**PROGRAM OF STUDY**

The Department of Music aims to broaden the exposure to and enrich the understanding of the various Western, non-Western, and vernacular musical traditions of the world. Courses develop students’ ability to analyze works and their structures; to understand music within historical lineages and socio-cultural practices; and to engage in the creative practice of music via composition and performance. The BA program in music provides a critical foundation for graduate work in music studies, careers in media production, education, or research, and provides an artistic, humanistic complement to study in other fields. The department also sponsors a music minor as well as a number of courses, performance organizations, and concert experiences available to the non-major.

**COURSES FOR NON-MAJORS**

**General Education**

General education courses listed here, which do not count toward the music major or minor, are open to all students, regardless of previous musical background; in most cases reading music notation is not required.

**Other Courses for Non-Majors**

For additional electives, non-majors may wish to consider courses in such interdisciplinary programs as Signature Courses in the College (SIGN) or Big Problems (BPRO), and other MUSI electives that do not require score reading. Performance ensembles are also open to all students regardless of major by audition.

**BA PROGRAM REQUIREMENTS**

The program for the bachelor’s degree in music offers a balance of academic and practice-based approaches to music study. Majors are required to earn at least 1100 units of music course work divided between analytical, historical, cultural, and creative practices. Students have considerable agency to design a major that accords with their own interests, with an additional option to write a BA thesis or composition eligible for special honors. Students plan and formalize their major program of study in consultation with the Director of Undergraduate Studies (see Advising).

**SUMMARY OF REQUIREMENTS: BA IN MUSIC**

The music major requires 1100 units of study. Six “foundation” courses are chosen from the following areas: Analysis and Techniques, Histories and Cultures, and Creative Practices. Five additional elective courses are also required, which should be chosen in consultation with the Director of Undergraduate Studies.

A placement exam given on the first day of MUSI 15100 advises students on where to enter the music theory and analysis sequence. Majors should enroll in MUSI 15100, take the placement exam, and be advised on whether to take MUSI 14300, to stay in MUSI 15100, or to begin with MUSI 15200. The Director of Undergraduate Studies can provide additional guidance.

Three complete quarters in a Performance Ensemble +  100

§ Students must take two group composition courses before inquiring about private study in music composition (MUSI 24000 Composition Lessons).
+ Students must fulfill three quarters of a performance ensemble to receive major credit. Students wishing to count ensemble participation in the major or the minor must enroll for credit on a Pass/Fail basis. A maximum of 300 units of ensemble participation (100 units as foundations + 200 units as electives) count toward the major. Students can participate in ensembles on a not-for-credit basis by enrolling for zero credit. For more information, see Performance Program below.

ELECTIVES
Electives should be chosen in consultation with the Director of Undergraduate Studies according to individual goals. Options include:

- **Academic Courses**, additional foundations-level courses count as electives.
- **Performance Ensembles**, up to 200 additional units (a maximum of 300 units of performance ensembles in total may count toward the major).
- **BA Thesis**, MUSI 29500 Undergraduate Honors Seminar and MUSI 29900 Senior Essay or Composition

Students are invited to write an essay or composition on the topic of their choosing as a BA thesis. Enrollment in MUSI 29500 Undergraduate Honors Seminar, typically offered each Spring Quarter, is designed to prepare third-year students to write a BA thesis. Thesis writers should enroll in MUSI 29900 Senior Essay or Composition during either the Autumn or Winter Quarter of the fourth year. MUSI 29500 and 29900 count toward electives in the major. The thesis topic can be interdisciplinary, but cannot jointly be submitted as a BA thesis in another major. Depending upon GPA, writing a BA thesis may make students eligible for Special Honors. Prospective thesis writers should speak with the Director of Undergraduate Studies about possible topics, advisers, and research plans in Autumn, Winter, and Spring Quarters of the third year. Completed BA theses are generally submitted to music faculty for award consideration at the beginning of the third week of the quarter in which a student intends to graduate.

**SPECIAL HONORS**

Students may be recommended for special honors if they (1) have a GPA of at least 3.0 overall, (2) have a GPA of at least 3.5 in the music major, and (3) present an outstanding BA thesis or composition, as judged by the Department of Music faculty, under the approved supervision of a Department of Music faculty member.

