The Big Problems courses that follow are among a growing number of capstone experiences offered as electives to third- and fourth-year students in the College.

"Big problems" are characteristically matters of global or universal concern that intersect with several disciplines and affect a variety of interest groups. They are problems for which solutions are crucially important but not obviously available.

Big Problems courses emphasize process as well as content: learning how to creatively confront difficult intellectual and pragmatic problems wider than one’s area of expertise and to consider how to deal with the uncertainty that results. This often points to the importance of working in groups. If the core curriculum provides a basis for learning and the majors develop more specialized knowledge, the Big Problems experience leads to the development of skills for thinking about and dealing with the important but unyielding issues of our time.

Big Problems courses use interdisciplinary team teaching, seeking to cross disciplines and divisions and to transcend familiar models of content and divisions and to build into our work a consideration of the digital form through which we are thinking and representing philosophical traditions and contextualize current issues and debates. We will also problematize the document with the goal of creating an annotated digital document to serve as a blueprint for steering humanity towards a more equitable and just -- and perhaps a more secure -- future. Annotations will draw on a broad array of cross-disciplinary perspectives, the course aims to illuminate the often misunderstood aspects of the digital age tech, online agency, algorithmic bias and the future of artificial intelligence, among other topics. Drawing on the nature of human existence itself increasingly uncertain. Digitizing Human Rights invites you to ponder, into the fabric of our existence, the lines between the virtual and the physical are increasingly blurred, and the development of skills for thinking about and dealing with the important but unyielding issues of our time.

Big Problems courses use interdisciplinary team teaching, seeking to cross disciplines and divisions and to transcend familiar models of content, organization, and instruction.

**BIG PROBLEMS COURSES OFFERED IN 2024–2025**

**BPRO 24050. Understanding Practical Wisdom. 100 Units.**
Thinking about the nature of wisdom goes back to the Greek philosophers and the classical religious sages, but the concept of wisdom has changed in many ways over the history of thought. While wisdom has received less scholarly attention in modern times, it has recently re-emerged in popular discourse with a growing recognition of its potential importance for addressing complex issues in many domains. But what is wisdom? It’s often used with a meaning more akin to "smart" or "clever." Is it just vast knowledge? This course will examine the nature of wisdom-how it has been defined in philosophy and psychological science, how its meaning has changed, and what its essential components might be. We will discuss how current philosophical and psychological theories conceptualize wisdom and consider whether, and how, wisdom can be studied scientifically; that is, can wisdom be measured and experimentally manipulated to illuminate its underlying mechanisms and understand its functions? Finally, we will explore how concepts of wisdom can be applied in business, education, medicine, the law, and in the course of our everyday lives. Readings will be drawn from a wide array of disciplines including philosophy, classics, history, psychology, behavioral economics, medicine, and public policy. The course will include lectures by philosophers and psychologists. This course is offered in association with the Chicago Moral Philosophy Project and the Good Life program (the Hyde Park Institute).

Instructor(s): A. Henly; H. Nusbaum

Terms Offered: Spring

Prerequisite(s): Third- or fourth-year standing.

Equivalent Course(s): CHDV 24050, PSYC 24060, RLST 24055, PSYC 34060

**BPRO 24193. Water Water Everywhere? 100 Units.**
This interdisciplinary course explores aesthetics, environmental racism, and a human rights approach to the Commons to inform our perspective on the politics and aesthetics of water from the local to the global. The course will look at issues of scarcity and abundance through the lenses of art and human rights. The course will incorporate work by artist Íñigo Manglano-Ovalle, who will visit the class. Students will consider works by other artists including Mel Chin, Allan Kaprow, LaToya Ruby Frazier, and Fazal Sheikh, to understand how art can confront the 21st century’s environmental challenges. Readings will include Susan Sontag’s Regarding the Pain of Others, and Fred Moten & Stefano Harney’s The Undercommons. The course will include visits to site specific installations by artists Íñigo Manglano-Ovalle and Mel Chin, and visits to Chicago-area natural sites such as the Big Marsh and Lake Michigan. This course is an extension of a collaborative project at the Gray Center for Arts and Inquiry with human rights lawyer Susan Gzesh, artist Íñigo Manglano-Ovalle, and curator Abigail Winograd.

Instructor(s): Susan Gzesh, Staff

Terms Offered: Autumn

Prerequisite(s): Third- or fourth-year standing.

Note(s): Students must attend first class to confirm enrollment.

Equivalent Course(s): CHDV 24050, PSYC 24060, RLST 24055, PSYC 34060

**BPRO 25900. Digitizing Human Rights. 100 Units.**
In an era in which disruptive technologies have hijacked our consciousness and computer code has woven itself into the fabric of our existence, the lines between the virtual and the physical are increasingly blurred, and the nature of human existence itself increasingly uncertain. Digitizing Human Rights invites you to ponder, question, and even reshape the future of the species. We’ll consider digital surveillance, data consent, access to tech, online agency, algorithmic bias and the future of artificial intelligence, among other topics. Drawing on cross-disciplinary perspectives, the course aims to illuminate the often misunderstood aspects of the digital age with the goal of creating an annotated digital document to serve as a blueprint for steering humanity towards a more equitable and just -- and perhaps a more secure -- future. Annotations will draw on a broad array of philosophical traditions and contextualize current issues and debates. We will also problematize the document itself to build into our work a consideration of the digital form through which we are thinking and representing
claims about humanity, morality, truth, and justice, for example, that are entailed in the project of "human rights."
The class will meet both in small groups and the larger seminar to refine the provisions and annotations, review
progress, and shape the document as a whole.
Instructor(s): J. Spruill, N. Briz Terms Offered: May be offered 2024-25
Prerequisite(s): PQ: Third- or fourth-year standing.
Equivalent Course(s): MAAD 25900, HMRT 25900

BPRO 26201. Sense & Sensibility & Science @UChicago. 100 Units.
In Sense & Sensibility & Science, you will learn how to better incorporate into your thinking and decision making
the problem-solving techniques of science at its best. Many insights and conceptual tools from scientific thinking
are of great utility for solving problems in your own day-to-day life and in a democracy. Yet, as individuals, as
groups, as whole societies we fail to take full advantage of these methods. The focus in this course is on the errors
humans tend to make, and the approaches scientific methodology has developed (and continues to develop) to
minimize those errors. The course includes a discussion of the nature of science, what makes science such an
effective way of knowing, how both non-scientific thinking and scientific thinking can go awry, and how we
can reason more clearly and successfully as individuals, as members of groups, and as citizens of a democracy.
The undergraduate course will be simultaneously taught at UC Berkeley, Harvard and UChicago in spring 2024,
with an opportunity for students from all three courses to participate remotely in the same deliberative polling
capstone experience. UChicago’s spring 2024 course premiers builds on a decade of experience developing and
the popular course at Berkeley and Harvard’s adoption of its own version in 2021.
Instructor(s): Reid Hastie; Jordan Kemp; Eamon Duede Terms Offered: Spring
Prerequisite(s): PQ: Third or fourth-year standing.
Equivalent Course(s): HIPS 26021, PBPL 26021, SOCS 26021, SCPD 26021, DIGS 26021

BPRO 26900. Communicating Science: For Peers and the Public. 100 Units.
Themes include state-of-the-art approaches and strategies for communicating and presenting science in
professional and public spheres, understanding how the public learns and experiences science, exploring the
interaction between science, art and society, discovering UC’s top historic science discoveries, and thinking anew
our campus science experience.
Instructor(s): Paul Sereno, Chana Haouzi, Jeremy Manier Terms Offered: Autumn
Prerequisite(s): PQ: Third or fourth-year standing.

