Health and Society

Department Website: https://voices.uchicago.edu/healthandsocietyminor

Program of Study

The Health and Society minor explores the social, political, and economic processes that shape individual and population health. Disability, experiences of illness, categories of disorder, ideals of well-being, and models of medical intervention can all vary between cultural settings and across history. Rapid changes in medicine and biotechnology create new understandings and expectations about illness, health, and well-being. At the same time, inequalities in access to care and in health outcomes across populations, in the United States and globally, have become important to conversations in policy and practice alike. At the individual level, how and where one lives may influence a range of conditions and outcomes including mental health, the onset of diabetes, and the length of life. Health is also influenced—in both positive and negative ways—by our relationships and social networks. Finally, people’s life chances and health trajectories form within frameworks of health care policy and systems of provision and exposure to environments that reflect historical legacies, economic activity, and political choices. To understand health in its broader contexts, this minor encompasses a range of disciplines and methods in the social sciences, and differential emphases on theory, practice, and policy implications.

A minor in Health and Society will provide a background for medical school, the allied health professions, public health, health policy, health advocacy, the study of law with an emphasis on health, and doctoral work in a range of social science disciplines.

Application to the Health and Society Minor

College students in any field of study may complete a minor in Health and Society. The flexibility of this minor complements majors in any of the disciplines. Students who elect the minor program in Health and Society must contact the program manager before the end of Spring Quarter of their third year to declare their intention to complete the minor. The program manager must submit approval on the Consent to Complete a Minor Program form provided by the College to the student's College adviser by the Spring Quarter of the student’s third year.

Thesis Prize

The Health and Society program offers an annual prize for the best undergraduate thesis written about a topic that explores health and/or medicine from a social sciences perspective, broadly conceived. The prize will be awarded to a BA thesis that exemplifies the highest qualities of originality, disciplinary rigor, and relevance to health and society. Students enrolled in any program of study in the College are encouraged to apply. Submission details are available on the Health and Society website.

Summary of Minor Requirements

The Health and Society minor requires a total of five courses, including HLTH 17000 Introduction to Health and Society, which provides exposure to a range of approaches and perspectives in the social sciences, and four approved courses designated as counting toward the Health and Society minor. Please see the Approved Courses list below.

HLTH 17000  Introduction to Health and Society  100
or HLTH 17001  Introduction to Health and Society II
Four electives chosen from the list of Approved Courses  400
Total Units  500

* Students may only include one of the following methods courses toward the minor: ANTH 21420 Ethnographic Methods, CHDV 20100 Human Development Research Design, CHDV 20101 Applied Statistics in Human Development Research, ECON 21010 Statistical Methods in Economics, PLSC 22913 Political Science Research Methods, SOCI 20001 Sociological Methods, SOCI 20004 Statistical Methods of Research, SOSC 20112 Introductory Statistical Methods and Applications for the Social Sciences, SOSC 20223 Ethnographic Research Methods, or SOSC 20224 Virtual Ethnographic Field Research Methods.

Approved Courses

These courses may be used to satisfy the minor course requirements. Additional approved courses will be updated as they are added each quarter. Not all courses will be offered each year. Please check the Health and Society Minor website for complete listings and for information about current course offerings.

Up to one of the following:

ANTH 21420  Ethnographic Methods  100
CHDV 20100  Human Development Research Design  100

- HMRT 21400  Health and Human Rights                                      100
Students who elect the minor program in Health and Society must meet with the program director before the end of Spring Quarter of their third year to declare their intention to complete the minor. The director’s approval for the minor program should be submitted to a student's College adviser by the Spring Quarter of a student's third year.

Courses in the minor may not be double counted with the student’s major(s), other minors, or general education requirements. Courses in the minor must be taken for quality grades, and more than half of the requirements for the minor must be met by registering for courses bearing University of Chicago course numbers.

Students may petition to count one course not featured in the Approved Courses list toward the minor. Petitions will be reviewed on a case-by-case basis. A petitioned course must connect to issues of health broadly
conceived in order to be considered: it should explore the processes that shape individual and population health in their social, material, and physical contexts.
