Department Website: http://humdev.uchicago.edu

PROGRAM OF STUDY

The program in Comparative Human Development (CHDV) focuses on the study of persons over the course of life; on the social, cultural, biological, and psychological processes that jointly influence development; and on growth over time in different social and cultural settings. The study of human development also offers a unique lens through which we consider broad questions of the social sciences, like the processes and impacts of social change, and the interactions of biology and culture.

Faculty members in Comparative Human Development with diverse backgrounds in anthropology, biology, psychology, and sociology conduct research on topics that include (but are not limited to): the social and phenomenological experience of mental illness; comparative education; the impact of socioeconomic context on growth and development; the influence of social interaction on biological functioning; the tensions inherent in living in multicultural societies; the experience and development of psychotherapists in Western and non-Western countries; the ways in which youth in developing countries are forging new conceptions of adulthood; and the study of communication with developmental, cultural, and cognitive lenses.

Given this interdisciplinary scope, the program in Comparative Human Development provides an excellent preparation for students interested in advanced postgraduate study at the frontiers of several social science disciplines, or in careers and professions that require a broad and integrated understanding of human experience and behavior—e.g., mental health, education, social work, health care, or human resource and organizational work in community or corporate settings.

ADVISING

The first point of contact for undergraduates is the preceptor. Preceptors can be emailed at humdev-preceptors@lists.uchicago.edu. Additional contact information for the year-specific preceptor can be found in the Contacts section at the bottom of this page, along with the undergraduate chair and administrator contact information. Students should declare their majors by the end of their second year.

ELECTRONIC COMMUNICATION

Upon declaring a Comparative Human Development major, undergraduates should promptly join the department undergraduate email listserv to receive important announcements. Students request to join the listserv by logging in with their CNet ID at https://lists.uchicago.edu and subscribing to humdev-undergrad@listhost.uchicago.edu (humdev-undergrad@uchicago.edu).

PROGRAM REQUIREMENTS

The requirements below are in effect as of Autumn Quarter 2017.

Students who are pursuing a joint BA/MA degree are permitted to double count a maximum of four courses for the two degrees.

The undergraduate program in Comparative Human Development has the following components:

CORE COURSES

CHDV 20000 Introduction to Human Development and CHDV 20100 Human Development Research Design, a two-quarter introductory sequence in Comparative Human Development, should be completed prior to the Spring Quarter of a student’s third year. CHDV 20000 Introduction to Human Development focuses on theories of development, with particular reference to the development of the self in a social and cultural context. CHDV 20100 Human Development Research Design focuses on modes of research and inquiry in human development, including basic concepts of research design and different methods used in studying human development (e.g., ethnography, experiments, surveys, discourse analysis, narrative inquiry, and animal models). Consideration is given to the advantages and limitations of each approach in answering particular questions concerning person and culture.

METHODS

Students must complete one Methods course. It may focus on qualitative or quantitative methods or may be a research methods course from a related department, such as Statistics.

The following are courses since 2012 that have fulfilled the Methods requirement without a petition. (Please note courses in this list may not be offered every academic year.)

Courses that are not on the following list may be petitioned to count for Methods (see Petitions).

* Courses used to fulfill a general education requirement may not be used to fulfill the major (e.g., BIOS 20151, BIOS 20152, or STAT 20000).

**Electives**

All CHDV majors are required to take nine CHDV elective courses with course numbers above 20000. We encourage students to take their elective courses across the four areas of Comparative Human Development, given the department's commitment to transdisciplinary scholarship. Many CHDV elective courses are designated as aligning with one or more distribution areas (labeled A through D); see individual course listings in the catalog. The four areas are the following:

- **A. Comparative Behavioral Biology:** includes courses on the biopsychology of attachment; evolutionary social psychology; evolution of parenting; biological psychology; primate behavior and ecology; behavioral endocrinology.

- **B. Life Course Development:** includes courses on social and psychological development through the life course, including courses on childhood, adolescence, adulthood, and aging; education and development; introduction to language development; the role of early experience in development; sexual and gender identity; the study of lives and families in social and cultural context.

- **C. Culture and Community:** includes courses on cultural psychology; psychological anthropology; social psychology; cross-cultural child development; language, culture, and thought; language socialization; education in ethnic and cultural context; psychiatric and psychodynamic anthropology; memory and culture.

- **D. Mental Health and Personality:** includes courses on personality theory and research; social and cultural foundations of mental and physical health; modern psychotherapies and their supporting institutions; psychology of well-being; conflict understanding and resolution; core concepts and current directions in psychopathology; emotion, mind, and rationality; body image in health and disorder; advanced concepts in psychoanalysis.

**Petitions**

Student petitions will be approved only in very limited circumstances for courses not taught or cross-listed in CHDV to count toward CHDV major requirements. These limited circumstances may include a relevant course offered during a University of Chicago study abroad program if a CHDV course is not available. Students may petition for one relevant course per quarter of study abroad to count toward the CHDV major, but only one, barring unusual circumstances. Students may also petition to take a comparable course from another department following a sudden, unanticipated change in CHDV departmental course offerings. Only university-level courses offered by the University of Chicago may be approved for CHDV requirements; no other form of credit (including Advanced Placement) is allowed. Petitions should be completed using the CHDV petition form found at humdev.uchicago.edu/content/requirements-and-forms (https://humdev.uchicago.edu/undergraduate-
BA HONORS GUIDELINES

Students with qualifying GPAs may seek to graduate with honors by successfully completing a BA honors paper that reflects scholarly proficiency in an area of study within Comparative Human Development and successfully completing two required accompanying courses:

1. CHDV 29800 B.A. Honors Seminar (offered in the Spring Quarter of third year) and
2. CHDV 29900 Honors Paper Preparation (offered in the Autumn Quarter of fourth year)

CHDV 29800 B.A. Honors Seminar can count as one of the nine elective courses required for the major. CHDV 29900 Honors Paper Preparation may not count toward major requirements; it may be used for general elective credit only. Qualified students who wish to seek CHDV honors and who plan to study abroad should plan their travel in order to ensure they are in residence at the University of Chicago during the Spring Quarter of their third year and the Autumn Quarter of their fourth year in order to take the two courses required for BA honors. Students will also be required to present their Honors Paper in the Trial Research Conference in the Spring Quarter of their fourth year.

The honors paper should reflect original research of an empirical, scholarly, or theoretical nature and must be rated as worthy of honors by the student’s BA Honors Committee. This committee shall consist of two University faculty members: a supervisor (who must be a CHDV faculty member or associate faculty member) and a second reader (who must be a University of Chicago faculty member or associate faculty member). The paper should be about 30 to 40 pages in length. The grade given for it will become the grade of record for the Honors Paper Preparation course (CHDV 29900 Honors Paper Preparation). To receive departmental honors upon graduation, students (1) must have attained a cumulative overall GPA of 3.25 or higher and a major GPA higher than 3.5 by the end of the quarter prior to the quarter of graduation, and (2) must have completed a meritorious BA honors paper under the supervision of a CHDV faculty member and received a grade of A or A- on their BA honors paper.