BPRO 27100. Moving Objects, Dispersed Cultures: Case Studies from China and the Middle East. 100 Units.
In this course, we will delve into "big problems" created by the movement, relocation, or displacement of objects
that are assigned special cultural, artistic, and historical values in new contexts. We will follow the movement
of artifacts across both geographical and disciplinary boundaries, challenging established notions of cultural
heritage and art. We often study and read ancient texts as primary sources, but we don’t always pause to consider
that those texts were written on physical objects like pieces of wood, leaves, or animal skin. Similarly, we’re
familiar with the display of ancient artwork inside museums or galleries, but have we wondered about the
journey of individual objects to those new locations? How do objects move from their original place to modern
collections? How do they become art? And how do they become historical sources? Guided by an art historian
and a social historian, this course presents different ways to look at "objects that move", both as sources about
past societies and as mirrors for contemporary ones. Through studying examples from the history of China and
the Middle East, we will reconsider concepts such as cultural heritage, national patrimony, or even art that have
been taken for granted. We will learn about the different histories of the dispersal of cultural heritages in those
two regions, from nation-building and colonial projects in the twentieth century to the illicit trade in antiquities
and the creation of digital replicas today.
Instructor(s): Wei-Cheng Lir, Cecilia Falombo Terms Offered: Winter
Prerequisite(s): PQ: Third or fourth-year standing.

BPRO 27155. Urban Design with Nature. 100 Units.
This course will use the Chicago region as the setting to evaluate the social, environmental, and economic
effects of alternative forms of human settlement. Students will examine the history, theory and practice of
designing cities in sustainable ways - i.e., human settlements that are socially just, economically viable, and
environmentally sound. Students will explore the literature on sustainable urban design from a variety of
perspectives, and then focus on how sustainability theories play out in the Chicago region. How can Chicago’s
neighborhoods be designed to promote environmental, social, and economic sustainability goals? This course is
part of the College Course Cluster program: Urban Design.
Instructor(s): Sabina Shaikh and Emily Talen Terms Offered: Autumn
Note(s): This course counts towards the ENST 4th year Capstone requirement. Restricted to 3rd and 4th year
students
Equivalent Course(s): CHST 27155, CEGU 27155, PBPL 27156, ENST 27155, GISC 27155

BPRO 27200. Sensing the Anthropocene. 100 Units.
In this co-taught 3-week and in-person course between the departments of English (Jennifer Scappettone) and
Visual Arts (Amber Ginsburg), we will deploy those senses most overlooked in academic discourse surrounding
aesthetics and urbanism-hearing, taste, touch, and smell-to explore the history and actuality of Chicago as a
site of anthropogenic changes. Holding our classes entirely out of doors, we will move through the city seeking
out and documenting traces of the city's foundations in phenomena such as the colonization of the ancestral
homelands of the Three Fires Confederacy and trade routes of many other indigenous groups; the filling in of swamp; the redirection of the river; and the creation of transportation and industrial infrastructure—all with uneven effects on human and nonhuman inhabitants. Coursework will combine readings in history and theory of the Anthropocene together with examples of how artists and activists have made the Anthropocene visible and audible, providing forums for experimental documentation and annotations as we draw, score, map, narrate, sing, and curate and collate our sensory experience of the Anthropocene.

Instructor(s): J. Scappettone, A. Ginsburg Terms Offered: Autumn
Prerequisite(s): PQ: Third or fourth-year standing.
Equivalent Course(s): CHST 27200, ENST 27700, ENGL 27700, ENGL 47700, ARCH 22322, ARTV 22322, CEGU 27700, ARTV 32322

BPRO 27300. Harm Reduction in the Overdose Era. 100 Units.
We will discuss some of the debates around harm reduction, some of the cutting-edge harm reduction strategies, and the communities and populations most impacted by overdose and other related health conditions.
Instructor(s): Harold Pollack, John A. Schneider Terms Offered: Autumn
Prerequisite(s): PQ: Third and fourth-year standing.

BPRO 27450. Why aren’t humans replacing themselves? What are the consequences? 100 Units.
The human fertility rate has fallen in half in the last 50 years, and is below replacement in more and more countries. These declines imply that the human population on Earth will peak at roughly 12 billion around 2075. Will the human population stabilize or collapse after it peaks? Will human civilization survive? This course will examine this Big Question in depth. We will first review the data demonstrating the decline in total fertility rate in countries around the world, then consider the multitude of explanations that have been proposed for this decline. Next, we will explore the consequences for human well-being and civilization of population decline. Finally, we will investigate potential solutions to the problem, with an eye to the underlying causes of fertility decline. Students from a wide variety of fields are welcome, including those with knowledge of partial differential equations, data analysis, or programming skills, but no prior experience in demography or related areas. Students will write a final paper that examines a particular cause of fertility decline and critically evaluates it, providing the best evidence for and against it.
Instructor(s): Dorian Abbot, Anup Malani Terms Offered: Spring
Prerequisite(s): PQ: Third or fourth-year standing.

BPRO 28400. Thinking Psychoanalytically: From the Sciences to the Arts. 100 Units.
Since Freud’s seminal investigation into the nature of the mind, psychoanalytic thinking has offered a unique approach to unconscious, relational, and meaningful dimensions of human experience. Despite assaults on the field from numerous quarters, psychoanalytic thinking remains central to the work of practitioners across an array of disciplines. After an introduction to key psychoanalytic concepts including the unconscious, repression, and transference, we will investigate some of the ways in which these ideas are mobilized within clinical practice, neuroscience, anthropology, education, philosophy, literary studies, and the visual arts through a series of lectures presented by specialists from these fields. Along the way, we will gain an appreciation for some of the ways in which psychoanalytic perspectives continue to inspire a variety of current scientific and humanistic projects.
Instructor(s): A. Beal, Staff Terms Offered: Spring
Prerequisite(s): PQ: Third or fourth-year standing.
Equivalent Course(s): ANTH 24316

