

Neuroscience

Department Website: <http://neuroscience.uchicago.edu/undergraduate>
Program of Study

Neuroscience is the study of neurons and neural systems and their outputs: sensation, perception, homeostasis, and behavior. Neural function is investigated at the levels of molecules, cells, circuits, organisms, and species, making neuroscience inherently multidisciplinary. In addition to established neuroscience career paths in academia, medicine, and the pharmaceutical industry, new careers for students of neuroscience are emerging in economics, software development, and other fields requiring "big data" analysis or a mechanistic understanding of how humans think. The course of study in the undergraduate major in neuroscience provides students with the background and skills appropriate for these diverse careers.

The University of Chicago offers a bachelor of arts (BA) degree and a bachelor of science (BS) degree in Neuroscience. The Neuroscience major is designed to accommodate students with the range of scientific variety that one finds at the professional level of neuroscience, including physics, chemistry, computer science, engineering, mathematics, biology, psychology, and medicine. Neuroscience faculty at the University of Chicago have expertise in all of these areas and are distributed across the Biological Sciences, Social Sciences, and Physical Sciences Divisions. Majoring students have the opportunity to take a broad range of courses or to specialize in a particular area.

Declaring the Major

Students who wish to major in Neuroscience should declare the major in their second year.

(Because the Neuroscience major was introduced in the 2016–17 academic year, the Class of 2020 and subsequent classes can design a plan of study in Neuroscience from their first year. Students in the Classes of 2018 and 2019 may also be able to major in Neuroscience, depending on the courses they have already taken, although there is no way to guarantee this. Students in these classes should consult with their College advisers to see if majoring in Neuroscience is feasible.)

General Education

Students majoring in Neuroscience typically begin their general education requirement in the Biological Sciences with BIOS 20186 Fundamentals of Cell and Molecular Biology. Attaining a proper grounding in cell biology is essential before delving into neuroscience as a discipline. To complete the requirement, students may choose to take one of the following: BIOS 20150 How Can We Understand the Biosphere?, BIOS 20151 Introduction to Quantitative Modeling in Biology (Basic), BIOS 20152 Introduction to Quantitative Modeling in Biology (Advanced), BIOS 20187 Fundamentals of Genetics, BIOS 20188 Fundamentals of Physiology, or BIOS 20191 Integrative Physiology. *(Note: The general education requirement for the NSCI major can be fulfilled by courses in the Biology Fundamentals Sequences [20186-20190] without the Biological Sciences prerequisites [BIOS 20150-20151/20152] unless a student pursues a double major in Biological Sciences. Students who choose this path will be expected to possess the competency in mathematical modeling of biological phenomena covered in BIOS 20151 or BIOS 20152.)*

Two alternative paths to fulfilling the General Education requirements exist. 1) Neuroscience majors may take the Pre-Med Sequence for Non-Biology majors. In this case, BIOS 20170 Microbial and Human Cell Biology and BIOS 20171 Human Genetics and Developmental Biology will satisfy the core. (Note that BIOS 20171 must be taken concurrently with BIOS 20172 Mathematical Modeling for Pre-Med Students.) 2) A score of 4 or 5 on the AP Biology exam allows students to enter the Advanced Biology sequence in the Autumn of their first year. This three-quarter, lab-intensive sequence is for students with a strong background in research. Upon completion of the sequence students are awarded two credits, which satisfy the general education requirement in Biological Sciences.

The Major

The basic degree in Neuroscience is the BA, for which requirements are described below. A BS is awarded to students who complete an additional three quarters of Neuroscience electives, which must include one to three quarters of faculty-supervised research (scholarly or experimental) resulting in a written thesis (see Requirements for the Bachelor of Science Degree in Neuroscience below).

The major curriculum includes nine required Neuroscience courses, which provide a comprehensive overview of the field. The BA requires another 700 units of elective courses, which must be selected from the list below. Electives can be chosen for a broad exposure or tailored for depth in a particular area, such as cellular/molecular, systems, cognitive, and computational neuroscience and machine learning.

Students must have their program of elective courses approved by the office of the director of undergraduate studies. The Student Elective Approval Form (<http://neuroscience.uchicago.edu/wp-content/uploads/2017/01/Student-Approval-Form-.pdf>) should be filled out by the end of the third year and submitted to the Neuroscience major director of undergraduate studies for approval at neuromajor@uchicago.edu.

ELECTIVES

No more than three of the following BIOS courses:

300

BIOS 20172	Mathematical Modeling for Pre-Med Students
BIOS 20173	Perspectives of Human Physiology

