political positions (and get hooked up into particular institutional forms) and, in their own often ironical ways, affect language structure, function, and use.
Instructor(s): Constantine V. Nakassis
Equivalent Course(s): LING 27450
ANTH 27511. Writing Space, Ethnographically. 100 Units.
Ethnographic renderings of spaces, surroundings, place, setting, and location have clearly always functioned as more than narrative set dressing. Critical perspectives on ethnographic research and writing have pointed out the authorization, exotification, and material conditions of mobility that undergird the ‘where’ in ‘being there’. However, contemporary anthropologists are writing space and place in ways that push ethnographic methods and writing past prior problematics and paradigms of comparison, localization, and totalizing description. How does space become an ethnographic doorway into questions of history, power, infrastructure, and affect?
Instructor(s): Kamala Russel

ANTH 27910. Virtual Ethnography: Encounters in Mediation. 100 Units.
From everyday social media platforms like Facebook, TikTok, Instagram, and WeChat, to more complex real-time immersive social and gaming sites, virtual realms are propagating at a fantastic rate while transforming what it means to live and interact in the physical world. As such virtual world, communities, and spaces increasingly command our attention, time, and money; scholars from various fields have begun to tackle questions concerning the ethics, logics, patterns, and social specificity of the virtual through experimental forms of virtual ethnography. This advanced undergraduate course introduces students to some of these recent ethnographies and corresponding theoretical interventions into the nature of collective techno-life within virtual realms. Students will build on this material in order to develop an ethnographic inquiry into a virtual world of their choosing. In so doing, they will work individually and as a class through the processes of pre-field planning, fieldwork, and post-field analysis and writing.
Instructor(s): Thomas Lamarre and Michael Fisch Terms Offered: Winter
Prerequisite(s): Consent of instructor required; email Professors Fisch and Lamarre a paragraph-long description about what you bring and what you hope to get out of this seminar.
Note(s): Enrollment limit: 25
Equivalent Course(s): MAAD 12910, EALC 27910, CDIN 27910, CMST 27910

ANTH 28110. Human Origins: Milestones in Human Evolution and the Fossil Record. 100 Units.
This course aims at exploring the fundamentals of human origins by tracking the major events during the course of human evolution. Starting with a laboratory-based general introduction to human osteology and muscle function, the latest on morphological and behavioral evidence for what makes Homo sapiens and their fossil ancestors unique among primates will be presented. Our knowledge of the last common ancestor will be explored using the late Miocene fossil record followed by a series of lectures on comparative and functional morphology, adaptation and biogeography of fossil human species. With focus on the human fossil record, the emergence of bipedalism, advent of stone tool use and making, abandonment of arboreality, advent of endurance walking and running, dawn of encephalization and associated novel life histories, language and symbolism will be explored. While taxonomic identities and phylogenetic relationships will be briefly presented, the focus will be on investigating major adaptive transitions and how that understanding helps us to unravel the ecological selective factors that ultimately led to the emergence of our species. The course will be supported by fresh data coming from active field research conducted by Prof. Alemseged and state of the art visualization methods that help explore internal structures. By tracing the path followed by our ancestors over time, this course is directly relevant to reconnoitering the human condition today and our place in nature.
Instructor(s): Z. Alemseged. L. Terms Offered: Autumn. Offered every other Autumn, even years.
Prerequisite(s): Three quarters of a Biological Sciences Fundamentals Sequence, or consent of Instructor.
Note(s): E.
Equivalent Course(s): ORGB 33265, BIOS 22265

ANTH 28400. Bioarchaeology and Forensic Anthropology: Approaches to the Past. 100 Units.
This course is intended to provide students with a thorough understanding of bioanthropological, osteological and forensic methods used in the interpretation of past and present behavior by introducing osteological methods and anthropological theory. In particular, lab instruction stresses hands-on experience in analyzing human remains, whereas seminar classes integrate bioanthropological theory and its application to specific archaeological and forensic cases throughout the world. At the end of this course, students will be able to identify, document, and interpret human remains from archaeological and forensic contexts. Lab and seminar-format classes meet each week.
Note(s): This course qualifies as a Methodology selection for Anthropology majors.
Equivalent Course(s): ANTH 38800, BIOS 23247, LACS 38400, LACS 28400

