The College offers a wide spectrum of minors across a number of subjects and divisions. These range from intensive explorations of a single field to highly interdisciplinary examinations of more broadly defined concepts. Students are not required to complete a minor. Minors are a way of focusing a student’s general electives, demonstrating fluency in areas not reflected in a major, complementing a major, or simply allowing students the opportunity to widen the scope of their education in the College. Minors typically consist of five to seven courses. Not every major offers a minor; some minors are unaffiliated with any major. Just as with majors, a minor will be noted on students' transcripts.