BPRO 28700. Alternate Reality Games: Theory and Production. 100 Units.
Games are one of the most prominent and influential media of our time. This experimental course explores the emerging genre of “alternate reality” or “transmedia” gaming. Throughout the quarter, we will approach new media theory through the history, aesthetics, and design of transmedia games. These games build on the narrative strategies of novels, the performative role-playing of theater, the branching techniques of electronic literature, the procedural qualities of video games, and the team dynamics of sports. Beyond the subject matter, students will design modules of an Alternate Reality Game in small groups. Students need not have a background in media or technology, but a wide-ranging imagination, interest in new media culture, or arts practice will make for a more exciting quarter.
Instructor(s): Patrick Jagoda, Heidi Coleman Terms Offered: Autumn
Prerequisite(s): PQ: Third- or fourth-year standing. Instructor consent required. To apply, submit writing through online form: https://forms.gle/QtRCKN6MJbIkteWy5; see course description. Once given consent, attendance on the first day is mandatory. Questions: mb31@uchicago.edu
Note(s): Note(s): English majors: this course fulfills the Theory (H) distribution requirement.
Equivalent Course(s): ENGL 32314, CMST 25954, CMST 35954, ARTV 20700, ENGL 25970, MAAD 20700, ARTV 30700, TAPS 28466

Big Problems Courses Offered in Previous Years
Any of these courses may be offered in the future.

BPRO 21500. What is Civic Knowledge? 100 Units.
What is civic knowledge? Although civic rights and duties are supposedly universal to all citizens in a "democratic" nation, their implementation often depends on the strength of community connections and the
circulation of knowledge across racial, class, and social boundaries. Focusing on the city of Chicago, we ask how citizens (in their roles as citizens) forge communities, make urban plans, and participate in civic affairs. How does the city construct the public spheres of its residents? Are the social practices of Chicagoans truly "democratic?" Could they be? What does "Chicago" stand for, as a political and cultural symbol? For both Chicagoans and their representatives, the circulation of knowledge depends not only on conventional media but also on how the city is constructed and managed through digital media.

Instructor(s): R. Schultz, M. Browning. Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): PHIL 21006, LLSO 24906, HUMA 24906, PBPL 21500

**BPRO 22300. Empire. 100 Units.**

Students in this course read a variety of texts (e.g., writings of Thucydides, Vergil, and Forster; documents from the caliphate of Andalusia; current articles). By viewing their own experiences in the light of Arab, British, Greek, and Roman empires, students reflect on America's role in the cultures and countries of the twenty-first century. Economics, language, culture, ecology, and social ethics may provide the lenses through which students view and review their experiences.

Instructor(s): Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing. Completion of the general education requirement in civilization studies through a College-sponsored study abroad program.
Equivalent Course(s): CLCV 28707, HUMA 22303

**BPRO 22400. The Ugly American Comes Home. 100 Units.**

The aims of this course are to interrogate not only the experience of studying abroad, but also the condition of coming "home" and facing a range of needs to assimilate and articulate your experience. We address being abroad and afterward through a range of reading materials, including travel writings, philosophies of education, and considerations of narrative and perception. Writing assignments will explicitly address the challenge of integrating study abroad with other forms of knowledge and experience that characterize collegiate education.

Instructor(s): J. Ketelaar, M. Merritt Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing; completion of a study abroad program (University of Chicago program, other institution's program, or self-structured program).
Equivalent Course(s): INST 22400

**BPRO 22612. Topics in Medical Ethics. 100 Units.**

Decisions about medical treatment and medical policy often have profound moral implications. Taught by three philosophers, a physician, and a medical lawyer, this course will examine such issues as paternalism, autonomy, informed consent, assisted suicide, abortion, organ markets, distributive justice in health care, and pandemic ethics. (A)

Instructor(s): D. Brudney; Staff Terms Offered: Not offered 2024-2025
Prerequisite(s): Third or fourth-year standing. This course does not meet requirements for the Biological Sciences major.
Note(s): Philosophy majors: this course fulfills the practical philosophy (A) requirement.
Equivalent Course(s): HLTH 21609, PHIL 21609, HIPS 21609

**BPRO 22700. Abortion: Morality, Politics, Philosophy. 100 Units.**

Abortion is a complex and fraught topic. Morally, a very wide range of individual, familial, and social concerns converge upon it. Politically, longstanding controversies have been given new salience and urgency by the Dobbs decision and the ongoing moves by state legislatures to restrict access to abortion. In terms of moral philosophy, deep issues in ethics merge with equally deep questions about the nature of life, action, and the body. In terms of political philosophy, basic questions are raised about the relationship of religious and moral beliefs to the criminal law of a liberal state. We will seek to understand the topic in all of this complexity. Our approach will be thoroughly intra- and inter-disciplinary, drawing not only on our separate areas of philosophical expertise but on the contributions of a series of guest instructors in law, history, and medicine. (A)

Instructor(s): Jason Bridges, Dan Bradney Terms Offered: Not offered in 2024-2025
Prerequisite(s): PQ: Third or fourth-year standing. Students should opt into a discussion section that fits their schedule.
Note(s): Philosophy majors: this course fulfills the practical philosophy (A) requirement.
Equivalent Course(s): HMRT 22702, PHIL 22702, HLTH 22700, HIPS 22701, GNSE 22705

**BPRO 22800. Drinking Alcohol: Social Problem or Normal Cultural Practice? 100 Units.**

Alcohol is the most widely used psychoactive agent in the world, and, as archaeologists have recently demonstrated, it has a very long history dating back at least 9,000 years. This course will explore the issue of alcohol and drinking from a trans-disciplinary perspective. It will be co-taught by an anthropologist/archaeologist with experience in alcohol research and a neurobiologist who has experience with addiction research. Students will be confronted with literature on alcohol research from anthropology, sociology, history, biology, medicine, psychology, and public health and asked to think through the conflicts and contradictions. Selected case studies will be used to focus the discussion of broader theoretical concepts and competing perspectives introduced in the first part of the course. Topics for lectures and discussion include: fermentation and the chemistry and pharmacology of alcohol; the early history of alcohol; histories of drinking in ancient, medieval, and modern times; alcohol and the political economy; alcohol as a cultural artifact; styles of drinking
BPRO 22900. People in Motion: Rethinking Transit in Chicago and Beyond. 100 Units.
How do you get from A to B? Within and between today’s urbanized areas, that seemingly simple question has become one of the most fraught and intractable problems. This course seeks to address questions about public transit across scales, from pedestrian and bicycle infrastructure at the level of individual intersections and blocks up to regional train networks and beyond. Like other design studio courses, the class will be project-based, and will ask students to develop a wide understanding of existing systems, but also to learn through creative design projects that expand their sense of what’s possible. After working together to understand many existing transit solutions across different scales, to come to terms with and document Chicago’s transit landscape, and to dream speculatively about untested transit possibilities both low- and high-tech, students will focus on building a portfolio of creative suggestions for their respective “clients” (e.g., the University of Chicago, the 4th Ward Alderman). Alongside this project work, assigned readings and explorations around Chicago will immerse students in the culture and philosophy of moving people and things, across different moments past, present and future.
Instructor(s): E. Carver, L. Joyner Terms Offered: Winter
Prerequisite(s): Third or fourth-year standing
Note(s): This course counts towards the ENST/CEGU 4th year Capstone requirement. While this class does not require prior experience, all ARCH studio courses require consent. Starting November 6, please visit arthistory.uchicago.edu/archconsent to request instructor consent for this class or other ARCH studios. (Please do not send consent requests by email.)
BPRO 23760. The Social Brain: Social Isolation and Loneliness. 100 Units.
The past two decades have witnessed a remarkable rise in the number of investigations published on the social brain. The discoveries conveyed by the titles of many of these reports (e.g., the neural basis of love, altruism, morality, generosity, trust) have piqued the interest of young investigators, funding agencies, the media, and laypeople alike. Such attention is a double-edged sword, however, as errors are exaggerated in importance, and oversimplifications create false expectations and, ultimately, disillusionment in what the field can contribute. It is, of course, one thing to assume that neural processes underlie all psychological phenomena, it is another to claim that a given brain region is the biological instantiation of complex psychological functions like the self, empathy or loneliness. The purpose of this course is to examine opportunities and challenges in this field primarily through research on two of the most important topics in the field: social isolation and empathy.
Instructor(s): J. Cacioppo, L. Hawley Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing. This course does not meet requirements for the biological sciences major.
Equivalent Course(s): BIOS 29324, PSYC 23760