Permission to undertake a BA honors paper will be granted by the CHDV undergraduate chair to students who (1) have successfully completed CHDV 29800 B.A. Honors Seminar and (2) have filed a properly completed BA Honors Paper Proposal Form with the departmental Student Affairs Administrator no later than ninth week of Spring Quarter of the third year.

BA HONORS SEMINAR

The CHDV 29800 B.A. Honors Seminar aims to help qualified students formulate a suitable proposal and find a CHDV faculty supervisor. Qualified students who wish to seek departmental honors must register for the CHDV 29800 B.A. Honors Seminar during Spring Quarter of their third year. Permission to register for CHDV 29800 B.A. Honors Seminar will be granted to students with a GPA that, at the end of Autumn Quarter of the third year, shows promise of meeting the standards set for honors (see above). This course must be taken for a quality grade and may be counted as one of the required major electives. This course is a pre-field course where students develop a ten-page research proposal and find both a CHDV supervisor and a second reader (who may be outside of the department). As part of the proposal, they learn to develop an academic “problem” while reviewing the necessary academic literature. They also decide on the discipline and methods (interviewing, ethnography, experimental design) they will use to tackle their research question.

HONORS PAPER PREPARATION COURSE

The CHDV 29900 Honors Paper Preparation course helps students successfully complete work on their BA honors paper. In order to complete honors, students who successfully took CHDV 29800 in Spring Quarter of their third year must also register for CHDV 29900 Honors Paper Preparation during Autumn Quarter of their fourth year. This course is required but does not count as one of the 12 courses in the major; it may be used for general elective credit only. Students are encouraged to collect their data over the summer; then this course scaffolds the process of analyzing data (such as transcription and coding) and writing up BA papers (such as tips on describing methods and peer review). The grade assigned by the thesis supervisor on the final BA paper is retroactively assigned as the grade for this course.

BA HONORS PAPER FOR DUAL MAJORS

In very special circumstances, students may be able to write a longer BA honors paper that meets the requirements for a dual major (with prior approval from the undergraduate program chairs in both departments). Students should consult with both chairs before the end of Spring Quarter of their third year. A consent form, available from the student’s College adviser, must be signed by both chairs and returned to the College adviser, with copies filed in both departmental offices, by the end of Autumn Quarter of the student’s graduation year.

BA HONORS PAPER FOR BA/MA STUDENTS

Students pursuing a joint BA/MA may be able to write a paper that meets the requirements for honors in CHDV and for the MA, subject to the approval of both programs. Students should consult with the Director of Undergraduate Studies of the Department of Comparative Human Development and with the Faculty Director for programs/requirements-and-forms/). Petitions should include a copy of the course syllabus, since the course title alone is often not sufficient for evaluating a petition.
of the MA program before the end of Spring Quarter of their third year. Students must also complete the fourth-year major course plan by the beginning of Winter Quarter in third year. Students are permitted to double count up to four courses for the major and the MA program.

Students must follow all the deadlines and requirements of the honors track of the major, including taking CHDV 29800 B.A. Honors Seminar and CHDV 29900 Honors Paper Preparation. To receive a BA with honors, students must (1) complete the requirements of the major and (2) submit a meritorious honors BA paper in the Spring Quarter of their fourth year in accordance with the departmental deadlines and requirements.

**HONORS PAPER DUE DATE**

Honors papers are due by the end of sixth week of the quarter in which a student plans to graduate (typically in Spring Quarter).

* Elective courses must have course numbers above 20000. Students applying for CHDV honors must register for CHDV 29800 B.A. Honors Seminar and CHDV 29900 Honors Paper Preparation. CHDV 29800 may be counted as one of the nine required program electives; however, CHDV 29900 does not count toward the major and is used for general elective credit only.

**GRADING**

All courses required for the major in Comparative Human Development must be taken for quality grades.

**EARL R. FRANKLIN FELLOWSHIP**

The Earl R. Franklin Research Fellowship is awarded to select third-year students who are writing a BA thesis in Comparative Human Development. It provides financial support during the summer before the fourth year to carry out research that will be continued as a senior honors project. Applications, which are submitted at the beginning of Spring Quarter, include a research proposal, personal statement, budget, CV, and a letter of recommendation. Details can be found at our website at humdev.uchicago.edu (https://humdev.uchicago.edu).

The courses below are a guide. For up-to-date course plans, please visit Class Search (http://registrar.uchicago.edu/classes/) or the Anticipated Courses List (https://humdev.uchicago.edu/undergraduate-programs/requirements-and-forms/courses/).

**COMPARATIVE HUMAN DEVELOPMENT COURSES**

**CHDV 20000. Introduction to Human Development. 100 Units.**

This course introduces the study of lives in context. The nature of human development from infancy through old age is explored through theory and empirical findings from various disciplines. Readings and discussions emphasize the interrelations of biological, psychological, and sociocultural forces at different points of the life cycle.

Instructor(s): S. Numanbayraktaroglu Terms Offered: Autumn

Prerequisite(s): CHDV majors or intended majors.

Note(s): Required Course for Comparative Human Development Majors. All students must sign up for a discussion section.

Equivalent Course(s): HLTH 20000, PSYC 20850

**CHDV 20100. Human Development Research Design. 100 Units.**

The purpose of this course is to expose CHD majors in college to a broad range of methods in social sciences with a focus on human development research. The faculty in Comparative Human Development is engaged in interdisciplinary research encompassing anthropology, biology, psychology, sociology, and applied statistics. The types of data and methods used by faculty span the gamut of possible methodologies for addressing novel and important research questions. In this course, students will study how appropriate research methods are chosen and employed in influential research and will gain hands-on experience with data collection and data analysis. In general, the class will meet as a whole on Mondays and will have lab/discussion sections on Wednesdays. The lab/discussion sections are designed to review the key concepts, practice through applying some of the methods, and prepare students for the assignments. Students in each section will be assigned to small groups. Some of the assignments are group-based while others are individual-based.