**MINOR PROGRAM IN MUSIC**

The program for the minor requires 700 units, including two analysis courses, one historical or cultural course, one creative practice course, and three electives in accord with the student's interests. Students can begin the minor in any of the three columns (Analysis and Techniques, Histories and Cultures, or Creative Practices).
Students plan and formalize their minor program of study in consultation with the Director of Undergraduate Studies (see Advising).

**SUMMARY OF REQUIREMENTS: MINOR IN MUSIC**

Students wishing to minor in music must take 700 units total, comprising four foundational courses and three elective courses chosen in consultation with the Director of Undergraduate Studies.

Three complete quarters in a Performance Ensemble * 100

* Students must fulfill three quarters of a performance ensemble to receive minor credit. Students wishing to count ensemble participation in the major or the minor must enroll for credit on a Pass/Fail basis. A maximum of 200 units of ensemble participation (100 units as foundations + 100 units as electives) count toward the minor. Students can participate in ensembles on a not-for-credit basis by enrolling for zero credit. For more information, see Performance Program below.

**PERFORMANCE PROGRAM**

Ensembles are open to all qualified students from all areas of the University through competitive auditions held at the beginning of Autumn Quarter. Participation in consecutive quarters (Autumn, Winter, Spring) is expected, unless there are extenuating circumstances (in which case, students may speak with the ensemble director and the Director of Undergraduate Studies). Beginners are welcome in non-Western ensembles, where previous experience is not assumed or required. Most organizations rehearse weekly. Ensemble directors establish their own standards of attendance, participation, repertoire amounts, and performances, within ranges approved by the Music Department faculty, in their individual syllabi.

Music majors and minors who complete a year of performance work in an ensemble with a passing grade will receive 100 units of credit upon completion, by request with the Director of Undergraduate Studies in the
Department of Music. A maximum of three years (300 units) is allowed toward the major, and two years (200 units) toward the minor. Students who are participating in an ensemble enroll on a Pass/Fail basis. There is no option to take an ensemble for a quality grade. Majors and minors who have completed their desired or allowed for-credit units are encouraged to continue participating in an ensemble without requesting additional units of credit. Non-majors and non-minors cannot request credit.

OTHER PERFORMANCE ACTIVITIES

Students may wish to pursue additional musical activities at the University, including Tea Time Concert Series, Gilbert and Sullivan Opera Company (http://www.gilbertandsullivanoperacompany.org/), and many other campus opportunities (https://music.uchicago.edu/additional-performance-opportunities/). These activities do not earn credit or satisfy the Creative Practice requirement for the music major or minor.

For further information, students are welcome to visit the University of Chicago Music Performance Program website at music.uchicago.edu/performance/performance-opportunities (https://music.uchicago.edu/performance/performance-opportunities/) or contact Barbara Schubert, Director of Performance Programs, at bschuber@uchicago.edu.

ADVISING

Students have considerable flexibility to design their own major or minor, but benefit from regular consultation with the Director of Undergraduate Studies. Prospective majors are required to consult with the Director of Undergraduate Studies before declaring. After consultation, declaration is formalized with the student’s College adviser via my.uchicago.edu (https://my.uchicago.edu/). Majors are advised to meet with the Director of Undergraduate Studies at least yearly to design and execute their program of study. Third-year majors should meet with the Director of Undergraduate Studies quarterly to discuss a BA thesis option and to ensure timely completion of degree requirements.

Prospective minors are required to consult with the Director of Undergraduate Studies before declaring, ideally before the end of Spring Quarter of their third year. During the consultation, the student and the Director of Undergraduate Studies will complete the Consent to Complete a Minor Program (https://humanities-web.s3-us-east-2.amazonaws.com/college-prod/s3fs-public/documents/Consent_Minor_Program.pdf) worksheet, available from the College adviser. The student will submit the completed minor form, with the signature of the Director of Undergraduate Studies, to the College adviser.

GRADING

Courses used to meet the general education requirement in the arts must be taken for a quality grade. Courses taken to meet requirements in the major or minor also must be taken for quality grades with the exception of performance ensembles, which are taken Pass/Fail.