BIOS 20175	Biochemistry and Metabolism	
BIOS 20187	Fundamentals of Genetics	
BIOS 20188	Fundamentals of Physiology	
or BIOS 20191	Integrative Physiology	
BIOS 20189	Fundamentals of Developmental Biology	
or BIOS 20190	Principles of Developmental Biology	
BIOS 20234	Molecular Biology of the Cell	
BIOS 20235	Biological Systems	
BIOS 20236	Biological Dynamics	
BIOS 20242	Principles of Physiology	
No more than one of the following two-course CMSC sequences:		200
CMSC 12100-12200	Computer Science with Applications I-II	
CMSC 15100-15200	Introduction to Computer Science I-II	
CMSC 16100-16200	Honors Introduction to Computer Science I-II	
BIOS 20200	Introduction to Biochemistry	100
BIOS 24206	Peering Inside the Black Box: Neocortex	100
BIOS 24208	Survey of Systems Neuroscience	100
BIOS 24217	Conquest of Pain	100
BIOS 24231	Methods in Computational Neuroscience	100
BIOS 24232	Computational Approaches to Cognitive Neuroscience	100
BIOS 24408	Modeling and Signal Analysis for Neuroscientists	100
BIOS 26210	Mathematical Methods for Biological Sciences I	100
BIOS 26211	Mathematical Methods for Biological Sciences II	100
BIOS 27721	Observing Proteins in Action: How to Design and Build Your Own	100
LING 27010	Psycholinguistics	100
NURB 32400	Synaptic Physiology	100
PSYC 20300	Biological Psychology	100
PSYC 20400	Cognitive Psychology	100
PSYC 23800	Introduction to Learning and Memory	100
PSYC 25560	Body & Mind: How our bodies reveal & change emotion & thought	100
PSYC 25750	The Psychology and Neurobiology of Stress	100
PSYC 26660	Genes and Behavior	100
CMSC 15400	Introduction to Computer Systems	100
CMSC 25020	Computational Linguistics	100
CMSC 25025	Machine Learning and Large-Scale Data Analysis	100
CMSC 25050	Computer Vision	100
CMSC 25400	Machine Learning	100
PHYS 12300	General Physics III	100
or PHYS 13300	Waves, Optics, and Heat	
NSCI 29100	Neuroscience Thesis Research	100
NSCI 29101	Neuroscience Thesis Research	100
NSCI 29102	Neuroscience Thesis Research	100
NSCI 29200	Neuroscience Honors Thesis Research	100
NSCI 29201	Neuroscience Honors Thesis Research	100
NSCI 29202	Neuroscience Honors Thesis Research	100

While it is possible to complete a double major in Neuroscience and another program, this is not encouraged.

Neuroscience majors are generally better suited to achieving breadth through a combination of courses that provides the desired expertise in neuroscience and carefully selected courses outside of neuroscience.

Requirements for the Bachelor of Science Degree in Neuroscience

Students can earn a BS in Neuroscience by completing three quarters of Neuroscience elective courses over and above the BA requirements, which must include one to three quarters of faculty-supervised research that results in a written thesis (NSCI 29100, NSCI 29101, NSCI 29102 Neuroscience Thesis Research). The additional courses and the thesis work require approval by the office of the director of undergraduate studies and the thesis advisor. The thesis may be either research-based or literature-based.

Grading

All courses used to satisfy prerequisites and requirements must be taken for quality grades. Students must pass all required courses with an average GPA of 2.0 or higher to continue in the program.

Summary of Requirements for the Major in Neuroscience

GENERAL EDUCATION

One of the following BIOS sequences:*		200
BIOS 20186	Fundamentals of Cell and Molecular Biology	
Plus one of the following		
BIOS 20150	How Can We Understand the Biosphere?	
BIOS 20151	Introduction to Quantitative Modeling in Biology (Basic)	
BIOS 20152	Introduction to Quantitative Modeling in Biology (Advanced)	
BIOS 20187	Fundamentals of Genetics	
BIOS 20188	Fundamentals of Physiology	
BIOS 20191	Integrative Physiology	
OR		
BIOS 20170 & BIOS 20171	Microbial and Human Cell Biology and Human Genetics and Developmental Biology #	
One of the following two-course MATH sequences:		200
MATH 13100-13200	Elementary Functions and Calculus I-II	
MATH 15100-15200	Calculus I-II *	
MATH 16100-16200	Honors Calculus I-II	
One of the following two-course CHEM sequences:		200
CHEM 10100 & CHEM 10200	Introductory General Chemistry I and Introductory General Chemistry II	
CHEM 11100-11200	Comprehensive General Chemistry I-II *	
CHEM 12100-12200	Honors General Chemistry I-II	
Total Units		600

MAJOR: BACHELOR OF ARTS

CHEM 11300 or CHEM 12300	Comprehensive General Chemistry III * Honors General Chemistry III	100
PHYS 12100-12200	General Physics I-II (or higher) *	200
STAT 22000	Statistical Methods and Applications *	100
NSCI 20110	Fundamental Neuroscience	100
NSCI 20120	Cellular Neuroscience	100
NSCI 20130	Systems Neuroscience	100
NSCI 20140	Sensation and Perception	100
NSCI 20100	Neuroscience Laboratory	100
Seven electives		700
Total Units		1600

MAJOR: BACHELOR OF SCIENCE

CHEM 11300 or CHEM 12300	Comprehensive General Chemistry III * Honors General Chemistry III	100
PHYS 12100-12200	General Physics I-II (or higher) *	200
STAT 22000	Statistical Methods and Applications *	100
NSCI 20110	Fundamental Neuroscience	100
NSCI 20120	Cellular Neuroscience	100
NSCI 20130	Systems Neuroscience	100
NSCI 20140	Sensation and Perception	100
NSCI 20100	Neuroscience Laboratory	100
Seven electives		700
Three additional electives **		300
Total Units		1900

* Credit may be granted by examination.

BIOS 20171 must be taken concurrently with BIOS 20172.

** Must include one to three courses of NSCI 29100, 29101, 29102 Neuroscience Thesis Research or NSCI 29200, 29201, 29202 Neuroscience Honors Thesis Research

Honors

To obtain honors in Neuroscience, students must have a minimum cumulative GPA (3.25) at the point of entering the honors track, no later than the end of the third year. Entry into the honors track must be approved by the director of undergraduate studies. Students must do experimental research for three quarters and submit a thesis (NSCI 29200, NSCI 29201, NSCI 29202 Neuroscience Honors Thesis Research). As part of the research course work, honors students participate in regular group meetings in which they share their research with each other and supervising faculty, and receive guidance on formulating testable hypotheses, experimental design, report writing, and oral presentations. They also receive training in the responsible conduct of research. Experimental research may not be credited toward honors in more than one major.

Minor Options

A minor in Neuroscience is not offered. The College offers a minor program in Computational Neuroscience, and students majoring in Biological Sciences have the option of completing a Specialization in Neuroscience.