Instructor(s): C. Galli Terms Offered: Winter

Note(s): Required Course for Comparative Human Development Majors

Equivalent Course(s): PSYC 21100, SOCI 20549, HLTH 20100, EDSO 20100
CHDV 20102. Introduction to Causal Inference. 100 Units.
This course is designed for graduate students and advanced undergraduate students from the social sciences, education, public health science, public policy, social service administration, and statistics who are involved in quantitative research and are interested in studying causality. The goal of this course is to equip students with basic knowledge of and analytic skills in causal inference. Topics for the course will include the potential outcomes framework for causal inference; experimental and observational studies; identification assumptions for causal parameters; potential pitfalls of using ANCOVA to estimate a causal effect; propensity score based methods including matching, stratification, inverse-probability-of-treatment-weighting (IPTW), marginal mean weighting through stratification (MMWS), and doubly robust estimation; the instrumental variable (IV) method; regression discontinuity design (RDD) including sharp RDD and fuzzy RDD; difference in difference (DID) and generalized DID methods for cross-section and panel data, and fixed effects model. Intermediate Statistics or equivalent such as STAT 224/PBHS 324, PP 31301, BUS 41100, or SOC 30005 is a prerequisite. This course is a prerequisite for "Advanced Topics in Causal Inference" and "Mediation, moderation, and spillover effects."
Instructor(s): G. Hong Terms Offered: Winter
Prerequisite(s): Intermediate Statistics or equivalent such as STAT 224/PBHS 324, PP 31301, BUS 41100, or SOC 30005
Note(s): CHDV Distribution: M; M
Equivalent Course(s): SOCI 30315, MACS 51000, PLSC 30102, MACS 21000, CHDV 30102, STAT 31900, PBHS 43201

CHDV 20140. Qualitative Field Methods. 100 Units.
This course introduces techniques of, and approaches to, ethnographic field research. We emphasize quality of attention and awareness of perspective as foundational aspects of the craft. Students conduct research at a site, compose and share field notes, and produce a final paper distilling sociological insight from the fieldwork.
Instructor(s): O. McRoberts Terms Offered: Spring
Equivalent Course(s): RDIN 20140, SOCI 20140

CHDV 20150. Language and Communication. 100 Units.
This course can also be taken by students who are not majoring in Linguistics but are interested in learning something about the uniqueness of human language, spoken or signed. It covers a selection from the following topics: What is the position of spoken language in the usually multimodal forms of communication among humans? In what ways does spoken language differ from signed language? What features make spoken and signed language linguistic? What features distinguish linguistic means of communication from animal communication? How do humans communicate with animals? From an evolutionary point of view, how can we account for the fact that spoken language is the dominant mode of communication in all human communities around the world? Why cannot animals really communicate linguistically? What do the terms language "acquisition" and "transmission" really mean? What factors account for differences between "language acquisition" by children and by adults? Are children really perfect language learners? What factors bring about language evolution, including language speciation and the emergence of new language varieties? How did language evolve in mankind? This is a general education course without any prerequisites. It provides a necessary foundation to those working on language at the graduate and undergraduate levels.
Instructor(s): Salikoko Mufwene Terms Offered: Autumn
Equivalent Course(s): LING 20150, LING 30150, CHDV 30150, EDSO 20150, COGS 22002

CHDV 20175. The Sociology of Deviant Behavior. 100 Units.
This course examines how distinctions between "normal" and "deviant" are created, and how these labels shift historically, culturally, and politically. We analyze the construction of social problems and moral panics (e.g., smoking, "satanic" daycares, obesity) to explore how various moral entrepreneurs shape what some sociologists call a "culture of fear." Additionally, we investigate the impact on individuals of being labeled "deviant" either voluntarily or involuntarily, as a way of illustrating how both social control and social change operate in society.
Instructor(s): K. Schilt Terms Offered: Autumn. Not being offered in 2024/25

CHDV 20300. Biological Psychology. 100 Units.
What are the relations between mind and brain? How do brains regulate mental, behavioral, and hormonal processes; and how do these influence brain organization and activity? This course introduces the anatomy, physiology, and chemistry of the brain; their changes in response to the experiential and sociocultural environment; and their relation to perception, attention, behavioral action, motivation, and emotion.
Instructor(s): S. London, J. Yu Terms Offered: Winter
Prerequisite(s): Some background in biology and psychology.
Equivalent Course(s): NSCI 21015, PSYC 20300

CHDV 20305. Inequality in Urban Spaces. 100 Units.
The problems confronting urban schools are bound to the social, economic, and political conditions of the urban environments in which schools reside. Thus, this course will explore social, economic, and political issues, with an emphasis on issues of race and class as they have affected the distribution of equal educational opportunities in urban schools. We will focus on the ways in which family, school, and neighborhood characteristics intersect to shape the divergent outcomes of low- and middle-income children residing with any given neighborhood.
Students will tackle an important issue affecting the residents and schools in one Chicago neighborhood. This course is part of the College Course Cluster: Urban Design.

Instructor(s): M. Keels
Terms Offered: Autumn

Note(s): CHDV Distribution: B, 2*
Equivalent Course(s): CRES 20305, EDSO 20305, EDSO 40315, PBPL 20305

CHDV 20655. Child and Adolescent Development in Context. 100 Units.
This course focuses on human development from infancy through adolescence. Students will learn how culture and context influence the development of perception, cognition, language, identity, and social interaction. The course considers perspectives and methods in developmental research. As each new topic is introduced, students are encouraged to think critically about the assumptions and methods that underlie research on particular issues, and how to apply such research to real-world issues. Students will complete multiple applied assignments to demonstrate knowledge of course concepts.

Instructor(s): Rogers
Terms Offered: Spring

Note(s): Distribution: B,C

CHDV 20700. Global Health, Environment, and Indigenous Futures. 100 Units.
The global coronavirus pandemic has made evident the significance of ecological (im)balances for the well-being of societies. The relationship between structural inequalities, changing environments and health, especially for historically and socio-economically marginalized communities, is now well established. At the same time, a growing body of literature links the material conditions of marginalized communities—for instance, spaces of dwelling and conditions of labor—to health status, globally. Based on a set of interdisciplinary literature arranged through anthropological theories, this course will critically engage with notions of health and well-being for indigenous communities, tracing injustices that stem histories of racial, caste- and ethnicity-based, and environmental exclusions. The readings are organized around one central question: What does it mean to be indigenous in a changing planet where social, political, and economic systems are marked by enduring legacies of systemic violence? This graduate and undergraduate level course will introduce contexts within which structural exclusions lead to ill-health and loss of well-being among indigenous communities across the globe. The aim is to develop critical thinking on the political economy and political ecologies of indigenous health as imbricated with issues of social, economic, and environmental justice.

Instructor(s): Sanghamitra Das
Equivalent Course(s): RDIN 20700, CHDV 30750, ANTH 30700, RDIN 30700, CEGU 20700, CEGU 30700, SALC 32704, SALC 26501, ANTH 20700

CHDV 21000. Cultural Psychology. 100 Units.
There is a substantial portion of the psychological nature of human beings that is neither homogeneous nor fixed across time and space. At the heart of the discipline of cultural psychology is the tenet of psychological pluralism, which states that the study of “normal” psychology is the study of multiple psychologies and not just the study of a single or uniform fundamental psychology for all peoples of the world. Research findings in cultural psychology thus raise provocative questions about the integrity and value of alternative forms of subjectivity across cultural groups. In this course we analyze the concept of “culture” and examine ethnic and cross-cultural variations in mental functioning with special attention to the cultural psychology of emotions, self, moral judgment, categorization, and reasoning.