Courses in the major or minor may not be double counted with the student’s major(s), other minors, or general education requirements. More than half of the requirements for the minor must be met by registering for courses bearing University of Chicago course numbers.

MUSIC COURSES

MUSI 10100. Introduction to Western Art Music. 100 Units.
This one-quarter course is designed to enrich the listening experience of students, particularly with respect to the art music of the Western European and American concert tradition. Students are introduced to the basic elements
of music and the ways that they are integrated to create works in various styles. Particular emphasis is placed on
musical form and on the potential for music to refer to and interact with aspects of the world outside.
Terms Offered: Autumn Spring Winter
Note(s): Background in music not required. Students must confirm enrollment by attending one of the first two
sessions of class. This course meets the general education requirement in the arts.

**MUSI 10200. Introduction to World Music. 100 Units.**
This course is a selected survey of classical, popular, and folk music traditions from around the world. The
goals are not only to expand our skills as listeners but also to redefine what we consider music to be and, in the
process, stimulate a fresh approach to our own diverse musical traditions. In addition, the role of music as ritual,
aesthetic experience, mode of communication, and artistic expression is explored.
Terms Offered: Autumn Spring Winter
Note(s): Background in music not required. Students must confirm enrollment by attending one of the first two
sessions of class. This course meets the general education requirement in the arts.
Equivalent Course(s): CRES 10200

**MUSI 10300. Introduction to Music: Materials and Design. 100 Units.**
This introductory course in music is intended for students who are interested in exploring the language,
interpretation, and meaning of music through coordinated listening, analysis, and creative work. By listening to
and comprehending the structural and aesthetic considerations behind significant written and improvised works,
from the earliest examples of notated Western music to the music of living composers and performers, students
will be prepared to undertake analytical and ultimately creative projects. The relationship between cultural and
historical practices and the creation and reception of music will also be considered. The course is taught by a
practicing composer, whose experience will guide and inform the works studied. No prior background in music
is required.
Terms Offered: Autumn Spring Winter
Note(s): Background in music not required. Students must confirm enrollment by attending one of the first two
sessions of class. This course meets the general education requirement in the arts.

**MUSI 10400. Introduction to Music: Analysis and Criticism. 100 Units.**
This course aims to develop students' analytical and critical tools by focusing on a select group of works drawn
from the Western European and American concert tradition. The texts for the course are recordings. Through
listening, written assignments, and class discussion, we explore topics such as compositional strategy, conditions
of musical performance, interactions between music and text, and the relationship between music and ideology
as they are manifested in complete compositions.
Terms Offered: Autumn Spring Winter. Given the current circumstances, most components of the class will be
asynchronous, with occasional Zoom meetings. The assignments will include a variety of activities that can be
done asynchronously, within a specified timeline. These are difficult times for all, and we are all in this together.

combines an active workshop in contemporary music-making with studies of historical traditions of performance
and theories of performativity. In addition to learning about social and cultural dimensions of performance,
different styles of performers, and aspects of aesthetics, technique, dramaturgy, and improvisation, students will
acquire practical experience showcasing new musical and theoretical skills.
Terms Offered: Autumn Spring Winter
Note(s): This course meets the general education requirement in the arts.

**HIST 12002. Feuds, Vengeance, and War: Violence in Medieval Europe, 500-1550. 100 Units.**
Violence and conflict are dominant themes of medieval and early modern European history. This course will
introduce students to the wide variety of perspectives with which one can approach violence in its western
European context from 500 to 1550. Students will not only analyze and evaluate the historiographic and
methodological contributions made by the existing scholarship on violence, but also have the opportunity
to explore and evaluate various sources for the study of violence. The course itself will be organized around
chronological, thematic, and regional lines of investigation ranging from Merovingian France to Early Modern
Scotland. Guiding this class will be a broader methodological discussion on the relative merits and demerits of
different approaches to studying violence’s role in pre-modern societies and politics and how they continue to
influence contemporary perceptions of violence, past and present.