BPRO 23800. The Affect System. 100 Units.
The term "affect" typically refers to feelings beyond those of the traditional senses, with an emphasis on the experience of emotions and variations in hedonic tone. The structure and processes underlying mental contents are not readily apparent, however, and most cognitive processes occur unconsciously with only selected outcomes reaching awareness. Over millions of years of evolution, efficient and manifold mechanisms have evolved for differentiating hostile from hospitable stimuli and for organizing adaptive responses to these stimuli. These are critically important functions for the evolution of mammals, and the integrated set of mechanisms that serve these functions can be thought of as an "affect system." It is this affect system-its architecture and operating characteristics, as viewed from neural, psychological, social, and political perspectives-that is the focus of the course.
Instructor(s): J. Cacioppo, E. Oliver, S. Cacioppo Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): PSYC 23880, PLSC 23810

BPRO 23900. Biological and Cultural Evolution. 100 Units.
This course draws on readings in and case studies of language evolution, biological evolution, cognitive development and scaffolding, processes of socialization and formation of groups and institutions, and the history and philosophy of science and technology. We seek primarily to elaborate theory to understand and model processes of cultural evolution, while exploring analogies, differences, and relations to biological evolution. This has been a highly contentious area, and we examine why. We seek to evaluate what such a theory could reasonably cover and what it cannot.
Instructor(s): W. Wimsatt, S. Mufwene Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing or consent of instructor required; core background in evolution and genetics strongly recommended.
Equivalent Course(s): CHDV 23930, CHDV 33930, LING 39286, HIPS 23900, ANTH 38615, NCDV 27400, PHIL 22500, PHIL 32500, CHSS 37900, ANTH 28615, LING 11100

BPRO 24000. Understanding Wisdom. 100 Units.
Thinking about the nature of wisdom goes back to the Greek philosophers and the classical religious sages, but the concept of wisdom has changed in many ways over the history of thought. While wisdom has received less scholarly attention in modern times, it has recently re-emerged in popular discourse with a growing recognition of its potential importance for addressing complex issues in many domains. But what is wisdom? It’s often used with a meaning more akin to “smart” or “clever.” Is it just vast knowledge? This course will examine the nature of wisdom-how it has been defined, how its meaning has changed, and what its essential components might be. We will examine how current psychological theories conceptualize wisdom and consider whether, and how, wisdom can be studied scientifically; that is, can wisdom be measured and experimentally manipulated to illuminate its underlying mechanisms and understand its functions? Finally, we will explore how concepts of wisdom can be applied in business, education, medicine, the law, and in the course of our everyday lives. Readings will be drawn from a wide array of disciplines including philosophy, classics, history, psychology, behavioral economics, medicine, and public policy.
Instructor(s): A. Henly, H. Nusbaum Terms Offered: Not offered in 2024-2025
Note(s): See PSYC 24055 The Psychological Foundations of Wisdom.
Equivalent Course(s): PSYC 24050, HUMA 24005, RLST 24050

BPRO 24100. Science and Religion. 100 Units.
In this course, we explore some aspects of the relations between science and religion in Western culture (e.g., Christian, Jewish, Islamic). Questions include: What are science and religion? Are they competing intellectual systems for making sense of the world? What are social institutions? Can they be in conflict with one another? Can they support one another? Each of the instructors treats these questions by examining certain historical episodes and texts to add different perspectives to the material.
Instructor(s): Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
BPRO 24150. Romantic Love: Cultural, Philosophical, and Psychological Aspects. 100 Units.
This double-credit course combines humanistic and social scientific disciplines to examine the phenomenon of romantic love-a "big problem" in practical, theoretical, and cultural senses. The course starts by comparing representations of romantic love experiences in visual, musical and literary arts and myths. After exploring what may be specific to this form of love, we address two further issues: the role and sources of non-rational experience in romantic love, and the role of romantic love in modern marriage. Illumination of these topics is sought through the discussion of humanistic and social scientific texts and cinematic presentations.
Instructor(s): D. Orlinsky, Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Note(s): The class meets for six hours a week.
Equivalent Course(s): HUMA 24150, CHDV 24150, GNSE 24150

BPRO 24200. Psychoneuroimmunology. 100 Units.
This course covers all aspects of neuroimmunoendocrinology at the molecular, cellular, and organismal and social levels.
Instructor(s): M. McClintock, J. Quintans Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Note(s): This course does not meet requirements for the biological sciences major.
Equivalent Course(s): BIOS 02370, PSYC 34100, BPRO 44140, PSYC 24150

BPRO 24500. Language and Globalization. 100 Units.
Globalization has been a buzz word in our lives over the past few decades. It is also one of those terms whose varying meanings have become more and more challenging to characterize in a uniform way. The phenomena it names have been associated with important transformations in our cultures, including the languages we speak. Distinguishing myths from facts, this course articulates the different meanings of globalization, anchors them in a long history of socioeconomic colonization, and highlights the specific ways in which the phenomena it names have affected the structures and vitalities of languages around the world. We learn about the dynamics of population contact in class and their impact on the evolution of languages.
Instructor(s): S. Mufwene Terms Offered: Not offered in 2024-2025
Equivalent Course(s): ANTH 47905, ANTH 27705, CRES 37500, CRES 27500, LING 27500, LING 37500

BPRO 24600. Moments in Atheism. 100 Units.
Atheism is as old as religion. As religion and its place in society have evolved throughout history, so has the standing and philosophical justification for non-belief. This course examines the intellectual and cultural history of atheism in Western thought from antiquity to the present. We are concerned with the evolution of arguments for a non-religious worldview, as well as with the attitude of society toward atheism and atheists.
Instructor(s): S. Bartsch, Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): CLCV 22400, RLST 25200, HIST 29402