Instructor(s): R. Shweder
Prerequisite(s): Undergraduates must be in third or fourth year.
Note(s): CHDV Distribution: B, C
Equivalent Course(s): AMER 33000, CRES 21100, GNSE 31000, ANTH 35110, PSYC 33000, CHDV 31000, ANTH 24320, GNSE 21001, KNOW 31000, PSYC 23000

CHDV 21800. Primate Behavior and Ecology. 100 Units.
This course explores the behavior and ecology of nonhuman primates with emphasis on their natural history and evolution. Specific topics include methods for the study of primate behavior, history of primate behavior research, socioecology, foraging, predation, affiliation, aggression, mating, parenting, development, communication, cognition, and evolution of human behavior.

Instructor(s): D. Maestripieri
Prerequisite(s): Completion of the first three quarters of a Biological Sciences fundamentals sequence.
Note(s): E
Equivalent Course(s): EVOL 37300, CHDV 34300, BIOS 23248

CHDV 21816. A History of Youth in Latin America. 100 Units.
This course will examine the history of youth as a social category, and as an experience-in Latin America. We will consider histories of childhood, student activism, and youth culture across the region to consider how young people experience everyday life, and how they effect change. Course materials will combine primary sources including film, music, and other visual and performance artworks with scholarship on childhood and youth.

Instructor(s): Diana Schwartz-Francisco
Equivalent Course(s): HIST 26302, GLST 21816, LACS 21816

CHDV 21920. The Evolution of Language. 100 Units.
This course is designed to review critically some of the literature on the phylogenetic emergence of Language, in order to determine which questions have been central to the subject matter, which ones have recurred the most,
and to what extent the answers to these are now better informed. The class will also review new questions such as the following: What is the probable time of the emergence of modern language(s)? Should we speak of the emergence of Language or of languages, in the plural?
Instructor(s): Salikoko Mufwene Terms Offered: Winter
Equivalent Course(s): ANTH 47305, CHDV 41920, COGS 22007, CHSS 41920, LING 21920, EVOL 41920, LING 41920, PSYC 41920

CHDV 22103. Feminism and Anthropology. 100 Units.
This course examines the fraught yet generative relation between various movements of feminism and the discipline of anthropology. Both feminism(s) and anthropology emerged in the 19th century as fields invested in thinking "the human" through questions of alterity or Otherness. As such, feminist and anthropological inquiries often take up shared objects of analysis—including nature/culture, kinship, the body, sexuality, exchange, value and power—even as they differ in their political and scholarly orientations through the last century and a half. Tracking the emergence of feminisms and anthropology as distinct fields of academic discourse on the one hand and political intervention on the Other, we will pursue the following lines of inquiry: 1) a genealogical approach to key concepts and problem-spaces forged at the intersection of these two fields 2) critical analysis of the relation of feminist and postcolonial social movements to the professionalizing fields of knowledge production (including Marxist inspired writing on women and economy, Third World feminism and intersectionality, and feminist critiques of science studies) and 3) a reflexive contemporary examination of the way these two strands of thought have come together in the subfield of feminist anthropology and the continual frictions and resonances of feminist and anthropological approaches in academic settings and in the larger world (e.g., #MeToo, sex positive activism, queer politics, feminist economics).
Instructor(s): Chu, Julie Cole, Jennifer Terms Offered: TBD
Prerequisite(s): 3rd and 4th year undergraduates only. Graduate students must have consent of one of the instructors.
Equivalent Course(s): ANTH 25211, ANTH 32910, GNSE 32103, GNSE 20143, CHDV 32103

CHDV 22203. Caste, Reproduction, and Citizenship in India. 100 Units.
This undergraduate and graduate level seminar will center on caste and reproduction in understanding notions of citizenship in India. The course will systematically engage with ideas of belonging to the post-colonial nation-state, particularly as experienced from following standpoints-gender, caste, indigeneity, and class. Understanding how citizenship is constituted, performed and negotiated in India, especially in relation to the biological and political reproduction of "good citizens", reveals the scopes and limits of citizenship as governance. The course is premised on the centrality of reproduction to governance in the largest democracy of the world. Drawing on a set of interdisciplinary literature, the readings are organized around feminist theorizations of the State, governance, and citizenship to locate the body within the body politic. The aim is to develop critical thinking on how the politics of reproduction is deeply imbricated with the reproduction of democratic politics; a politics that is entangled with knowledge, expertise and constructed human difference. In so doing, the course brings together reproductive governance with articulations of social justice in India.
Equivalent Course(s): GNSE 22207, SALC 35704, GNSE 32207, RDIN 22203, CHDV 32203, RDIN 32203, ANTH 32203

CHDV 22350. Social Neuroscience. 100 Units.
Humans are intensely social animals. Our lives are intertwined with other people, and our well-being depends on others. Social neuroscience examines how the brain mediates social cognition and behavior. It spans diverse species, disciplines (evolutionary biology, neuroscience, anthropology, psychology, behavioral economics, sociology, and political science), and levels of analysis across the biological organization. Social neuroscience provides an overarching paradigm to investigate social cognition and behavior and to determine where we as a species fit within a broader biological context. A wide range of topics will be examined, including social connections and friendship, sex, mating and aggression, cooperation and social preferences, social and environmental influences on decision-making and behavior, empathy, social contagion, and group coalitions. Interdisciplinary analyses, by integrating approaches from social sciences and biological sciences, significantly expand our knowledge and have the potential to improve our social and living conditions.
Instructor(s): J. Decety Terms Offered: Autumn
Equivalent Course(s): PSYC 22350, ECON 21830, BIOS 24137, HLTH 22350

CHDV 22580. Child Development in the Classroom. 100 Units.
This discussion-based, advanced seminar is designed to investigate how preschool and elementary students think, act, and learn, as well as examine developmentally appropriate practices and culturally responsive teaching in the classroom. This course emphasizes the application of theory and research from the field of psychology to the realm of teaching and learning in contemporary classrooms. Course concepts will be grounded in empirical research and activities geared towards understanding the nuances and complexities of topics such as cognitive development (memory, attention, language), early assessment systems, standardized testing, "mindset", "grit", exercise/nutrition, emotion regulation, and more.
Instructor(s): Kate O'Doherty Terms Offered: Autumn
Equivalent Course(s): PSYC 22580, EDSO 22580
CHDV 23003. Schooling and Identity. 100 Units.
This course examines the dynamic relations between schooling and identity. We will explore how schools both enable and constrain the identities available to students and the consequences of this for academic achievement. We will examine these relations from multiple disciplinary perspectives, applying psychological, anthropological, sociological, and critical theories to understanding how students not only construct identities for themselves within schools, but also negotiate the identities imposed on them by others. Topics will include the role of peer culture, adult expectations, school practices and enduring social structures in shaping processes of identity formation in students and how these processes influence school engagement and achievement. We will consider how these processes unfold at all levels of schooling, from preschool through college, and for students who navigate a range of social identities, from marginalized to privileged.
Instructor(s): Lisa Rosen Terms Offered: Winter. Offered winter 2025
Prerequisite(s): Priority registration will be given to MAPSS students seeking the Education and Society certificate.
Equivalent Course(s): EDSO 33002, RDIN 33002, SOCI 30530, RDIN 23002, SOCI 20530, EDSO 23002