Chamber Music Program ensembles receive three coachings per quarter focusing on instrumental technique, interpretation, and collaboration, with the expectation that ensembles maintain regular weekly rehearsal schedules and perform their repertoire at least once during the academic year. Performance opportunities are available at a wide variety of venues on the U of C campus and in the Hyde Park community. Additionally, CMP participants are eligible to take private lessons with the instrumental teacher of their choice, and may audition for the annual Lesson Awards and the bi-annual Concerto Competition.

MUSI 20719. Music and Mind. 100 Units.

This course explores research on music in the mind and brain sciences as it has developed over the past three decades. During this time, we have come to an increasingly refined understanding of the ways the brain processes sound. It remains the case, however, that not all sound is music, and in this course we will investigate how musical sound is organized to make it musical, and how this organization reflects the capacities of the human mind. Interactive lectures (Mondays and Wednesdays) and discussion sections (Fridays) will engage both scientific and humanistic literature. Among the topics the class will engage are the origins and functions of music, absolute pitch, music and memory, how music shapes emotional responses, movement and music, connections between music and images, and the relationship between music and language.

MUSI 23125. Oral Performance and Gender from the Middle Ages to Slam Poetry. 100 Units.

Italian culture has been continuously enriched by oral artistic practices. While the written page has allowed these practices to endure over time, they were also, and often primarily, transmitted through the bodies of performers. Is it possible to reconstruct the voices beyond the page? How does thinking about performance enhance our understanding of the artistic product and, moreover, of the society where this product originated? What are the political implications of the binary division between the written page and the human voice? Why are oral practices largely excluded from the literary canon? Is there a correlation between marginalized oral practices and queerness? The content of this course will consist of various Italian oral practices, ranging from the courtly lyric poetry of the Middle Ages to the contemporary spoken word scene. Additionally, the course will focus on female and queer voices, with the goal of tracing a parallel between the ephemerality of performances and the marginalization of communities. The course will integrate artistic content with theoretical material on the topic of voice, as well as insights from feminist and queer studies, media studies, and performance theory. At the end of the course, students will produce their own creative project with the purpose of answering the following question: how does thinking about performance from a practical point of view help to inform our understanding of performance from a theoretical perspective?

MUSI 23221. Music in the Indian Ocean. 100 Units.

In this course, we gather sound and music to afford new ways to understand the history and culture of a geographical region. Instead of an area study, we concern ourselves with listening to sound worlds, local and global. We balance the reading of primary and secondary sources—the writings of travelers and practitioners alongside theoretical treatises and modern ethnomusicological scholarship—with the different listening practices,
especially collections and assemblages of recorded sound and film. Each student will develop her or his own means of entering different sound worlds. Accordingly, students with varying degrees of musical background will be able to navigate the Indian Ocean World in ways suitable to their own backgrounds and interests. Students from the Humanities, Social Sciences, and Divinity are welcome. Both College students and graduate students may register for the course, with the only distinction being in the scope of the final project.

This course provides an introduction to ethnomusicology and related disciplines with an emphasis on the methods and contemporary practice of social and cultural analysis. The course reviews a broad selection of writing on non-Western, popular, vernacular, and “world-music” genres from a historical and theoretical perspective, clarifying key analytical terms (i.e., “culture,” “subculture,” “style,” “ritual,” “globalization”) and methods (i.e., ethnography, semiotics, psychoanalysis, Marxism). In the last part of the course, students learn and develop component skills of fieldwork documentation and ethnographic writing.

MUSI 23321. Bollywood Beats: Music and Sound in Popular Hindi Cinema. 100 Units.
This course explores the music and sound of popular Hindi cinema from aesthetic, social, cultural, economic, historical, and political perspectives. Students will be introduced to the musical conventions and practices of the genre, and to changes in Bollywood musical style over the course of the 20th and 21st centuries. We will watch select films with keen attention to music’s imbrication with cinematic visuality, narrative, technology, and dance, and with consideration of issues like emplacement, gender, caste, religion, capitalism, nationalism, and transnationalism. Bollywood is a cosmopolitan music, drawing from and contributing to a range of regional and international music practices; we also venture into some of those streams.