BPRO 24800. Complex Problem: World Hunger. 100 Units.
Few of our policymakers are experts in economics, agronomy, food science, and molecular biology, yet all of these disciplines are essential for developing strategies to end world hunger. Choosing one country as a test case, we look at the history, politics, governmental structure, population demographics, and agricultural challenges. We then study the theory of world markets, global trade, and microeconomics of developing nations, as well as the promise and limitation of traditional breeding and biotechnology.
Instructor(s): J. Malamy, Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): ENST 24800, SOSC 26900, BIOS 02810

BPRO 24900. Biology and Sociology of AIDS. 100 Units.
This interdisciplinary course deals with current issues of the AIDS epidemic.
Instructor(s): H. Pollack, J. Schneider Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Note(s): This course does not meet requirements for the biological sciences major.
Equivalent Course(s): BIOS 02490, SSAD 65100

BPRO 25000. Images of Time: Japanese History Through Film. 100 Units.
Focusing attention on the emerging nexus between audio-visual media and historical studies, this course deals with theories of time, history, and representation while making those ideas and problems concrete through a study of the way in which history in Japan has been mediated by the cinema. A close reading of a wide range of films produced in and about Japan in tandem with primary and secondary materials on theories of time, images, and national history highlights the historicity and history of both film and Japan. All work in English.
Instructor(s): J. Ketelaar, Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing required; knowledge of Japanese not required.
Equivalent Course(s): HIST 24603, CMST 24906, ÉALC 24601

BPRO 25100. Evolutionary Theory and Its Role in the Human Sciences. 100 Units.
The course's aim is two-fold: (1) an examination of the origins and development of Darwin's theory from the early nineteenth century to the present; and (2) a selective investigation of the ways various disciplines of the
human sciences (i.e., sociology, psychology, anthropology, ethics, politics, economics) have used evolutionary ideas.

Instructor(s): R. Richards, Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): HIST 25004, PHIL 25123, HIPS 25801

**BPRO 25200. Body and Soul: Approaches to Prayer. 100 Units.**

Why do we pray? Why do we experience prayer practice as reaching out towards an intentional being whom we cannot (except in representation) touch, see, or hear? This course approaches an answer to that question by looking at the way we pray, particularly in a Christian context. What kinds of bodily engagement do we find in prayer; what impact might prayer practice have upon our bodies; what bodily features of prayer might help to explain why its practice has been so compelling to so many for so many years?

Instructor(s): Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): RLST 28800

**BPRO 25400. Jews and Christians in the Middle East. 100 Units.**

Minorities around the world today invite questions about the prospects of pluralism and tolerance in modern societies. This course will explore these long-studied questions by examining the case of Jews and Christians in the Middle East, as well as its tangled histories with Muslims and Jews in Mediterranean Europe. Co-taught by a historian of Jews in Iraq and an anthropologist of Copts in Egypt, we will explore histories and ethnographies to consider the political, social, and religious dimensions of minority communities. Our syllabus also blends various literary genres and forms of media with academic scholarship to explore various voices in the conversation about Jews and Christians in the Middle East from novels, films, and poetry to theological tracts and political treatises. We raise the following questions throughout our course: What terms for coexistence have governed Jews, Christians, and Muslims in the Mediterranean? How are religious practices and traditions linked to histories of rule? How do ideologies (e.g., nationalism, secularism, communism) shape the way minorities understand themselves and how society understands them?

Instructor(s): O. Bashkin, A. Heo Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): NEHC 20585, RLST 20231, JWSC 26215

**BPRO 25500. Art and Human Rights. 100 Units.**

This seminar-style course will explore historical and contemporary interventions in visual and performative artistic practices with human rights. Co-taught by a historian and theater-maker, the course will consider various paradigms for looking at how artists work on human rights. Course work will include critical readings, viewings of artistic work, and direct conversations with artists. Students will also participate in a multi-day summit on campus (April 29-May 2) that will bring distinguished artists from throughout the world to address the question "What is an artistic practice of human rights, conceptually, aesthetically and pragmatically?" Students will be given the option to produce either an academic or artistic final project.

Instructor(s): M. Bradley, L. Buxbaum Danzig Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): ARTV 20009, HMRT 25502, HIST 29906, TAPS 25510

**BPRO 25600. How Does It Feel to Be an Outlier? Narratives of Medical 'Otherness'. 100 Units.**

Ideas of what is "normal" and what is "different" are fundamental organizing concepts in scientific and humanistic thinking. Writers in both the sciences and the humanities use these concepts particularly when constructing narratives about how individuals experience selfhood and the world. This course examines a body of writings that depict the lives of those who identify, or are identified, as outliers. Students will approach this topic through medical case studies; through autobiographies and biographies about the experience of being physical or mental exceptions; and through writings by and about doctors, patients, medical researchers, and people who are the subjects of medical research. How do scientists, biographers, journalists, and others capture the experience of being different? What are the aims of outlier narratives? What ethical questions surround these writings? How do such narratives underscore or undercut concepts of what is "normal" and what is "different"?

In addition to surveying the landscape of outlier literature, students will research and write an outlier narrative in the form of a medical case study, biography, journalistic profile, or memoir.

Instructor(s): P. Mason, N. Titone Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): ENGL 25613, ENGL 45613

**BPRO 25700. What Does It Mean to be Free to Speak? 100 Units.**

The idea of freedom of speech possesses tremendous political and cultural power in global discourses about what it means to live a good life in a good society. It is considered an indispensable precondition for the flourishing of the sciences and the arts, as well as for the proper functioning of democracy. Courts interpret freedom of speech as one of the core liberal rights. Public and private institutions like the University of Chicago proclaim a commitment to freedom of speech. And claims about the importance of freedom of speech pepper public discourse. But what does it mean to be free to speak? This course will explore this question historically, philosophically, and ethnographically. Students will learn about the fundamental sociality of human beings and think collectively about the implications that the indissoluble and necessary entanglement with others has for
developing an inner life, the generation of ideas, and the willingness to articulate these ideas within various social contexts. Students will also learn about the different ways in which freedom of speech and thought has been understood over time, and the concrete political and social struggles that have shaped the development of ideas about freedom of speech. Class discussion will also explore how institutional arrangements shape ideas and practices of free speech.

Instructor(s): A. Glaeser, G. Lakier
Terms Offered: Not offered in 2024-2025
Prerequisite(s): PQ: Third- or fourth-year standing
Equivalent Course(s): HIST 25424, SIGN 26031, ENGL 26030

BPRO 26500. Memory, Commemoration & Mourning. 100 Units.
This course focuses on the manner in which we make use of the past, the personal past, the collective past, and the place of social and historical change in retelling and rewriting life-history and history. The course begins with a discussion of memory, conceptions of the personal and historic past, and such related issues as nostalgia, mourning, and the significance of commemoration in monument and ritual. These issues are explored in a number of topics such as twentieth-century war memorials, high school and college reunions, and the Holocaust and its representation in contemporary European society.