CHDV 23005. Education and Social Inequality. 100 Units.
How and why do educational outcomes and experiences vary across student populations? What role do schools play in a society's system of stratification? How do schools both contribute to social mobility and to the reproduction of the prevailing social order? This course examines these questions through the lens of social and cultural theory, engaging current academic debates on the causes and consequences of social inequality in educational outcomes. We will engage these debates by studying foundational and emerging theories and examining empirical research on how social inequalities are reproduced or ameliorated through schools. Through close readings of historical, anthropological and sociological case studies of schooling in the U.S., students will develop an understanding of the structural forces and cultural processes that produce inequality in neighborhoods and schools, how they contribute to unequal opportunities, experiences, and achievement outcomes for students along lines of race/ethnicity, class, gender, and immigration status, and how students themselves navigate and interpret this unequal terrain. We will cover such topics as neighborhood and school segregation; peer culture; social networks; elite schooling; the interaction between home, society and educational institutions; and dynamics of assimilation for students from immigrant communities.
Instructor(s): Lisa Rosen Terms Offered: Autumn. Offered autumn 2024
Equivalent Course(s): SOCI 20297, EDSO 23005, CRES 23005, CHST 23005

CHDV 23011. Beyond the Culture Wars: Social Movements and the Politics of Education in the U.S. 100 Units.
Passionate conflicts over school curriculum and educational policy are a recurring phenomenon in the history of US schooling. Why are schools such frequent sites of struggle and what is at stake in these conflicts? In this discussion-based seminar, we will consider schools as battlegrounds in the US "culture wars": contests over competing visions of national identity, morality, social order, the fundamental purposes of public education, and the role of the state vis-à-vis the family. Drawing on case studies from history, anthropology, sociology and critical race and gender studies, we will examine both past and contemporary debates over school curriculum and school policy. Topics may include clashes over: the teaching of evolution, sex and sexuality education, busing/desegregation, prayer in schools, multiculturalism, the content of the literary canon, the teaching of reading, mathematics and history, and the closure of underperforming urban schools. Our inquiry will examine how social and political movements have used schools to advance or resist particular agendas and social projects.
Instructor(s): Lisa Rosen Terms Offered: Spring. Offered spring 2025
Equivalent Course(s): HIST 37718, SOCI 20588, EDSO 23011, PBPL 23011, SOCI 30588, HIST 27718, CHDV 33011, EDSO 33011

CHDV 23012. Linguistic Anthropology of Education. 100 Units.
Students in this course will learn to think critically about the entangled roles of language and education in processes of sociocultural (re)production, that is, in how forms of social organization and collective meaning-making are produced and/or reproduced. Students will learn to analyze language use as a social activity: not merely as a code for referencing events in the world, but as a way of managing social relations. In reading about language in educational contexts, students will come to see how collectively held beliefs about language and language users inform moral, political, and often (de)racializing evaluations of better and worse ways of speaking, writing, teaching and learning, leading to differential educational opportunities, access, and outcomes. Education will be treated broadly, though there will be a focus on formal educational contexts. Nonetheless, the class will always challenge students to think about "the classroom," including our own, as continuous and contiguous with "the real world."
Instructor(s): Lily (Shenghe) Ye Terms Offered: Spring. Offered Spring 2023
Equivalent Course(s): EDSO 23012, ANTH 27216

CHDV 23013. Educational Excellence in US Public Schools. 100 Units.
What are the mechanisms that promote educational excellence for students in US public schools? Are there particular aspects of the school setting that enhance the educational experience of students? In this discussion based course, we will engage these questions via extant literature and community engaged activity (i.e. getting involved with a school). The core interests central this course are as follows: (1) at the conclusion of this course one should be better positioned to promote educational/academic excellence for students in the United States, and (2) one should be better positioned to eradicate inequity and inequality in the educational/academic excellence of students in the United States.
Instructor(s): Darnell Leatherwood  Terms Offered: Spring
Equivalent Course(s): SSAD 23013, EDSO 23013

CHDV 23249. Animal Behavior. 100 Units.
This course introduces the mechanism, ecology, and evolution of behavior, primarily in nonhuman species, at the individual and group level. Topics include the genetic basis of behavior, developmental pathways, communication, physiology and behavior, foraging behavior, kin selection, mating systems and sexual selection, and the ecological and social context of behavior. A major emphasis is placed on understanding and evaluating scientific studies and their field and lab techniques.
Instructor(s): J. Mateo  Terms Offered: Winter. odd years
Prerequisite(s): Three quarters of a Biological Sciences Fundamentals Sequence.
Note(s): ChDV Distribution: A E.
Equivalent Course(s): PSYC 23249, BIOS 23249

CHDV 23500. New Perspectives on Language Emergence. 100 Units.
In this course we will investigate anthropological and linguistic perspectives on language emergence, as well as the social, demographic, environmental, linguistic, and modalities (vision, speech, touch) factors that contribute to the formation of new languages. Emerging languages in communities around the world offer unprecedented scientific opportunities to address important questions previously deemed intractable, such as: Where does language come from? How do our experiences of the world influence the way our languages are structured? At what level of abstraction can language be studied as an autonomous object of analysis? The topic of language emergence has tended to focus on the interaction of linguistic, psychological, and demographic factors. We will bring the important anthropological dimension to the topic of language emergence, which addresses the ways that users of emerging languages inhabit the world. The readings, lectures, and discussions will address new implications for our understanding of language creation.
Instructor(s): Diane Brentari & Terra Edwards  Terms Offered: Autumn. Meeting Mondays from 1:30p until 4:20p
Prerequisite(s): One Linguistics course and one Anthropology course are recommended. Consent of instructor required.
Note(s): Consent of instructor required; To be admitted, please email Professors Brentari and Edward a paragraph-long description about what you bring and what you hope to get out of this seminar.
Equivalent Course(s): ANTH 23501, ANTH 33501, CDIN 23500, LING 23501, CHDV 33500, CDIN 33500, LING 33500, COGS 22008