MUSI 23322. Setting Sound Standards: Music, Media, and Censorship in South Asia. 100 Units.
This course aims to introduce students to various musical and performance traditions in South Asia and their evolution within regimes of institutional, legal and media censorship. The course aims to understand how media environments and cultures of censorship are in some ways fundamental to shaping performance cultures in South Asia in the twentieth century. How do traditions of musical performance entrenched in the politics of caste, communalism, religion, sexuality and gender interact with regimes of censorship and new media? How do the latter remake and unmake said traditions? Be it the mid-century ban on film music by All India Radio to reflect the aspirations of a newly-emerging nation or the appropriation and urbanization of ‘folk’ musical practices within the recording studios in Nepal by upper-caste, upper-class male performers- censorship and media infrastructures have been integral to the current ontologies of diverse musical genres in South Asia. Through the analysis of a variety of primary and secondary texts on performance and musical aesthetics, media and music ethnographies, reception and production histories as well as critical listening/viewing exercises, this course seeks to complicate mainstream Euro-American narratives that tend to posit media-modernities as global and uniform.

We will seek to understand how South Asian musical cultures and sound practices enter into a creative interplay with musical discourses and media-materialities emerging in the West.

MUSI 23324. The Human Form in Contemporary Art. 100 Units.
In a present where humanity faces planetary challenges with an unprecedented urgency, the human form - what Marx calls our “genus-being” (Gattungswesen) - has become a focus for artistic production of all sorts. The thesis of the class is this: Contemporary art is an actualization of the human form that doesn’t presuppose the form, doesn’t take it for granted, but instead troubles the form and poses it as a question. The class considers presentations of the form in performance art (Tino Sehgal, Anne Imhof, Wu Tsang), sculpture (Kara Walker, Cai Guo-Qiang, Cecilia Vicuña), writing (Friederike Mayröcker, Layli Long Soldier, Tracie Morris), sound (María Chavez, Christina Kubisch, Samson Young), and painting (Michael Armitage, Tammy Nguyen, Mark Bradford).

The class contextualizes these artists with theoretical work by Sylvia Wynter, Donna Haraway, Bruno Latour, Peter Sloterdijk, Dipesh Chakrabarty, Jane Bennett, Achille Mbembe, Eva Horn, and Emanuele Coccia. Readings and discussion in English.

MUSI 23410. Music of the Middle East. 100 Units.
Historically one of the most complex and contested regions in the world, Israel/Palestine has a music culture that bears witness to processes of connection and separation. The politics of music in Israel/Palestine grow from conflicted beliefs about authenticity and ownership, the sounds of difference and sameness. The sacred and the secular intersect, and boundaries of practice and genre both divide and unite. Local practices have never been independent of global movement, be it in diaspora, pilgrimage, or the distant residence of refugees. The musical landscape of the region, therefore, has shifted throughout history, accessible primarily through the archaeology of music scholarship. In this proseminar we shall look at specific moments when the musics of Israel/Palestine
converged, responding to and shaping historical change and conflict. We shall explore musical repertories and practices of all kinds, whether sacred or secular, vernacular or elite.

MUSI 23509. Eurovision. 100 Units.
Each May since 1956 popular musicians and fans from Europe gather in a European metropolis to participate in the Eurovision Song Contest (ESC), a competitive spectacle in which musicians from one nation compete against one another. Organized, funded, and broadcast by the European Broadcasting Union, the largest conglomerate of national radio and television networks in the world, the ESC is extensively participatory, creating its own communities of fans, musicians, musical producers, and ordinary citizens, who join together at all levels of society to interact with the politics and historical narratives of Europe. From the moment of heightened Cold War conflict at the birth of ESC to the refugee crisis and the rise of right-wing nationalism in the present, ESC has generated public discourse that not only reflects European and global politics, but provides a conduit for local and national citizenries to respond and shape such public discourse about gender and sexuality. The weekly work for the course draws students from across the College into the counterpoint of history and politics with aesthetics and popular culture. Each week will be divided into two parts, the first dedicated to reading and discussion of texts about European history and politics from World War II to the present, the second to interaction with music. Students will experience the ESC through close readings of individual songs and growing familiarity with individual nations with a participatory final project.