Instructor(s): Staff
Terms Offered: Not offered in 2024-2025
Equivalent Course(s): HIST 28102, FNDL 23312, PSYC 25450, CHDV 27102, AASR 30001

BPRO 26600. Globalization: History and Theory. 100 Units.
This course makes sense of globalization as a historical phenomenon focusing primarily on the long twentieth century, but with a look back into the “deep history” of the making of the contemporary world. While the course has a theoretical bent, it should be taken as an introduction into modern history. It has three goals in particular: (1) It introduces the main concepts and theories of globalization. (2) It explores key moments, processes, and events in the annals of globalization. (3) It highlights the nature of contentions over the terms of global order.

Instructor(s): M. Geyer, Staff
Terms Offered: Not offered in 2024-2025

BPRO 26400. Movies and Madness. 100 Units.
We propose to investigate representations of madness in fictional, documentary, and experimental film. We divide the topic this way to emphasize the different dimensions of cinematic address to questions of mental illness, and the ways that film genres imply distinct formal and epistemological conventions for the representation of insanity. Documentary ranges from instructional and neutral reportage, to polemical, essayistic interventions in the politics of psychiatry and the asylum, the actual conditions of mental illness in real historical moments. Documentary also includes the tendency in new media for “the mad” to represent themselves in a variety of media. With experimental film, our aim will be to explore the ways that the cinematic medium can simulate experiences of mania, delirium, hallucination, obsession, depression, etc., inserting the spectator into the subject position of madness. We will explore the ways that film techniques such as shot-matching, voice-over, montage, and special effects of audio-visual manipulation function to convey dream sequences, altered states of consciousness, ideational or perceptual paradoxes, and extreme emotional states. Finally, narrative film we think of as potentially synthesizing these two strands of cinematic practice, weaving representations of actual, possible, or probable situations with the special effects of mad subjectivity. Our emphasis with narrative film will be to focus-not simply on the mentally ill subject as hero.

Instructor(s): W. J. T. Mitchell, J. Hoffman
Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): ENGL 38703, ARTV 36411, ENGL 28703, ARTV 26411, CMST 35550, ARTH 36905, CMST 25550, ARTH 26905

BPRO 26500. Picturing Words/Writing Images (Studio) 100 Units.
What is the relationship between reading and looking? Images in mind and images on paper-words in mind and on the page-we will explore the intersection of these different ways to think, read, and look, as we make poems, drawings, paintings, etc., in class. We will investigate the problem of representing language as it is expressed in the work produced in class. Studying works by contemporary visual artists like Jenny Holzer and Ann Hamilton, and practicing poets such as Susan Howe and Tom Phillips will inform our investigation. The course will feature visits to our studio by contemporary poets and visual artists, who will provide critiques of student work and discussion of their own ongoing projects. These visitors will help to frame our artistic and literary practice within the ongoing conversation between word and image in modern culture. We will ask, what are the cognitive, phenomenological, social, and aesthetic consequences of foregrounding the pictorial/visual aspect of alphabetical characters? (C, H)
Instructor(s): J. Stockholder, S. Reddy Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing. Previous experience in an arts studio or creative writing course recommended, but not required.
Equivalent Course(s): CMST 26801, HUMA 26600

BPRO 26600. Antonioni’s Films: Reality and Ambiguity. 100 Units.
In this in-depth study of several Antonioni films, our eye is on understanding his view of reality and the elements of ambiguity that pervade all of his films. Together, as a film scholar and physicist, we bring out these aspects of his work together with his unique cinematic contributions. This course introduces students to this poet of the cinema and the relevance of Antonioni’s themes to their own studies and their own lives.
Instructor(s): Staff Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): ARTH 28904, CMST 26801, HUMA 26600

BPRO 26700. Mythical History, Paradigmatic Figures: Caesar, Augustus, Charlemagne, Napoleon. 100 Units.
What is the process by which some historical figures take on mythical proportions? This course examines four case studies of conquerors who attained sovereign power in times of war (conquest, civil war, revolution), who had a foundational role in empire-building, and who consciously strove to link themselves to the divine and transcendent. Their immense but ambiguous legacies persist to this day. Although each is distinct as a historical individual, taken together they merge to form a paradigm of the exceptional leader of epic proportions. Each models himself on exemplary predecessors: each invokes and reinvents myths of origin and projects himself as a model for the future. Basic themes entail mythic history, empire, the exceptional figure, modernity’s fascination with antiquity, and the paradox of the imitability of the imitable.
Instructor(s): M. Lowrie, R. Morrissey Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): CLCV 26713, SCTR 30411, FREN 26701, ARTH 36713, ENGL 36701, FNDL 22912

BPRO 26750. Anxiety. 100 Units.
The phenomenon of anxiety emerged as one of the leading psychological disorders of the 20th and 21st centuries. Worrying ourselves into the realm of the pathological, we now have a requisite measure of anxiety for every prescribed stage of life. But why are we so anxious? Considering its prevalence in everyday life, the concept and theories of anxiety have been employed surprisingly seldom as a way into film, fiction, and art. In this course we examine the modern origin of contemporary discourses specific to anxiety and their unique manifestation in cultural artifacts. To understand the complex of anxiety in the so-called Western world, we rely on the theories of Søren Kierkegaard, Martin Heidegger, Sigmund Freud, Jacques Lacan, and Alenka Zupančič; fiction by Stoker, Schnitzler, Kafka, and Sebald; and film by Haneke, Kubrick, Ophuls, and Hitchcock. We will also have guest speakers from the fields of clinical psychiatry, geriatric medicine, philosophy, and comparative anthropology.
Instructor(s): M. Sternstein, A. Flannery Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Note(s): English majors: This course fulfills the Theory (H) distribution requirement.
Equivalent Course(s): GRMN 26715, MAPH 26750, ENGL 24260

BPRO 26800. How Literature Thinks: Contemporary Writers on Big Problems. 100 Units.
Big Problems’ have affective dimensions that not only complicate our thinking about issues like climate change or income inequality but pose “big problems” of their own: apathy, depression, boredom, paranoia. Literature invites us to reflect on these affective states and their social repercussions while also expanding the forms of feeling and knowing available to us. How do novels, poems, and memoirs explore the connections between emotion, understanding, and individual and collective action? Can criticism help us to see those connections? In this course, we will read the work of contemporary writers who explore a variety of pressing questions. Authors will include celebrated novelists and poets visiting the University, University of Chicago faculty in Creative Writing, and award-winning local authors. These writers will visit our class to share their views on how literature “thinks” in generative ways. Readings of contemporary novels, poetry, and nonfiction will be supplemented by theoretical texts that illuminate the affective, epistemological, and political dimensions of artistic responses to
social crises. Assignments will include both creative and critical writing exercises, attendance at literary events, and a final (creative, critical, or creative/critical hybrid) project. No prior creative writing experience is required.