CHDV 23511. Memory, Reconciliation, and Healing: Transitional Justice. 100 Units.
Across the globe, recent national attempts to transition out of authoritarian rule and to manage the legacies of political conflicts have invoked discourses and questions of human rights. In the last fifty years, millions of people across the world have experience periods of protest and mobilization, violence and genocide, the emergence and entrenchment of armed revolutionary forces, and repressive governments. As these periods came to an end, the governments, civil societies, and individual citizens in each country have had to face the challenges of rebuilding social fabric, trust, and democratic culture while memorializing the past and considering the root causes of past conflict and authoritarianism. These processes have include discourses of rights (e.g. transitional justice, but also participation, democracy, education, etc.) and have shaped the lives of millions of individuals in these countries as well as the trajectories of each nation and its governments. The proposed course draws on Peru, South Africa, and Ireland as case studies to guide students in comparatively analyzing the transitional processes and current implications. The goal of the course is for students to explore how these societies and their citizens have sought to deal with these problematic national histories and what ways these processes continue to influence each society. The students will leave the class with a better understanding of how conflict and post-conflict issues and developments.
Equivalent Course(s): HMRT 23511, LACS 23511

CHDV 23700. Crosslinguistic Perspectives on Language Development. 100 Units.
This discussion-based course covers cross-linguistic evidence concerning similarities and dissimilarities in how children learn language across diverse language communities. Each year will revolve around a central topic. This year we will focus on the acquisition of phonology.
Instructor(s): M. Tice  Terms Offered: Autumn
Note(s): satisfies UG category: B and Grad categories: 2, M
Equivalent Course(s): PSYC 33720, LING 33700, LING 23701, CHDV 33700, CHDV 33700, PSYC 23720, COGS 22009

CHDV 24050. Understanding Practical Wisdom. 100 Units.
Thinking about the nature of wisdom goes back to the Greek philosophers and the classical religious sages, but the concept of wisdom has changed in many ways over the history of thought. While wisdom has received less scholarly attention in modern times, it has recently re-emerged in popular discourse with a growing recognition of its potential importance for addressing complex issues in many domains. But what is wisdom? It’s often used with a meaning more akin to “smart” or “clever.” Is it just vast knowledge? This course will examine the nature of wisdom-how it has been defined in philosophy and psychological science, how its meaning has changed, and what its essential components might be. We will discuss how current philosophical and psychological theories conceptualize wisdom and consider whether, and how, wisdom can be studied scientifically; that is, can wisdom be measured and experimentally manipulated to illuminate its underlying mechanisms and understand its functions? Finally, we will explore how concepts of wisdom can be applied in business, education, medicine, the
law, and in the course of our everyday lives. Readings will be drawn from a wide array of disciplines including philosophy, classics, history, psychology, behavioral economics, medicine, and public policy. The course will include lectures by philosophers and psychologists. This course is offered in association with the Chicago Moral Philosophy Project and the Good Life program (the Hyde Park Institute).

Instructor(s): A. Henly; H. Nusbaum

Terms Offered: Spring

Prerequisite(s): Third- or fourth-year standing.

Equivalency Course(s): BPRO 24050, RLSR 24055, PSYC 24060, PSYC 34060

CHDV 24500. Language and Environment. 100 Units.

This seminar will explore the many ways that language influences and is influenced by the environment. Appropriate for those interested in the socio-cultural foundations of language and language-use, infrastructural dimensions of communication and interaction, and existence as semiotic.

Instructor(s): T. Edwards

Terms Offered: Spring

Note(s): Distributions: grad 3

Equivalency Course(s): LING 44500, ANTH 44501, ANTH 24501, CHDV 44500

CHDV 24599. Historical and Contemporary Issues in U.S. Racial Health Inequality. 100 Units.

This course explores persistent health inequality in the U.S. from the 1900s to the present day. The focus will be on racial gaps in urban health inequality with some discussion of rural communities. Readings will largely cover the research on Black and White gaps in health inequality, with the understanding that most of the issues discussed extend across health inequalities across many racial and ethnic groups. Readings cover the broad range of social determinants of health (socioeconomic status, education, access to health care, homelessness) and how these social determinants are rooted in longstanding legacies of American inequality. A major component of class assignments will be identifying emerging research and innovative policies and programs that point to promising pathways to eliminating health disparities.

Instructor(s): M. Keels

Terms Offered: Autumn

Prerequisite(s): Only students with 2nd year standing or above.

Note(s): Fulfills grad requirement: 2,4 and undergrad major requirement B.

Equivalency Course(s): CHST 24599, RDIN 24599, HLTH 24599, CHDV 44599, PBPL 24599

CHDV 24702. Un/Making Citizenship: The Politics of the Intimate. 100 Units.

The state is like a gravitational force that holds people in relation to itself, tugging and turning each person to different degrees. Citizenship is the mediation of that relationship. In this course, we examine different dimensions of citizenship across the life course, considering the ways people are formed into certain kinds of subjects. We ask: how and why are intimate life events of interest not only to those involved, but also to governing authorities? From the governance of conception and birth, to the (non)conferral of legal identities, the state manages legitimacy through documents like birth certificates, whose contents or absence can shape a person's entire life trajectory. In childhood, schools work to transform children into certain kinds of future citizens. From legal adulthood's gradual accrual of rights -- to vote, to have sex, to drink, to stand trial -- to old age and long after death, citizenship extends beyond the lifecourse. Over the course of the quarter, we investigate the ways people negotiate attempts to transform them into citizens, examining in particular how citizenship is mediated in relation to religion, sexuality, migration, disability, marriage, pregnancy, old age, and death.

Instructor(s): Kathryn Takalvirwa

Terms Offered: TBD

Equivalency Course(s): GNSW 24704, ANTH 24702

CHDV 24711. The Sociology of Work. 100 Units.

From the Great Depression to the Great Resignation, paid work has played a central role in American life. The average American spends 1/3 of their life at work - making it an area of the social world heavily examined by politicians, journalists, and social scientists. In this course, we will look at the structural and interpersonal dynamics of work to consider the questions of what makes a "good job" in America and who gets to decide? Our topics will include low-wage work, the stigma of "dirty jobs," gender and racial inequality at work, physical and emotional labor on the job, side hustles and the gig economy, and life after retirement. Students will be required to write a 15 page research paper that draws on interview data they will collect over the quarter. No prior background in doing interviews is required!

Instructor(s): K. Schilt

Terms Offered: Winter

Note(s): Fulfills grad requirement: 2,4 and undergrad major requirement B.

Equivalency Course(s): GNSW 20555, PBPL 20555, SOCI 20555

CHDV 24960. Creole Genesis and Genetic Linguistics. 100 Units.

In this seminar course we will review the "creole exceptionalism" tradition against the uniformitarian view, according to which creoles have emerged and evolved like other, natural and non-creole languages. We will situate creoles in the context of the plantation settlement colonies that produced them and compare their emergence specifically with that of languages such as English and the Romance languages in Europe. We will also compare these evolutions with those of new colonial varieties of European languages (such as Amish English, mainstream American English varieties, Brazilian Portuguese, and Québécois French) which emerged around the same time but are not considered creoles. Using the comparative approach (in evolutionary theory), we will assess whether the criteria used in the genetic classification of languages have been applied uniformly to creole and non-creole languages. In return, we will explore ways in which genetic creolistics can inform and improve genetic linguistics (including historical dialectology).