MUSI 23622. Performing the U.S. Supreme Court. 100 Units.
How do American Supreme Court justices engage with performance? How do performing artists engage with the United States Supreme Court? This class explores the intersections between music, theater, dance, and "the highest court of the land." We will discuss how the court has defined "performance" in various intellectual property and arts-related opinions. We will analyze recent justices' own performances in the courtroom, at the Washington National Opera, and on the salsa dance floor. And we will watch, listen to, and interpret songs, operas, plays, and films that set the text of Supreme Court opinions. By the end of the quarter, students should understand how performance shapes the making and the memory of American law, and how law shapes the concept and the content of artistic performance. Weekly readings and screenings will include excerpts from secondary sources, Supreme Court oral arguments and opinions, and musical and theatrical performances. To gain experience both reading law and presenting in public, students will perform a short spoken, danced, and/or musical setting of a Supreme Court opinion (this can be an existing artistic setting or one of students' own devising), and will write a five-page paper analyzing how their chosen artistic setting reflects the judicial rhetoric of the opinion.

This course has as its focus the varied social agents, discourses, processes and institutions that contribute to current and historical understandings of rock. Issues of musical style, questions of historiography, the technologies and techniques of audio recording, the structures of the recording industry, the status of so-called subcultures and mainstreams, and the politics of gender, race and sexuality are among the items which our readings, class discussions and assignments will explore. As such, the inculcation of an "appreciation" of rock, the transmission of a canon and the validation of individual musical tastes are projects that are antithetical to our inquiry. Students will also be encouraged, through select readings and listening assignments, to contextualize rock within a broad field of twentieth- and twenty-first century music-making and attendant social, political and economic processes.

The history of the American musical in the 20th century is paradoxical. While the genre is often denigrated as staging lyrical utopias of romance and adventure allowing audiences to escape depressing quotidian realities, many musicals did seek to engage some of the most pressing social issues of their day. In this course, we will look-and listen-closely to four differing musicals from the 20th century, studying their creative origins, while also analyzing their complex social meanings revealed through the story, music, lyrics, staging, and dance. MUSI 24722. Music and Environment. 100 Units.

Over the last four centuries, how have the creators and practitioners of Western art music imagined nature as a recurring other—a foil to the art and artifice of our human world? This course is a trans-historical survey of the multifaceted relationships between musical creators, audiences, and the natural world. Over the 10-week course we will explore humankind’s evolving relationship with the environment, calling upon a diverse array of composers, performers, and artists. While music offers a space in which to contemplate our relationship with nature, the natural world has long offered an opportunity for artists to expand their horizons, suggesting new sonic resources, new ways of performing, and new understandings of temporality. The course is organized in three large modules: listening to the environment, representing the environment, and speaking for the environment. The first introduces a set of listening practices—deep listening and soundwalks—to explore how these listening practices open up a range of possibilities for the interpenetration of natural sounds within musical performances, and musical performances in outdoor spaces. The second module turns our focus toward translaturations of natural phenomena and animal sounds, mediated through instrumental or electronic renderings. The final module examines the ways in which music can engage with, critique, and perform (or fail to perform) environmental activism.

MUSI 24820. Video Game Music Production and Sound Design. 100 Units.

The advent of video game soundtrack releases and live game music concerts substantiate the importance of music and sound in games, not just as accompaniments but as essential aspects of the gaming experience. This production course surveys the history of sound effects, music, and design in games beginning with the bleeps and bloops of the 1970s and concluding with the ambient, nonlinear soundscape of many contemporary games. Following the timeline media theorist Karen Collins presents in her documentary Beep, this course will explore electronic sound technologies including virtual analog synthesis, frequency modulation, bit reduction, General MIDI, and sample-based production. Each student will compose a game soundtrack demo for their final project. This course welcomes students who are both new to and experienced in sound production; the complexity of each assignment can be adjusted based on experience.

MUSI 25020. Opera Across Media. 100 Units.