Instructor(s): S. Reddy, S. Ngai
Terms Offered: Not offered in 2024-2025
Prerequisite(s): PQ: Third- or fourth-year standing
Equivalent Course(s): ENGL 26880, ENGL 36880

BPRO 27000. Perspectives on Imaging. 100 Units.
Taught by an imaging scientist and an art historian, this course explores scientific, artistic, and cultural aspects of imaging from the earliest attempts to enhance and capture visual stimuli through the emergence of virtual reality systems in the late twentieth century. Topics include the development of early optical instruments (e.g., microscopes, telescopes), the invention of linear perspective, the discovery of means to visualize the invisible within the body, and the recent emergence of new media. We also consider the problem of instrumentally mediated seeing in the arts and sciences and its social implications for our image-saturated contemporary world.

Instructor(s): P. La Riviere, Staff
Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Note(s): This course does not meet requirements for the biological sciences major.

BPRO 27500. Reimagining Our Future: Past, Present & Future of Campus-Neighborhood Relations. 100 Units.
The history, current status, and future of three neighborhoods adjacent to campus (Hyde Park, Washington Park, and Woodlawn) are the focus of this ground-breaking course that could not be offered at a more pivotal time. How have these neighborhoods and their relationship with campus evolved, what is their character and current status as healthy communities, and what actionable propositions are in play or could be considered for continued revitalization and positive campus interaction? Given that change on the horizon is inevitable, how best to protect current residents from displacement or other negative consequences?

Instructor(s): P. Sereno, C. Skrable
Terms Offered: Spring. May be offered in 2024-2025
Prerequisite(s): PQ: third or fourth-year standing. Students should opt into a discussion section that fits their schedule.
Equivalent Course(s): RDIN 27500, PARR 27500, PBPL 27500, CHST 27500

BPRO 27600. Creation and Creativity. 100 Units.
This seminar explores several creation stories from anthropological, literary, philosophical, and psychological perspectives. We compare the accounts of the beginning in Genesis, Hesiod's Theogony, Ovid's Metamorphoses, Bhagavad Gita, the Maya's Popol Vuh, and other sources, including Native American ones. We explore the ways cosmic creation has been imagined in world culture. We also delineate human literary creativity and ask about the relationship between individual creativity and the cultural myths of creation. We consider at least one modern theory of the beginning of the universe.

Instructor(s): Staff
Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third or fourth-year standing
Equivalent Course(s): ANTH 27610

BPRO 27800. Science and Christianity. 100 Units.
Both Christianity and science have had a critical impact on the development of Western society. Can they continue to flourish, enriching each other, or are they fundamentally at odds and in competition? This seminar will examine the major points of potential tension and synergy between science and Christianity, with the goal of open discussion and an eye on helping students develop their own ideas. We will consider themes such as evolution, extraterrestrial intelligence, consciousness, and particulars of the Christian faith.

Instructor(s): D. Abbot, D. Fabrycky, L. Schweitz
Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): RLST 27801
BPRO 27900. Climate Change in Media and Design. 100 Units.
If meteorological data and models show us that climate change is real, art and literature explore what it means for our collective human life. This is the premise of many recent films, novels, and artworks that ask how a changing climate will affect human society. In this course, we will examine the aesthetics of climate change across media, in order to understand how narrative, image, and even sound help us witness a planetary disaster that is often imperceptible. Rather than merely analyzing or theorizing various futures, this course will prepare students in hands-on methods of "speculative design" and "critical making." Each Tuesday, we will study how art and literature draw on the specific capacities of written and visual media to represent climate impacts, and how new humanities research is addressing climate change. Each Thursday, we will participate in short artistic exercises that explore futures of each area. These exercises include future object design, bodymapping and story circles, tabletop gameplay, and serious game design. Throughout the quarter, guest speakers from across the humanities, sciences, and social sciences will visit the class to speak about how their disciplines are working to understand and mitigate climate impacts. The most substantial work of the quarter will be an ambitious multimedia or transmedia project about one of the core course topics to be completed in a team.
Instructor(s): P. Jagoda, B. Morgan Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): MAAD 21900, ENST 27900, ENGL 27904, CEGU 27900, CMST 27814

BPRO 28000. Disability and Design. 100 Units.
Disability is often an afterthought, an unexpected tragedy to be mitigated, accommodated, or overcome. In cultural, political, and educational spheres, disabilities are non-normative, marginal, even invisible. This runs counter to many of our lived experiences of difference where, in fact, disabilities of all kinds are the "new normal." In this interdisciplinary course, we center both the category and experience of disability. Moreover, we consider the stakes of explicitly designing for different kinds of bodies and minds. Rather than approaching disability as a problem to be accommodated, we consider the affordances that disability offers for design. This course begins by situating us in the growing discipline of Disability Studies and the activist (and intersectional) Disability Justice movement. We then move to four two-week units in specific areas where disability meets design: architecture, infrastructure, and public space; education and the classroom; economics, employment, and public policy; and aesthetics. Traversing from architecture to art, and from education to economic policy, this course asks how we can design for access.
Instructor(s): J. Mcdonagh, V. Tran Terms Offered: Not offered in 2024-2025
Prerequisite(s): Third- or fourth-year standing
Equivalent Course(s): ENGL 28200

BPRO 28100. Narrating Migration. 100 Units.
Human migration is one of the most pressing global problems of our time, though it is not a new phenomenon. It has shaped societies throughout time, and the degree to which it is perceived as a "problem" or an "opportunity" changes radically according to circumstances and ideologies. In this course, we will analyze the different ways in which migration has been perceived, understood, and experienced. We will focus on two intense episodes in the global history of migration: migration from early nineteenth-century Britain; and migration to late 20th and 21st-century America. Our emphasis throughout will be on the ways in which migration is narrated: the stories that have shaped societies throughout time, and the degree to which it is perceived as a "problem" or an "opportunity". We will study how art and literature draw on the specific capacities of written and visual media to represent climate impacts, and how new humanities research is addressing climate change. Each Thursday, we will participate in short artistic exercises that explore futures of each area. These exercises include future object design, bodymapping and story circles, tabletop gameplay, and serious game design. Throughout the quarter, guest speakers from across the humanities, sciences, and social sciences will visit the class to speak about how their disciplines are working to understand and mitigate climate impacts. The most substantial work of the quarter will be an ambitious multimedia or transmedia project about one of the core course topics to be completed in a team.

BPRO 28200. What is Enlightenment? 100 Units.
What is enlightenment? How does one become enlightened, and who is enlightened? In Euro-American civilization, the eighteenth-century Age of Enlightenment championed the powers of human reason against religion and superstition to achieve scientific progress. Buddhism in the nineteenth century was represented by the heirs of Enlightenment as a religion for the Enlightenment to the point of not being a religion at all. Both traditions offer pathways to freedom (or liberation?) that draw on our rational capabilities, and both sponsor the production of knowledge that re-visions our place in the world. But they seem to be opposed: how could reason reject "religious" beliefs but also take part in "religious" traditions that aim to bring certain kinds of persons into being? We compare the mental models, discourses, methods of analysis, world-images, and practices of these traditions of enlightenment to assess the kinds of disciplines that their theoreticians and practitioners acquire and use.