Instructor(s): Salikoko Mufwene
CHDV 25120. Child Development and Public Policy. 100 Units.
The goal of this course is to introduce students to the literature on early child development and explore how an understanding of core developmental concepts can inform social policies. This goal will be addressed through an integrated, multidisciplinary approach. The course will emphasize research on the science of early child development from the prenatal period through school entry. The central debate about the role of early experience in development will provide a unifying strand for the course. Students will be introduced to research in neuroscience, psychology, economics, sociology, and public policy as it bears on questions about “what develops?”, critical periods in development, the nature vs. nurture debate, and the ways in which environmental contexts (e.g., parents, families, peers, schools, institutions, communities) affect early development and developmental trajectories. The first part of the course will introduce students to the major disciplinary streams in the developmental sciences and the enduring and new debates and perspectives within the field. The second part will examine the multiple contexts of early development to understand which aspects of young children’s environments affect their development and how those impacts arise. Throughout the course, we will explore how the principles of early childhood development can guide the design of policies and practices that enhance the healthy development of young children, particularly for those living in adverse circumstances, and thereby build a strong foundation for promoting equality of opportunity, reducing social class disparities in life outcomes, building human capital, fostering economic prosperity, and generating positive social change. In doing so, we will critically examine the evidence on whether the contexts of children’s development are amenable to public policy intervention and the costs and benefits of different policy approaches.  
Instructor(s): K. O’Doherty, Winter; M. Fulcher, Spring  
Terms Offered: Spring, Winter  
Equivalent Course(s): EDSO 20500, PSYC 20500

CHDV 25220. Constructing a Society of Human Rights: A Psychological Framework. 100 Units.  
This course will critically examine the evidence on whether the contexts of children’s development are amenable to public policy intervention and the costs and benefits of different policy approaches.  
Instructor(s): A. Kalil  
Terms Offered: Autumn  
Equivalent Course(s): PBPL 25120, EDSO 25120, PSYC 25120

CHDV 25250. The Psychology and Neurobiology of Stress. 100 Units.  
This course will critically examine the evidence on whether the contexts of children’s development are amenable to public policy intervention and the costs and benefits of different policy approaches.  
Instructor(s): S. Norman  
Terms Offered: Spring  
Equivalent Course(s): PSYC 25750, NSCI 22535

CHDV 25777. Aging and the Life Course: An Intersectional Perspective. 100 Units.  
Societies across the world are ordered by age. In this course, we will examine how age is imagined and constructed according to biological, historical, and cultural perspectives. Drawing upon a life course model, we will study how different cultures and social groups seek to structure the individual’s life in relation to the wider society by creating socially constructed stages, age cohorts, and generations. We will consider how different social factors including gender, sexuality, race, and socioeconomic status may disrupt an individual’s ability to follow an idealized life course. An examination of the cultural assumptions surrounding aging in the United States will illustrate how ageism and age-stratification affect social relations across society and make certain lives more "successful" than others. The course will focus on older age and later life as a method for exploring how individuals make sense of their life experiences through narrative construction, the accumulation of disadvantage over the life course, and how historical and cultural shifts are disrupting established roles and relationships for the elderly across the world. The course will draw heavily on texts from gender and sexuality studies as a means for illustrating and understanding concepts. Students will have the opportunity to learn basic ethnographic and interviewing research techniques by conducting a life course narrative interview.  
Instructor(s): G. Steffen  
Terms Offered: Spring  
Note(s): CHDV undergrad; B  
Equivalent Course(s): HLTH 25777, ANTH 25777, GNSE 25777

CHDV 25900. Developmental Psychology. 100 Units.  
This is an introductory course in developmental psychology, with a focus on cognitive and social development in infancy through early childhood. Example topics include children’s early thinking about number, morality, and social relationships, as well as how early environments inform children’s social and cognitive development. Where appropriate, we make links to both philosophical inquiries into the nature of the human mind, and to practical inquiries concerning education and public policy.  
Instructor(s): K. O’Doherty, Winter; M. Fulcher  
Terms Offered: Spring, Winter  
Note(s): CHDV Distribution, B  
Equivalent Course(s): EDSO 20500, PSYC 20500
CHDV 26000. Social Psychology. 100 Units.
This course introduces students to the field of social psychology - the scientific study of how people think about, feel about, interact with, influence, and relate to one another. Topics covered include self and social perception, social influence, beliefs and attitudes, altruism, and intergroup processes. Where relevant, we will discuss if and how findings in social psychology can be applied in real-world contexts such as health, work, and relationships. Instructor(s): S. Oishi, Autumn; A. Light, Spring Terms Offered: Autumn Spring Equivalent Course(s): PSYC 20600

CHDV 26008. Principles and Methods of Measurement. 100 Units.
Accurate measurement of key theoretical constructs with known and consistent psychometric properties is one of the essential steps in quantitative social and behavioral research. However, measurement of phenomena that are not directly observable (such as psychological attributes, perceptions of organizational climate, or quality of services) is difficult. Much of the research in psychometrics has been developed in an attempt to properly define and quantify such phenomena. This course is designed to introduce students to the relevant concepts, principles, and methods underlying the construction and interpretation of tests or measures. It provides in-depth coverage of test reliability and validity, topics in test theory, and statistical procedures applicable to psychometric methods. Such understanding is essential for rigorous practice in measurement as well as for proper interpretation of research. The course is highly recommended for students who plan to pursue careers in academic research or applied practice involving the use or development of tests or measures in the social and behavioral sciences. Instructor(s): D. Maestripieri Terms Offered: Winter

CHDV 26050. Race, Ethnicity, Language, and Citizenship in the United States. 100 Units.
This course is intended to help students make sense of the current discourse on diversity and inclusion/exclusion from a historical perspective. They will be trained to read critically the evolution of political discourse on citizenship in the United States since the American Revolution. They will learn to detect the role of shifting interpretations of race and ethnicity, after that of European nationality, in determining who is (not) a (full) citizen. For instance, who counted as "American" in the early stages of the Republic? Why were Native Americans and (descendants of) forced immigrants from Africa excluded at the outset? How did English become the unofficial language of American citizenship and inclusion? What factors favored its rise and drove to extinction the competing European national languages? Instructor(s): Fadi Hakim Terms Offered: Spring Equivalent Course(s): LING 26050, CHDV 26055, RDIN 26050, LING 26050