Open to all undergraduates. Over the course of the last hundred and twenty years, opera and cinema have been sounded and seen together again and again. Where opera is commonly associated with extravagant performance and production, cinema is popularly associated realism. Yet their encounter not only proves these assumptions wrong but produces some extraordinary third kinds-media hybrids. It also produces some extraordinary love affairs. Thomas Edison wanted a film of his to be “a grand opera,” and Federico Fellini and Woody Allen wanted opera to saturate their films. Thinking about these mutual attractions, “Opera across Media” explores different operatic and cinematic repertories as well as other media forms. Among films to be studied are Pabst’s Threepenny Opera (1931), Visconti’s Senso (1954), Powell and Pressburger’s Tales of Hoffmann (1951), Zeffirelli’s La traviata (1981), De Mille’s Carmen (1915), Losey’s Don Giovanni (1979), Bergman’s The Magic Flute (1975), and Fellini’s E la nave va (1983). No prior background in music performance, theory, or notation is needed.

MUSI 25421. Bach Yesterday and Today. 100 Units.
Johann Sebastian Bach is somewhat of a cipher, one whose image and meaning has changed remarkably over the centuries. In this class, we will look at many of these shifting images of the famous Leipzig composer. Was he the pious Thomaskantor dutifully churning out his cantatas and passions or the intellectual wizard of an abstract and dying fugal art? A belated hero of German nationalism, or a universal icon of musical humanity celebrated by many as the greatest composer of all time? We will do a fair amount of readings that reflect many of these changing views of Bach. But we will also spend much of our time listening to-and studying-his music, seeing what clues he has offered to help us understand this most enigmatic of composers. While an advanced understanding of music theory is not a prerequisite for this course, it will be important that you can read music and helpful to have a foundational understanding of harmony and counterpoint.

MUSI 25422. Hearing Popular Music. 100 Units.
For decades, popular music has been the soundtrack to many Americans’ lives. This class explores the structure, function, and impact of a range of vernacular musics from the 20th and 21st centuries. Our approach to popular music will be by turns historical, analytical, and sociological. Students will learn about formal designs of pop songs, from verse-chorus to much more elaborate structures, along with antecedents in the Great American Songbook tradition. Students will learn to analyze the harmonic and melodic conventions in various genres, and also spend significant time with groove analysis and design. Finally, the class will interrogate the sociological relevance of vernacular musics, weaving in discussions of relevant social issues from radio play to popularity, and from subcultural appeal to racial identity. This class is open to anyone who listens carefully and with passion, and who wants to grow their ability to write about music. Experience as a practitioner of any type of music and/or a passing knowledge of music theory will be helpful, but it is not necessary to read notated music for this course.

Students will learn to describe musical and choreographic techniques and to distinguish between the different subgenres that constitute flamenco. Through a study of the music and complementary readings, we will learn about gitano culture and explore issues of identity, representation, class, gender, and ethnicity.

MUSI 25721. Music of the Black Radical Tradition. 100 Units.
Black artists are often written out of the history of musical experimentalism. John Cage’s place in the canon is secure, but what of Cecil Taylor’s? Or Anthony Braxton’s? Or Matana Roberts’s? Labels like ‘jazz’ or ‘free jazz’ segregate these artists from white experimentalists, suggesting that their music is best understood within a narrowly racialized genre category, rather than as part of the experimental mainstream, with its assumed whiteness, institutional support, and inbuilt prestige. This course redresses this imbalance by centering the music of Black radical composers in the latter half of the twentieth century. We will study the music of a wide range of composers, including many associated with the Association for the Advancement of Creative Musicians (AACM), one of the most venerable musical collectives of the twentieth century, rooted right here in Chicago’s South Side. The course will tack between studies of the music’s sounds and its historical, political, and ideological contexts. We will develop critical and analytical language for engaging the often-bracing sound worlds of these composers while building out a contextual understanding of their work as at once capably experimental and situated in a political context of resistance.