**BPRO 28500. Sex and Ethics. 100 Units.**

Sex is a big problem. How do we think about sex in proximity to considering the ethics of risk, harm, and the potential for good? Developing an account specifically of an ethics of sex requires thinking about the place of sex and sexual vulnerability in social life with an eye toward understanding what's good and what might count as abuses, violations, disruptions, or deprivations of specifically good things about sex. In popular discussion, for example, "consent" often demarcates ethically good sex from bad sex. This course inquires whether consent is an adequate metric for sexual ethics; if it is necessary or sufficient; if certain factors (e.g., age, gender, violence) vitiate its normative force; and whether its legal definition conflicts, coheres with, or contributes to its general cultural reception. These issues require us to think about the ways people do, do not, and cannot know what they're doing in sex, and complicate the aspiration to have an ethics in proximity to sex. This year's version of the course focuses on political theory/policy/popular scandal in relation to aesthetics and sex theory archives. We talk about sex in proximity to modes of comportment in love, scandal, prostitution, stranger intimacy, political freedom and discipline, impersonality, and experimentality.

Instructor(s): M. Friedner, J. Iverson  
Terms Offered: Winter  
Prerequisite(s): Third- or fourth-year standing  
Equivalent Course(s): MAAD 28300, CHDV 28301, MUSI 35719, HLTH 28301, MUSI 25719, CHDV 38301

**BPRO 28800. From Fossils to Fermi's Paradox: Origin and Evolution of Intelligent Life. 100 Units.**

The course approaches Fermi's question, "Are we alone in the universe?", in the light of recent evidence primarily from three fields: the history and evolution of life on Earth (paleontology), the meaning and evolution of complex signaling and intelligence (cognitive science), and the distribution, composition and conditions on planets and exoplanets (astronomy). We also review the history and parameters governing extrasolar detection and signaling. The aim of the course is to assess the interplay between convergence and contingency in evolution, the selective advantage of intelligence, and the existence and nature of life elsewhere in the universe - in order to better understand the meaning of human existence.

Instructor(s): P. Sereno; L. Rogers; S. London  
Terms Offered: Not offered in 2024-2025  
Prerequisite(s): PQ: Third or fourth-year standing. This course does not meet the requirements of the Biological Sciences major.

**BPRO 28900. Inequality: Origins, Dimensions, and Policy. 100 Units.**

For the last four decades, incomes in the United States and across the globe have grown more unequal. That fact has attracted worldwide attention from scholars, governments, religious figures, and public intellectuals. In this interdisciplinary course, participating faculty members drawn from across the University and invited guest speakers will trace and examine the sources and challenges of inequality and mobility in many of its dimensions, from economic, political, legal, biological, philosophical, public policy, and other perspectives. This course is part of the College Course Cluster program: Inequality.

Instructor(s): A. Sanderson and Staff  
Terms Offered: Not offered in 2024-2025  
Prerequisite(s): Third- or fourth-year standing  
Note(s): ECON 24720 or ECON 22410 may be used as an Economics elective, but only one of the two may be used toward Economics major requirements.  
Equivalent Course(s): ECON 24720, PBPL 28920

**BPRO 29000. Energy and Energy Policy. 100 Units.**

This course shows how scientific constraints affect economic and other policy decisions regarding energy, what energy-based issues confront our society, how we may address them through both policy and scientific study, and how the policy and scientific aspects can and should interact. We address specific technologies, both those now in use and those under development, and the policy questions associated with each, as well as with more overarching aspects of energy policy that may affect several, perhaps many, technologies.

Instructor(s): Staff  
Terms Offered: Not offered in 2024-2025  
Prerequisite(s): PQ: Third- or fourth-year standing. For ECON majors who want ECON credit for this course (ECON 26800): PQ is ECON 20100.  
Equivalent Course(s): CHSS 37502, PBPL 29000, ENST 29000, PPHA 39201, PSMS 39000, ECON 26800

**BPRO 29200. Global Energy & Climate Challenge: Economics, Science & Policy. 100 Units.**

The global energy and climate challenge is one of the most important and urgent problems society faces. Progress requires identifying approaches to ensure people have access to the inexpensive and reliable energy critical for human development, without causing disruptive climate change or unduly compromising health and the environment. The course pairs technical and economic analysis to develop an understanding of policy challenges in this area. Lecture topics will include the past, present, and future of energy supply and demand, global climate change, air pollution and its health consequences, selected energy technologies such as solar photovoltaics, nuclear power, unconventional oil and gas, and an analysis of theoretical and practical policy solutions in developed and emerging economies.

Instructor(s): M. Greenstone, J. Deutch  
Terms Offered: Not offered in 2024-2025
Big Problems

Prerequisite(s): PQ: Third- or fourth-year standing in the College.
Equivalent Course(s): ECON 26730, PPHA 39905, ENST 28220, PBPL 29200

BPRO 29520. Sustainability and Computing. 100 Units.
Once a darling of the economy, the computing industry has come under fire as “techlash” brings a spotlight to its negative environmental and societal impacts. We focus on understanding computing’s environmental impact, and the productive and substantial (not greenwashing) actions that can be taken to reduce it. The objective of this course is to expose students to a sophisticated view of how computing affects the environment, and how it can become more sustainable through action in several dimensions, including technology invention and design, business/ecosystem structure, individual and government action. Students will be empowered with the intellectual tools to understand and act with insight on these issues in their professional careers.
Prerequisite(s): Students must be in their third or fourth year of study.
Note(s): This course may be used as a College elective, but not as a CS major elective.
Equivalent Course(s): CEGU 29520, CMSC 29520, ENST 29520, CMSC 39520

BPRO 29943. Diasporic Narratives and Memories. 100 Units.
Of the many emigrant communities in Chicago, Belarusians are the only group that does not yet have its own museum. Our course takes this lack as an opportunity to provide training for students to create a grassroots community-driven initiative that empirically develops a conceptual foundation for a new type of multi-ethnic museum of emigration, one informed by the experiences of community members themselves and their relationship to the artifacts that define their identities and memories. This course allows students to actively participate in a museum creation project which takes as its point of departure not a nation-state narrative, but the everyday life of a multi-ethnic community with the goal of informing research, policy, and public discourse about emigration. We center our course around the material heritage of Belarussia and its dispersal in emigration. We analyze how a diasporic museum’s main role is to collect, protect and curate the material legacy of the Belarusian community to ensure its future stability. The course participants collaborate with the Chicago Studies Program, the NGO Belarusians in Chicago, and the Chicago History Museum to study the role of artifacts in museums. The students conduct the field work about multi-ethnic Belarusian emigration to include experiences of Belarusian Jews, Belarusian Russians, Belarusian Lithuanians, Belarusian Tatars, and other groups from Belarus.