CHDV 26910. Introduction to Linguistic Anthropology. 100 Units.
How do we use language when we interact with others (and ourselves)? What lies beyond semantic meaning, or the presupposed function of language to deliver "information"? In this introductory course to the field of linguistic anthropology, we explore how power, inequality, and difference are enacted through various communicative features of human interaction-features that include, but are not limited to, what we refer to as "language." We ask how the things that we say (and how we say them) signal and shape our identities (such as race, gender, sexuality, ethnicity, religion, and class). Furthermore, we investigate how language enacts forms of human relationality-forms that, among others, encompass solidarity, conflict, and hierarchy in face-to-face interactions as well as in mass-mediated productions. Through this course, student will engage with and analyze linguistic features of human interaction in their cultural and political contexts. Instructor(s): Salikoko Mufwene Terms Offered: Spring Equivalent Course(s): LING 26910, ANTH 26910

CHDV 27015. Scientific and Humanistic Contributions to Knowledge Formation. 100 Units.
In this course, we will explore whether the sciences and the humanities can make complementary contributions to the formation of knowledge, thus leading to the integration and unification of human knowledge. In the first part of the course we will take a historical approach to the issue; we will discuss how art and science were considered complementary for much of the 18th and 19th century (for example, in the views and work of Wolfgang Goethe), how they became separate ("the two cultures") in the middle of the 20th century with the compartmentalization of academic disciplines, and how some attempts have recently been made at a reunification under the concept of 'consilience'. In the second part of the course, we will focus on conceptual issues such as the cognitive value of literature, the role of ideas in knowledge formation in science and literature, the role of creativity in scientific and literary production, and how scientific and philosophical ideas have been incorporated into literary fiction in the genre known as 'the novel of ideas'. As an example of the latter, we will read the novel 'One, No One, and 100,000' (1926) by Luigi Pirandello and discuss how this author elaborated and articulated a view of the human persona (including issues of identity and personality) from French philosophers and psychologists such as Henri Bergson and Alfred Binet. Instructor(s): D. Maestripieri Terms Offered: Winter Note(s): Part of Study Abroad program in Paris. Satisfies CHD graduate distribution (1) Equivalent Course(s): KNOW 28015, KNOW 47015, HIPS 27515, SCTX 47015, CHDV 47015, CHSS 47015
**CHDV 27250. Psychological Anthropology. 100 Units.**
This course traces the development of the field of psychological anthropology and critically reviews the various paradigms adopted by psychological anthropologists. In our discussions, we will draw examples from different cultural contexts to critically examine the relationship between culture and psychological functioning. By the end of the quarter, you will develop an insightful understanding of the cultural sources of the self, mind, behavior, and mental health as well as a substantial knowledge of the field of psychological anthropology.
Instructor(s): S. Numanbayraktaroglu Terms Offered: Spring
Note(s): Grad distribution: 4*, Undergrad Distribution: 3, 4
Equivalent Course(s): HIPS 27250, ANTH 24321, CHDV 37250, HLTH 27250

**CHDV 27861. Darwinism and Literature. 100 Units.**
In this course we will explore the notion that literary fiction can contribute to the generation of new knowledge of the human mind, human behavior, and human societies. Some novelists in the late 19th and early 20th century provided fictional portrayals of human nature that were grounded into Darwinian theory. These novelists operated within the conceptual framework of the complementarity of science and literature advanced by Goethe and the other romantics. At a time when novels became highly introspective and psychological, these writers used their literary craftsmanship to explore and illustrate universal aspects of human nature. In this course we read the work of several novelists such as George Eliot, HG Wells, Joseph Conrad, Jack London, Yuvgeny Zamytin, Leopold von Sacher-Masoch, Italo Svevo, and Elias Canetti, and discuss how these authors anticipated the discoveries made decades later by cognitive, social, and evolutionary psychology.
Instructor(s): D. Maestripieri Terms Offered: Autumn
Note(s): Distribution requirements: Undergraduate: A; Graduate: 1
Equivalent Course(s): KNOW 21418, CHDV 37861, HIST 34921, CHSS 34921, HIST 24921, HIPS 24921, KNOW 31418

**CHDV 27950. Evolution and Economics of Human Behavior. 100 Units.**
This course explores how evolutionary biology and behavioral economics explain many different aspects of human behavior. Specific topics include evolutionary theory, natural and sexual selection, game theory, cost-benefit analyses of behavior from an evolutionary and a behavioral economics perspective, aggression, power and dominance, cooperation and competition, biological markets, parental investment, life history and risk-taking, love and mating, physical attractiveness and the market, emotion and motivation, sex and consumer behavior, cognitive biases in decision-making, and personality and psychopathology.
Instructor(s): D. Maestripieri Terms Offered: Autumn
Note(s): CHDV Distribution: Undergraduate subject area: A, Graduate distribution: B, 3
Equivalent Course(s): PSYC 37950, ECON 14810, PSYC 27950, CHDV 37950

**CHDV 28055. Queerness in the Shadow of Empire: Sexualities in the Modern Middle East. 100 Units.**
Critics, from both the Right and the Left, claim that liberal sexual regimes are Western, imperial impositions onto Muslim and Middle Eastern societies. On the other hand, LGBTQ+ advocates claim that the restriction of sexuality is itself a colonial legacy. This class will delve into this debate by examining cutting edge empirical and theoretical work on Queer lives in the modern Middle East.
Instructor(s): E. Abelhadi Terms Offered: Distribution: C, 3
Prerequisite(s): Instructor consent
Equivalent Course(s): RDIN 38055, GNSE 30141, RDIN 28055, GNSE 20141, CHDV 38055

**CHDV 29700. Undergraduate Reading and Research. 100 Units.**
Select section from faculty list on web.
Instructor(s): Staff Terms Offered: Autumn Spring Winter
Prerequisite(s): Students are required to submit the College Reading and Research Course Form.
Note(s): Must be taken for a quality grade.

**CHDV 29800. B.A. Honors Seminar. 100 Units.**
Required for students seeking departmental honors, this seminar is designed to help develop an honors paper project that will be approved and supervised by a HD faculty member. A course preceptor will guide students through the process of research design and proposal writing.
Instructor(s): S. Numanbayraktaroglu, Terms Offered: Spring
Prerequisite(s): Consent of the Director of Undergraduate Studies or Preceptor.
Note(s): Eligible students should plan to take the B.A. Honors Seminar in the Spring Quarter of their third year...

**CHDV 29900. Honors Paper Preparation. 100 Units.**
The CHDV 29900 Honors Paper Preparation course helps students successfully complete work on their BA honors paper. In order to complete honors, students who successfully took CHDV 29800 in Spring Quarter of their third year must register for CHDV 29900 Honors Paper Preparation during Autumn Quarter of their fourth year, as a 13th required course. Students are encouraged to collect their data over the summer; then this course scaffolds the process of analyzing data (such as transcription and coding) and writing up BA papers (such as tips on describing methods and peer review). The grade assigned by their thesis supervisor on the final BA paper is retroactively assigned as the grade for this course.
Instructor(s): S. Numanbayraktaroglu, Terms Offered: Autumn
Prerequisite(s): CHDV 29800 and an approved honors paper. Students are required to submit the College Reading and Research Course Form.