MUSI 25722. The Musical Interface: Constraint and Creativity. 100 Units.
Music-making involves constraint: the layout of a keyboard or guitar, the poetic systems of an epic storyteller, the practice techniques of a singer who cultivates a certain sound, or even the lines of code that an algorithmic music-maker strings together. New technologies bring new rules, as well as new ways to break the rules: autotuned vocals are no longer derided, and tools like Melodyne are now a standard part of music production. Constraint, then, produces creativity—but how does this look with particular instruments and traditions? How do artists make the most of their tools? In this hands-on class, we will explore the interface through the concepts of affordance, interval systems, algorithms, and generalizable schemas. You won’t just analyze art: you will also produce it and discuss your experiences with each type of interface. Our topics will include electronic music constructed on digital audio workstations and through code, the piano keyboard, the harmonica, Korean p’ansori sung storytelling, streaming platforms and recommendation algorithms, and the Italian solfeggio tradition. This class includes a creative final project in the sonic medium of your choice.

**MUSI 26725. Staging Richard Wagner’s Ring of the Nibelung in the 21st Century. 100 Units.**
This team-taught course explores the challenges of staging Richard Wagner’s sprawling 19th-century tetralogy The Ring of the Nibelung in the 21st century. The course will offer an introduction to The Ring, including its complicated place in history (including its reception and production history), and how it has been thought about in recent musicology and critical theory. But first and foremost, we will be exploring how the piece is being staged today. To that end, we will explore four productions of the tetralogy that are currently being prepared at leading opera houses around the world - in Munich, London, Berlin, and Oslo - speaking, via Zoom, with artistic directors and the production teams about their ideas and ambitions. What are the interpretive challenges and opportunities in staging this mammoth work? How do these productions seek to engage the tetralogy’s exceedingly complicated aesthetic ambitions, political baggage, and production history? And how do specific geographical, cultural, and historical conditions affect the artistic project of each production? Our discussions will encompass a range of fields, approaches, and topics. Among the themes we plan to examine are the aspiration to aesthetic totalization, the politics of community, the relationship between canonicity and critique, the notion of distress or emergency (the German term is Not), and some astonishingly lurid fantasies of family life-mostly of family dissolution. Moreover, we will approach the questi

**MUSI 26780. Caribbean Music, Performance, and Popular Culture in the Age of Precarity: 1990 to the Present. 100 Units.**
This course explores the concept of precarity and its influence on artistic and cultural expressions within contemporary Caribbean popular culture, primarily from the 1990s to the present day. Precarity is broadly defined as the feeling or experience of instability resulting from various social, economic, political, and environmental factors, including structural adjustments, climate change (such as hurricanes and earthquakes), and the impact of the COVID-19 pandemic, among others. Particular emphasis is placed on the role of art in shaping popular responses to precarity, including significant events like mass protests, the Black Lives Matter and George Floyd protests, uprisings against the deportation of Haitians in the Dominican Republic, as well as interrelated international movements like #LifeinLeggings and #MeToo. The course delves into how Caribbean performance and popular music have engaged with these issues, with a focus on music genres like dancehall, wylers, soca, reggaeton, and the individual artistic works of Caribbean artists such as LaVaughn Belle, Helen Ceballos, Joiri Minaya, and others. These artists use their work to explore themes of precarity and to envision
potential alternatives to the contemporary challenges of insecurity, touching on issues related to gender, sexuality, and race.

MUSI 27423. Divas, Idols, Material Girls: Gender and Sexuality in Music Videos. 100 Units.
The stark black and white of Madonna's "Vogue" and the pinks and sparkles of 'Material Girl.' The explosive surprise releases of Beyoncé's BEYONCE and Lemonade visual albums. The lavish cinematic spectacle of Taylor Swift's 'Bad Blood' and the farfante intertextuality of SM Entertainment's Aespa. Since MTV's advent in 1981, hit music videos have made a number of pop songs inextricable from iconic imagery and choreography; ubiquitous digital devices and the rise of platforms like YouTube and TikTok have only increased pop music's audiovisuality. Looking at and listening to female pop icons raises fraught questions of agency, representation, race, sexuality/sexualization, bodies, commodification, and capital. In this course, students will gain a vocabulary for talking about both the audio and visual parameters of music video, and they will use this vocabulary to engage with critical frameworks for examining meaning, circulation, and reception in contemporary music videos. Assignments across the course will allow students to experiment with a range of writing and media genres, including critical close readings, micro-reception histories, thinkpieces, podcast episodes, and video essays.