ANTH 29000. Signs of Crisis: Ethnographies of Self and Society in Turbulent Times. 100 Units.
Societies and "selves" make each other up. Under ordinary circumstances, we know intuitively what it means to live in the world. We don't think much about it, though, until things start falling apart. Maybe you suffer a trauma or an environmental disaster hits. Maybe the political system you took for granted all these years collapses, or from one day to the next, your money loses all of its value. In moments like these, and only in retrospect, your "life" and "the world" become coherent things you can talk about, as in, "My life is falling apart," or, "This must be the end of the world as we know it." Going further, you might wonder, "What is a world, exactly? What is it composed of? And now, as it is falling apart, how do we begin to imagine, and plan for, a new kind of future?
Instructor(s): J. Cole T. Edwards Terms Offered: Spring
Prerequisite(s): Completion of SOSC sequence Self, Culture and Society or Power, Identity Resistance is required.
Instructor consent required.
Note(s): Categories - undergrad B, C, D; grads: 2,3 NOT offered in 2023-24
Equivalent Course(s): CHDV 36200, CHDV 26200

ANTH 29003. Islam Beyond the Human: Spirits, Demons, Devils, and Ghosts. 100 Units.
This seminar explores the diverse spiritual and sentient lifeforms within Islamic cosmology that exist beyond the human—from jinn, angels, and ghosts to demons and devils. We will focus on theological, scientific, philosophical, anthropological, and historical accounts of these creatures across a variety of texts, as well as their literary and filmic afterlives in contemporary cultural representations. In so doing, we consider the various religious, social, and cultural inflections that shape local cosmological imaginaries. We ask how reflecting on the nonhuman world puts the human itself in question, including such concerns as sexuality and sexual difference, the boundaries of the body, reason and madness, as well as the limits of knowledge.
Instructor(s): Alireza Doostdar and Hoda El Shakry
Terms Offered: Autumn
Prerequisite(s): Enrollment by Consent Only (for both grads and undergrads). Students should send the instructors a paragraph explaining their interest and prior preparation or familiarity with the themes in the course.
Note(s): This course meets the LMCS or SCSR Committee distribution requirement for Divinity students.
Equivalent Course(s): GNSE 49003, ISLM 49003, CMLT 29003, ANTH 49003, GNSE 29003, RLST 29003, NEHC 29003, AASR 49003, NEHC 49003, KNOW 49003, CMLT 49003

ANTH 29700. Readings in Anthropology. 100 Units.
Independent research projects.
Instructor(s): Select section from pull down list under ANTH 29700 in the Time Schedule
Prerequisite(s): Consent of instructor and Director of Undergraduate Studies
Note(s): Students are required to submit the College Reading and Research Course Form. At the discretion of the instructor, this course is available for either a quality grade or for P/F grading.

ANTH 29900. Preparation of Bachelor's Essay. 100 Units.
Reading and Research course for Anthropology majors preparing to write a BA Essay.
Instructor(s): Select section from pull-down list under ANTH 29900 in the Time Schedule
Prerequisite(s): Consent of instructor and Director of Undergraduate Studies
Note(s): Students are required to submit the College Reading and Research Course Form. At the discretion of the instructor, this course is available for either a quality grade or for P/F grading. For honors requirements, see Honors section under Program Requirements.

ANTH 29910. Bachelor's Essay Seminar. 100 Units.
This seminar is designed to prepare fourth-year Anthropology majors to write a compelling BA thesis. To that end, the course is structured as a writing workshop that addresses three key issues: First, we will focus on formulating a viable research question that can be interrogated in a 40-50 page paper; second, we will examine core anthropological research methods, paying particular attention to the relationship between questions and evidence; finally, we will consider the writing process (including aspects such as planning, outlining, and drafting) and modes of argumentation. Along the way, participants will work toward producing a 20-page first draft.
Instructor(s): Staff
Terms Offered: Autumn Winter
Prerequisite(s): Open only to fourth year anthropology students currently writing BA Essays
Note(s): Open only to students currently writing BA honors papers.

ANTH 29920. Bachelor's Thesis Workshop. 100 Units.
This workshop is for fourth-year Anthropology majors writing a BA thesis.
Instructor(s): Staff
Terms Offered: Autumn
